AUTHENTICATION AUTHENTICATE SECURELY VIA THE LOGIN INTERFACE

+ OPERATIONAL PROCEDURE (2-3 STEPS)

+ 1. Enter your assigned username into the Username field.

+ 2. Type your secure account password into the Password field.

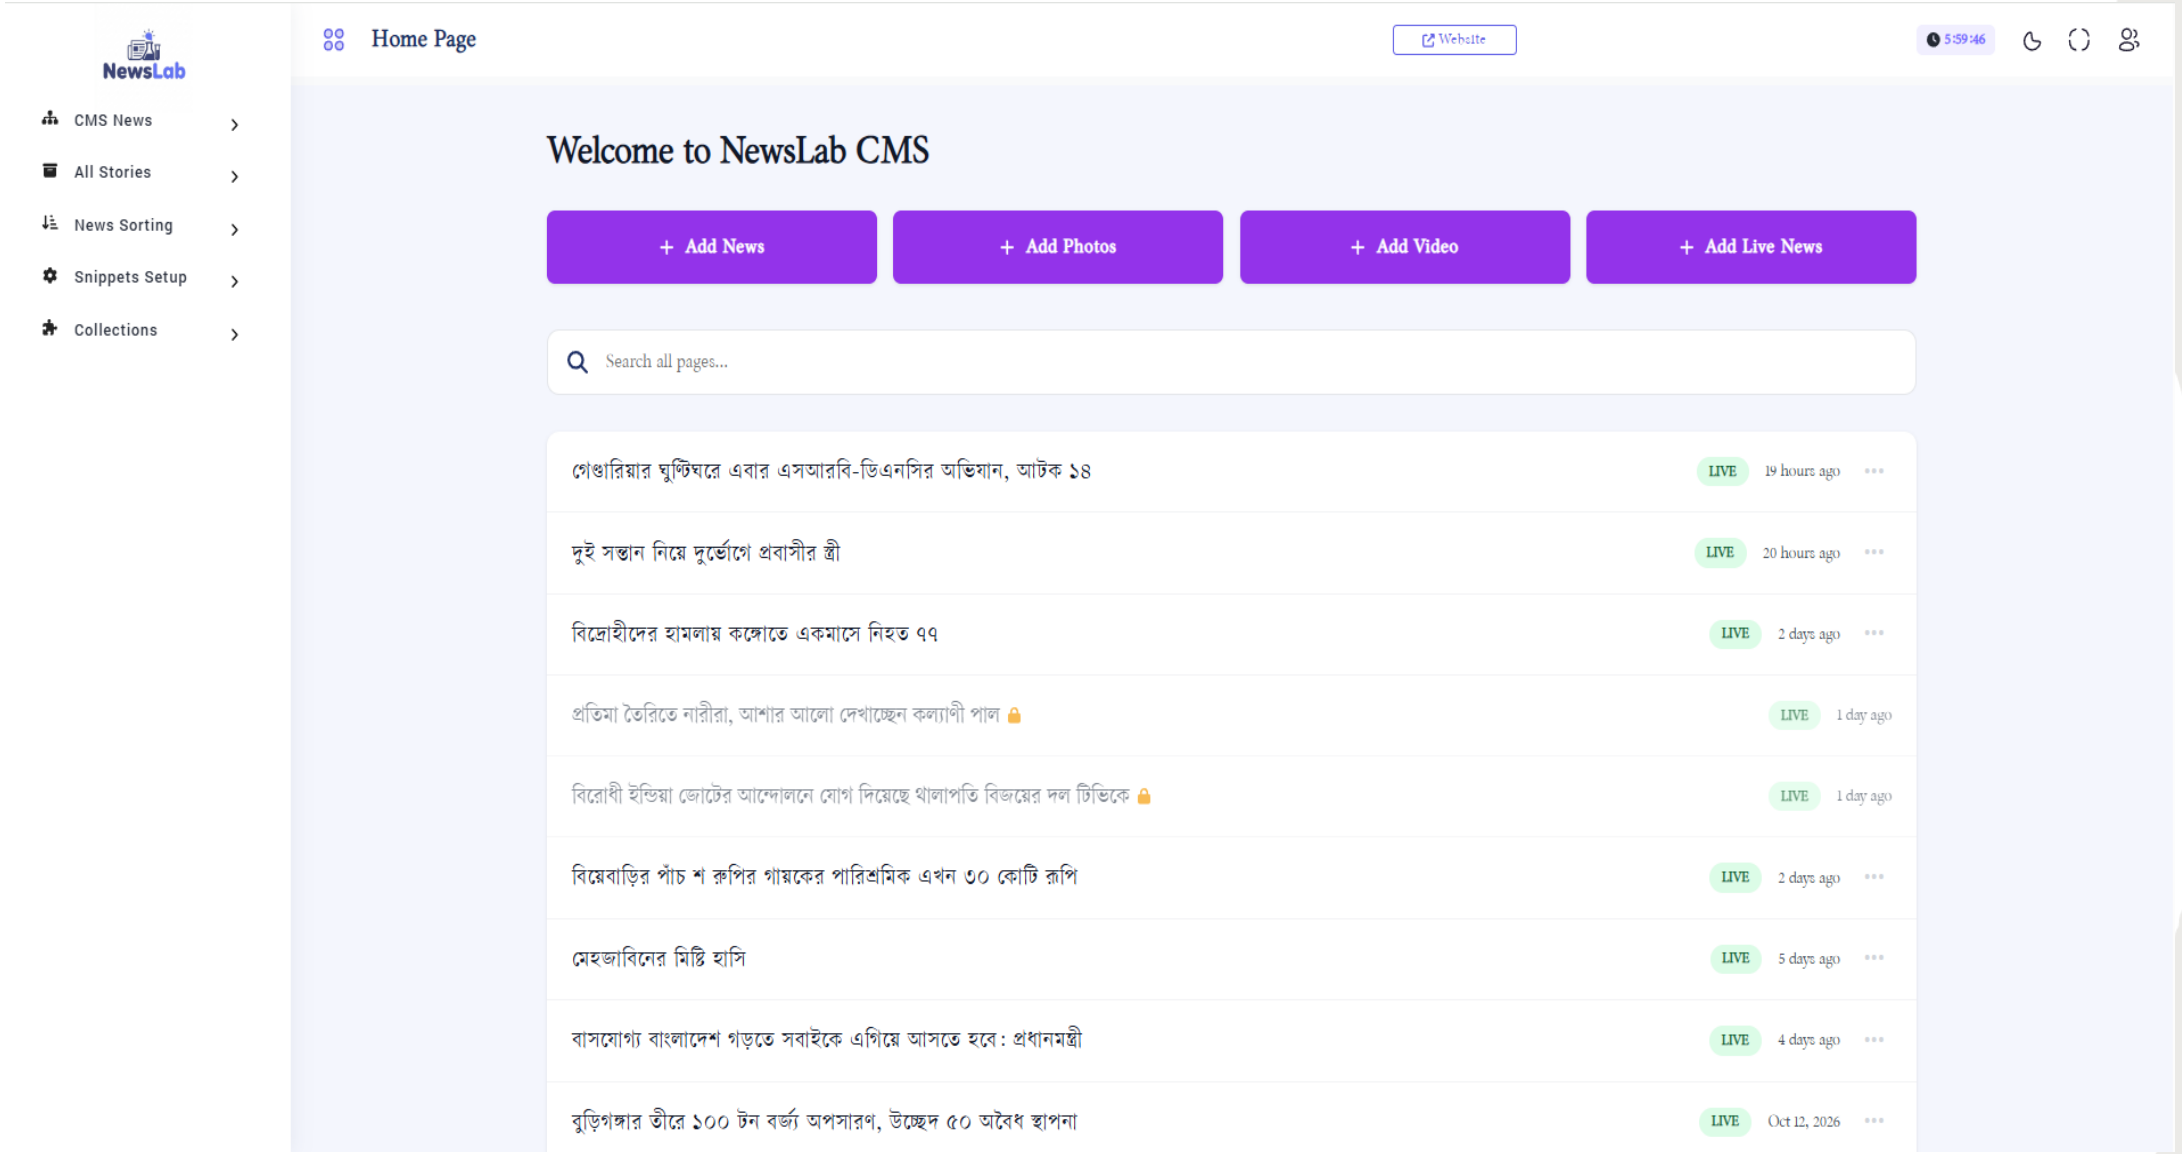

+ 3. Click the primary blue 'Login' button to access the editorial management workspace.

HOME PAGE (DASHBOARD) – AFTER LOGIN

- After logging in, you are taken to the Home Page editor dashboard. From here, you can:
- **Create Content**: Use the top buttons to quickly add News, Photos, Video, or Live News.
- **Search**: Use the search bar to find any page or article across the CMS.
- **View Recent Stories**: The main feed shows recently published items with their status, publication time, and management options.
- **Navigate**: Use the left sidebar to access CMS News, All Stories, News Sorting, Snippets Setup, and Collections.
- **Manage Account**: Use the top-right icons to visit the live website, check notifications, and access your profile settings.
- This dashboard provides a central hub for monitoring recent activity and creating new content.

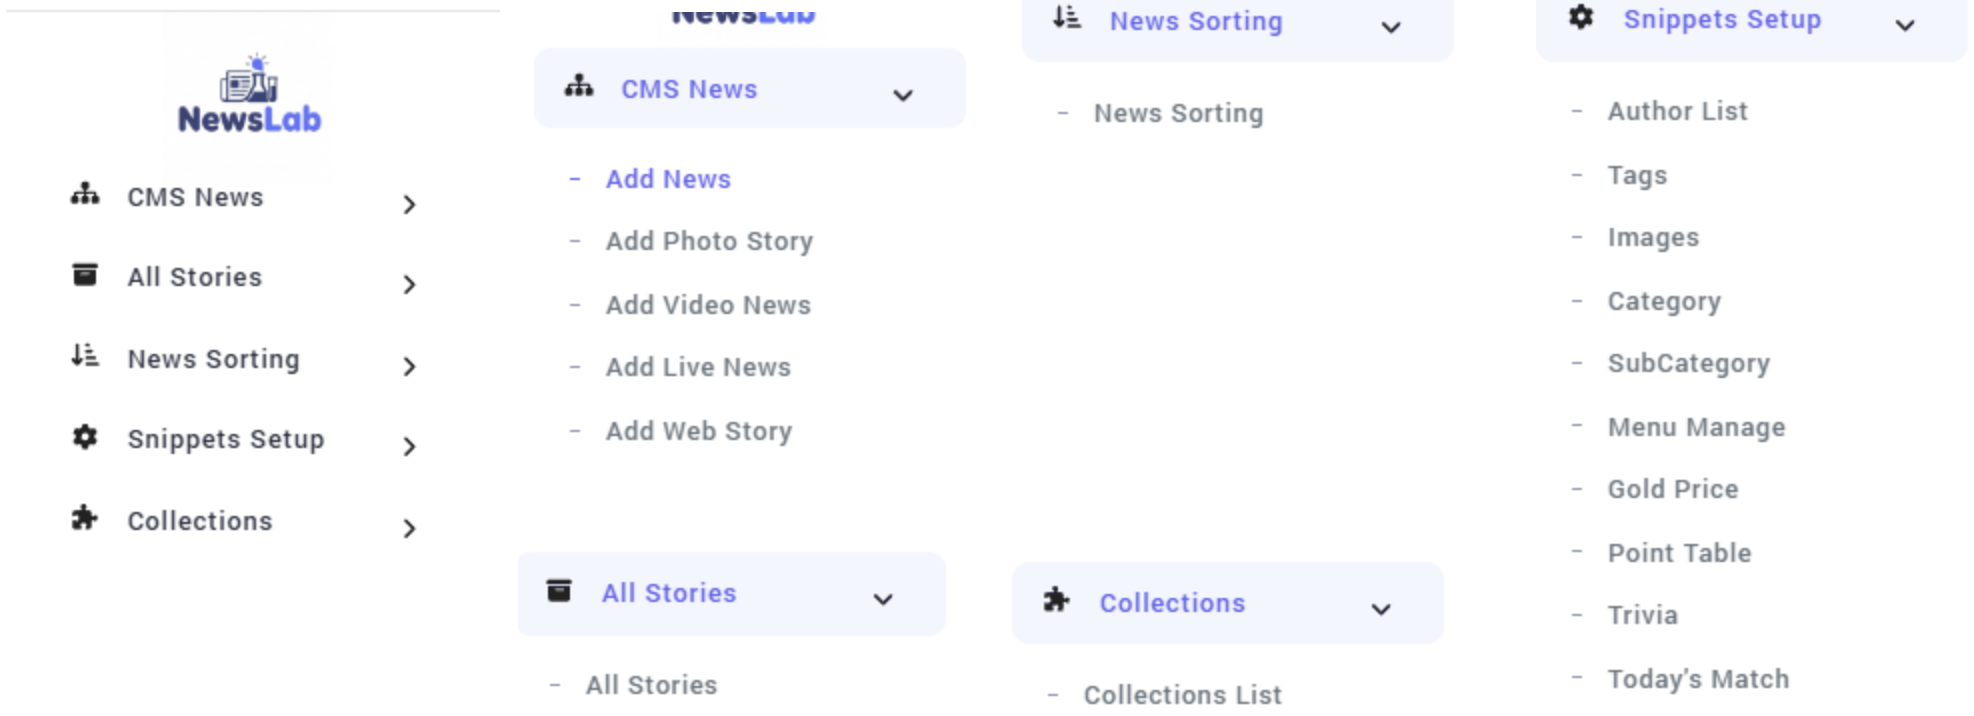

HOME PAGE IMAGE

COLLAPSIBLE SIDEBAR MENU

- **CMS News**
- Create and publish content. Expand to add News, Photo Story, Video News, Live News, or Web Story.
- **All Stories**
- View and manage all published and draft stories in one centralized list.
- **News Sorting**
- Organize and reorder news items to control their display sequence on the website.
- **Snippets Setup**
- Manage supporting content elements including Authors, Tags, Images, Categories, SubCategories, Menus, Gold Price, Point Table, Trivia, and Today's Match.
- **Collections**
- Access and manage grouped content collections through the Collections List.

SIDEBAR MENU'S

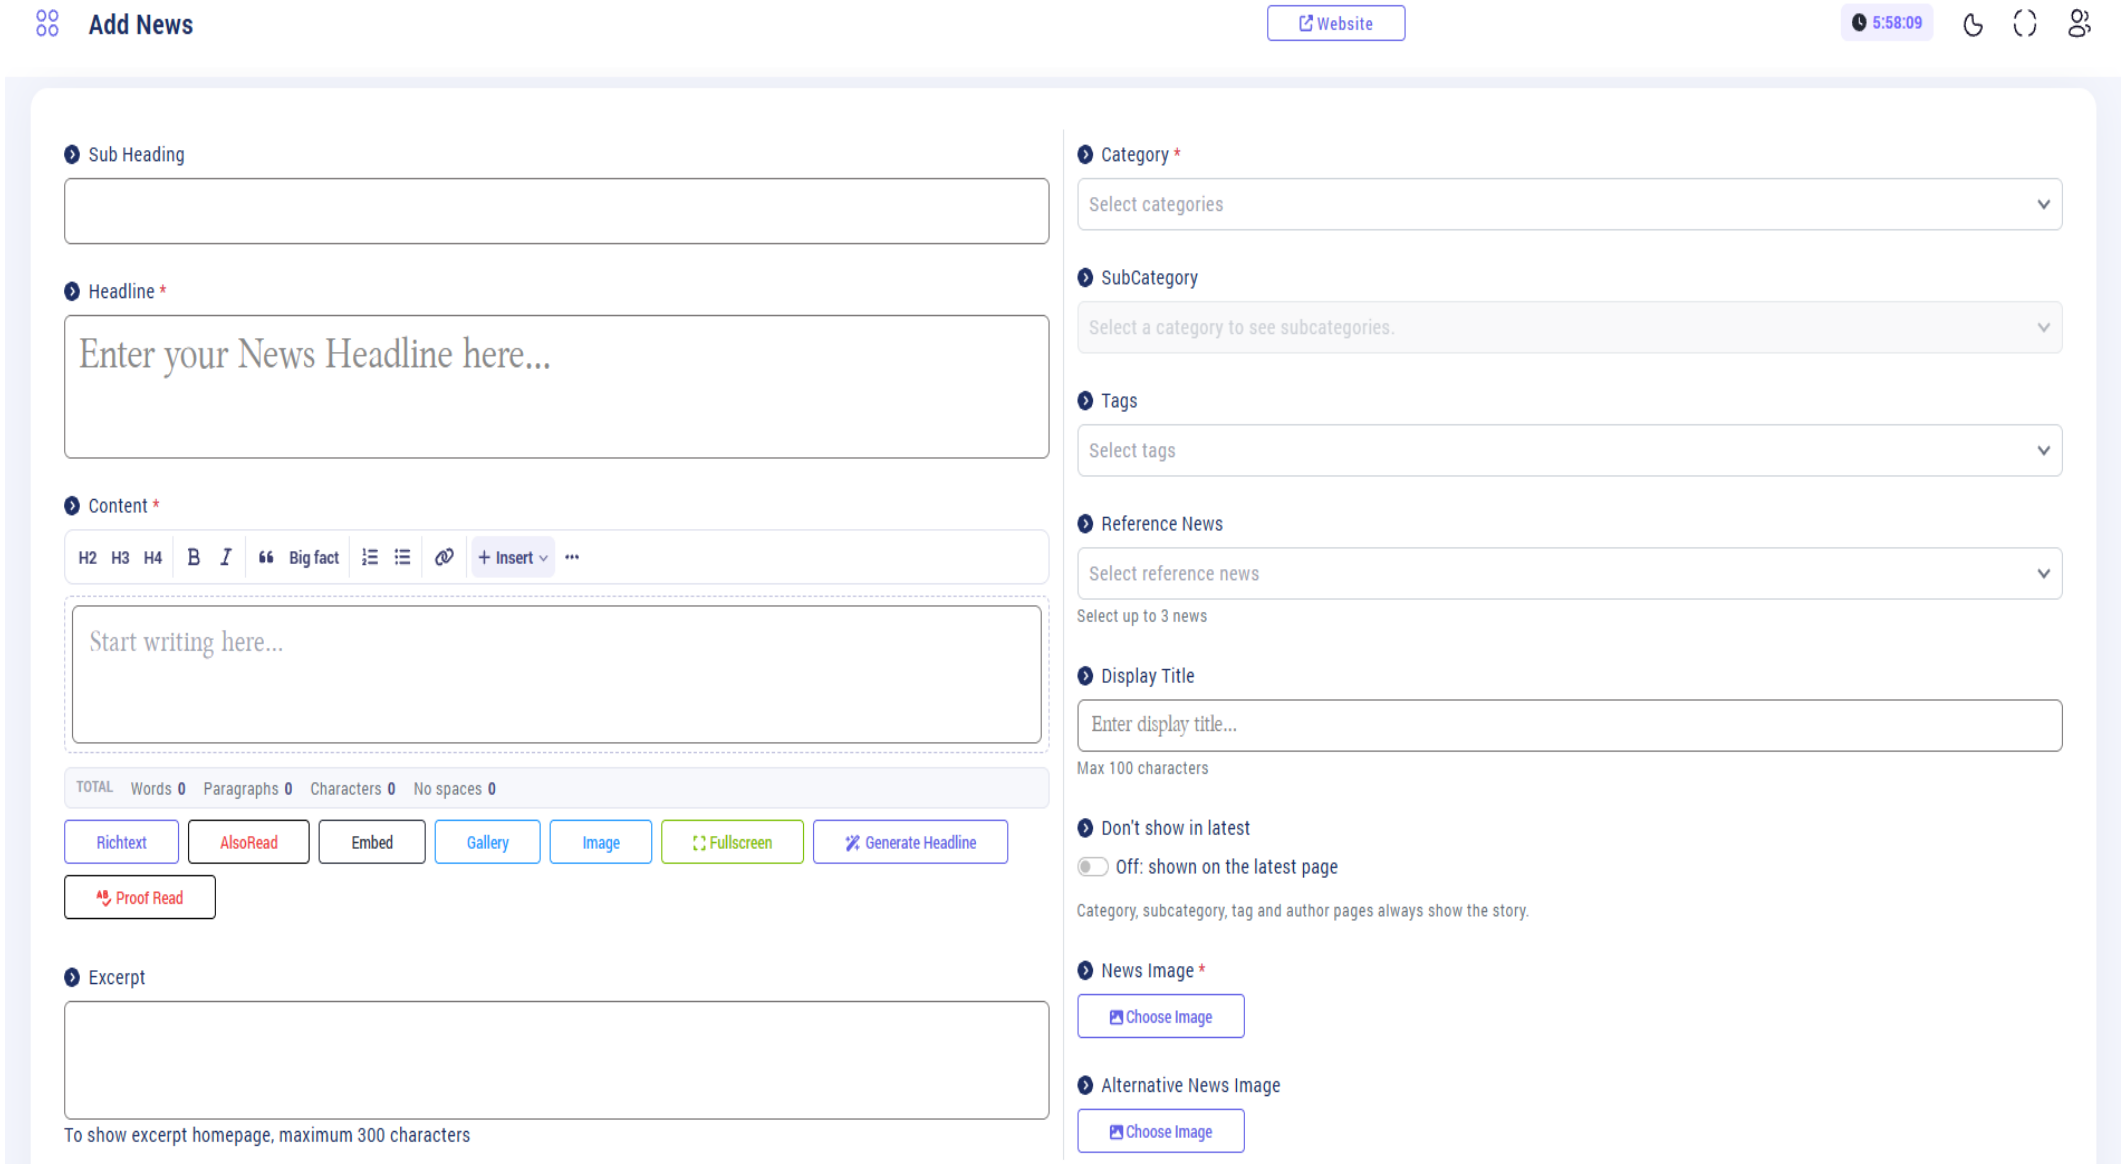

ADD NEWS -1

USE THIS FORM TO CREATE AND PUBLISH A NEW NEWS ARTICLE.

- Content Fields
- **Headline**: Enter the main news headline (required).
- **Sub Heading**: Add an optional subheading.
- **Content**: Write the article body using the rich text editor. Use the toolbar for headings, bold, italic, lists, links, and special inserts like "Big fact," "AlsoRead," "Embed," "Gallery," or "Image." A live word and character counter is displayed below the editor.
- **Excerpt**: Write a short summary for the homepage (maximum 300 characters).
- Categorization & References (Right Panel)
- **Category**: Select the main category for the article (required).
- **SubCategory**: Choose a subcategory based on the selected category.
- **Tags**: Assign relevant tags to the article.
- **Reference News**: Link up to 3 related news articles.
- **Display Title**: Enter a shorter title for display purposes (maximum 100 characters).
- **Don't show in latest**: Toggle whether the story appears on the latest news page. It will still appear on category, tag, and author pages.
- Media
- **News Image**: Upload the main featured image for the article (required).
- **Alternative News Image**: Upload an optional secondary image.

ADD NEWS IMAGE - 1

ADD NEWS – 2

USE THIS FORM TO CREATE AND PUBLISH A NEW NEWS ARTICLE.

- Author & Story Settings (Lower Left)
- **Summary**: Enable or disable a summary section for the article.
- **Author**: Select the author(s) of the article, up to 3 (required).
- **Author Location**: Enter the author's location if applicable.
- **Initial**: Select an initial identifier if required.
- **Alternative Title**: Add an alternate title if needed.
- **Highlight**: Mark the story as a highlight if applicable.
- SEO & Features (Lower Right)
- **Featured Items**: Select if the article should appear in featured sections.
- **Meta Title**: Enter the page title for search engine results (maximum 255 characters).
- **Meta Description**: Write the descriptive text shown in search engine results.
- **Meta Keyword**: Add keywords to improve searchability (maximum 500 characters).
- Publishing Options (Bottom Bar)
- **Alert**: Add internal instructions or notes for the team. This field is cleared once the article is published.
- Actions: Save the article as a **Draft**, **Publish** it immediately, or **Schedule** it for a future date and time.

CONTENT RICH-TEXT EDITOR – HTML TAGS & FEATURES

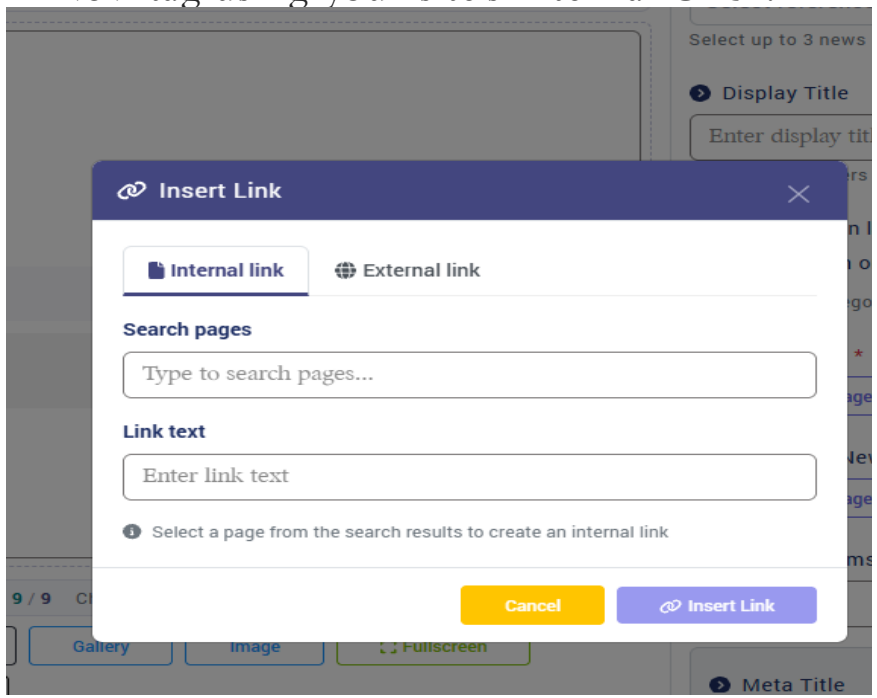

- The content editor works like a word processor. When you format text, the system automatically converts it into standard HTML tags for the website. Here is what each tool creates behind the scenes:
- Text Formatting
- **Bold (B)**: Wraps text in `<strong>` tags to make it bold.
- **Italic (I)**: Wraps text in `<em>` tags for emphasis/italics.
- **H2, H3, H4**: Creates heading tags `<h2>`, `<h3>`, and `<h4>` to structure your article hierarchy. H2 is the largest subheading, H4 is the smallest.
- Paragraphs & Blocks
- **Normal text**: Written content becomes `<p>` (paragraph) tags.
- **Quote**: Formats text as a `<blockquote>` to highlight quoted material.
- **Big Fact**: Usually generates a styled `<div>` or `<aside>` block with special CSS classes to highlight key facts or statistics.
- **Split block at the cursor**: Splits the current paragraph or block into two separate `<p>` or container tags at the cursor position.

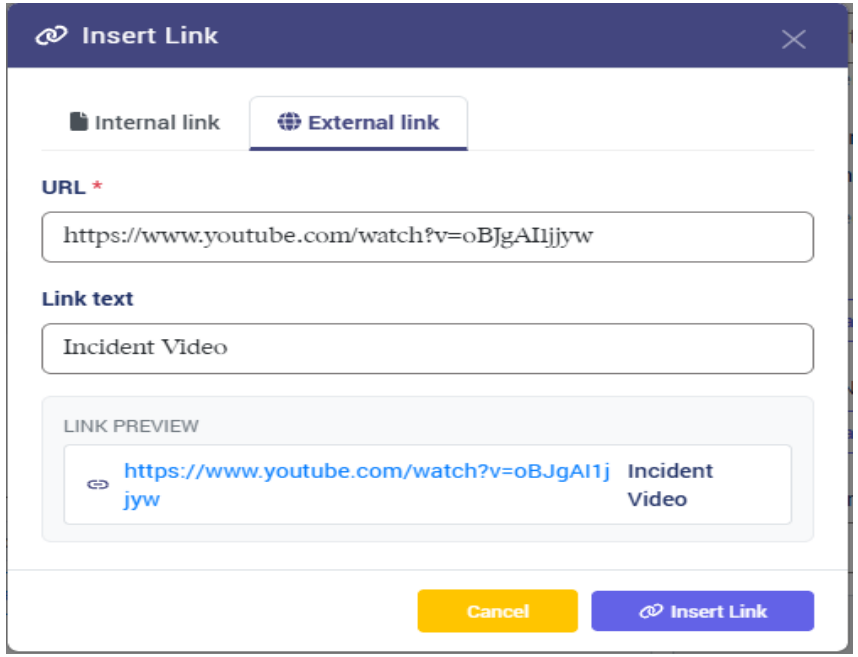

- Alignment
- **Align center**: Applies `text-align: center` via inline styles or CSS classes to the block.
- **Justify**: Applies `text-align: justify` to evenly space text across the line.
- Lists
- **Numbered list**: Creates an ordered list using `<ol>` and `<li>` tags.
- **Bulleted list**: Creates an unordered list using `<ul>` and `<li>` tags.

INSERT LINK

- Insert External Link
- Link to a page outside your website. Select the **External link** tab, paste the destination **URL** (required), enter the **Link text**, and click **Insert Link**. A preview of the link is shown before insertion. This creates a standard HTML `<a>` tag pointing to an external address.
- Insert Internal Link
- Link to another page within your own website. Select the **Internal link** tab, type keywords in **Search pages** to find the target article, enter the **Link text**, select the desired page from the results, and click **Insert Link**. This creates an HTML `<a>` tag using your site's internal URL.

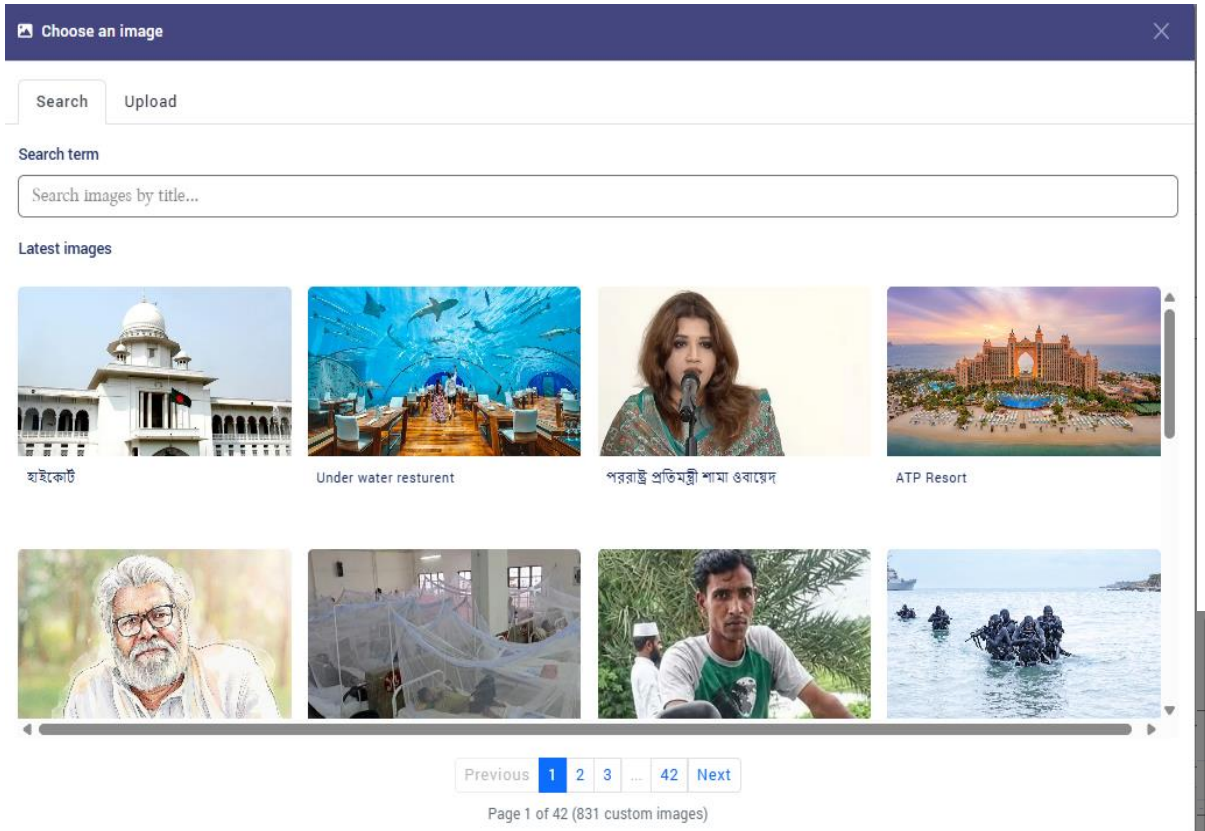

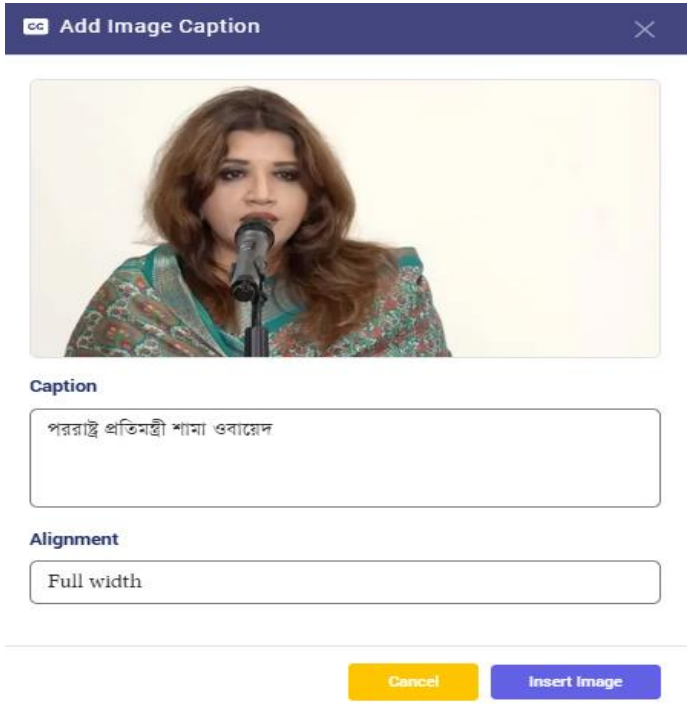

INSERT IMAGE FROM RICH-TEXT EDITOR

- Click the **Image** button in the content editor **toolbar** to open the image selection modal. From here, you can select an existing image from the media library or upload a new one.
- Choose an Image – Search
- On the **Search** tab, browse the media library. Use the search bar to find images by title, then click on any thumbnail to select it. Use the pagination controls at the bottom to navigate through the library.
- Choose an Image – Upload
- Switch to the **Upload** tab to add a new image. Click **Choose File** to select an image from your device (supported formats: AVIF, GIF, JPG, JPEG, PNG, WEBP; maximum 1.0 MB). Enter a **Title** (required), and optionally add a **Caption**, **Tags**, and **Attribute**. Click **Upload** to save the image to the library and proceed.
- Add Image Caption & Alignment
- After selecting or uploading an image, the **Add Image Caption** modal opens. A preview of the image appears at the top.
- **Caption**: Enter or edit the image caption text.
- **Alignment**: Select how the image will display in the article, such as **Full width**, **Left**, or **Right**.
- Click **Insert Image** to place the image into the article with the applied caption and alignment settings.

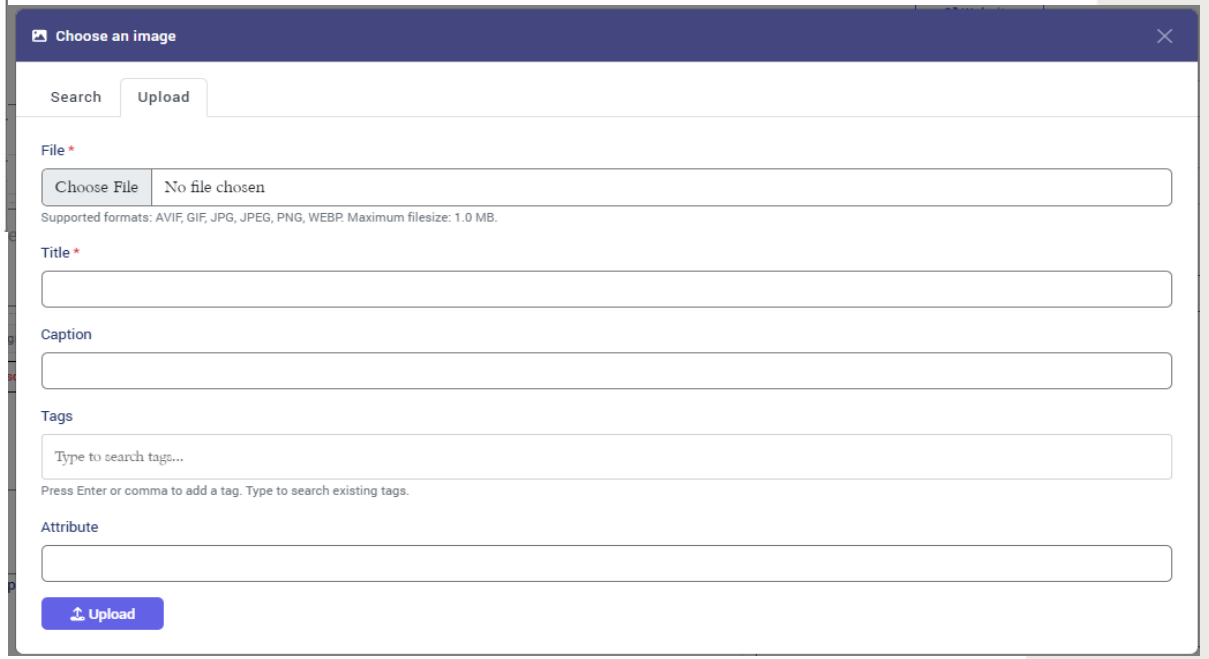

INSERT IMAGE VISUAL VIEW

- Choose an Image – Search

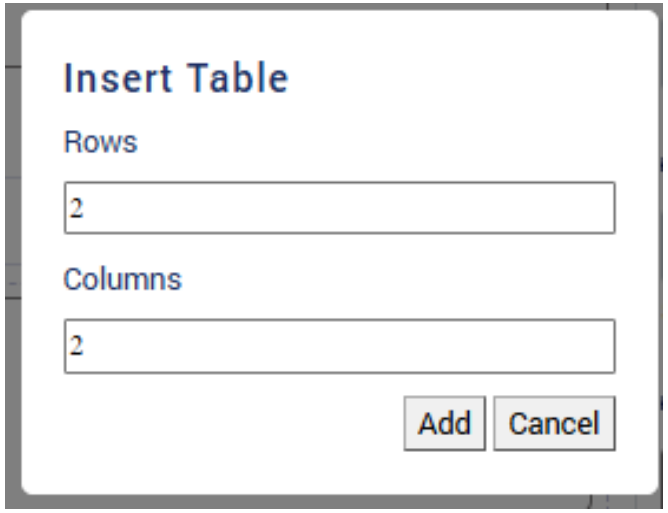

- Add Image Caption & Alignment

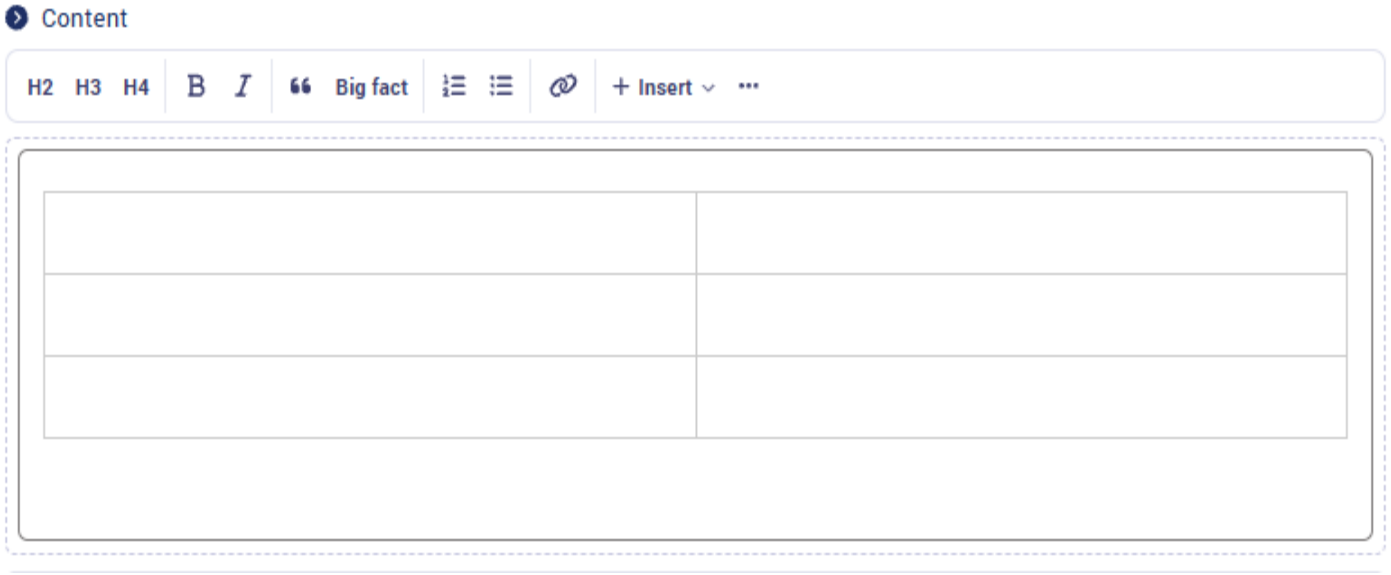

- Choose an Image – Upload

INSERT TABLE

- Click the **Table** option from the content editor's insert menu to add a data table to your article. In the modal, enter the number of **Rows** and **Columns** you need (default is 2x2), then click **Add** to insert the table or **Cancel** to close without adding.
- Once inserted, the table appears **directly inside the content editor as an editable grid**. Click on any cell to start typing or pasting content. The table is rendered within the article body using standard HTML table markup, allowing you to present structured data clearly.

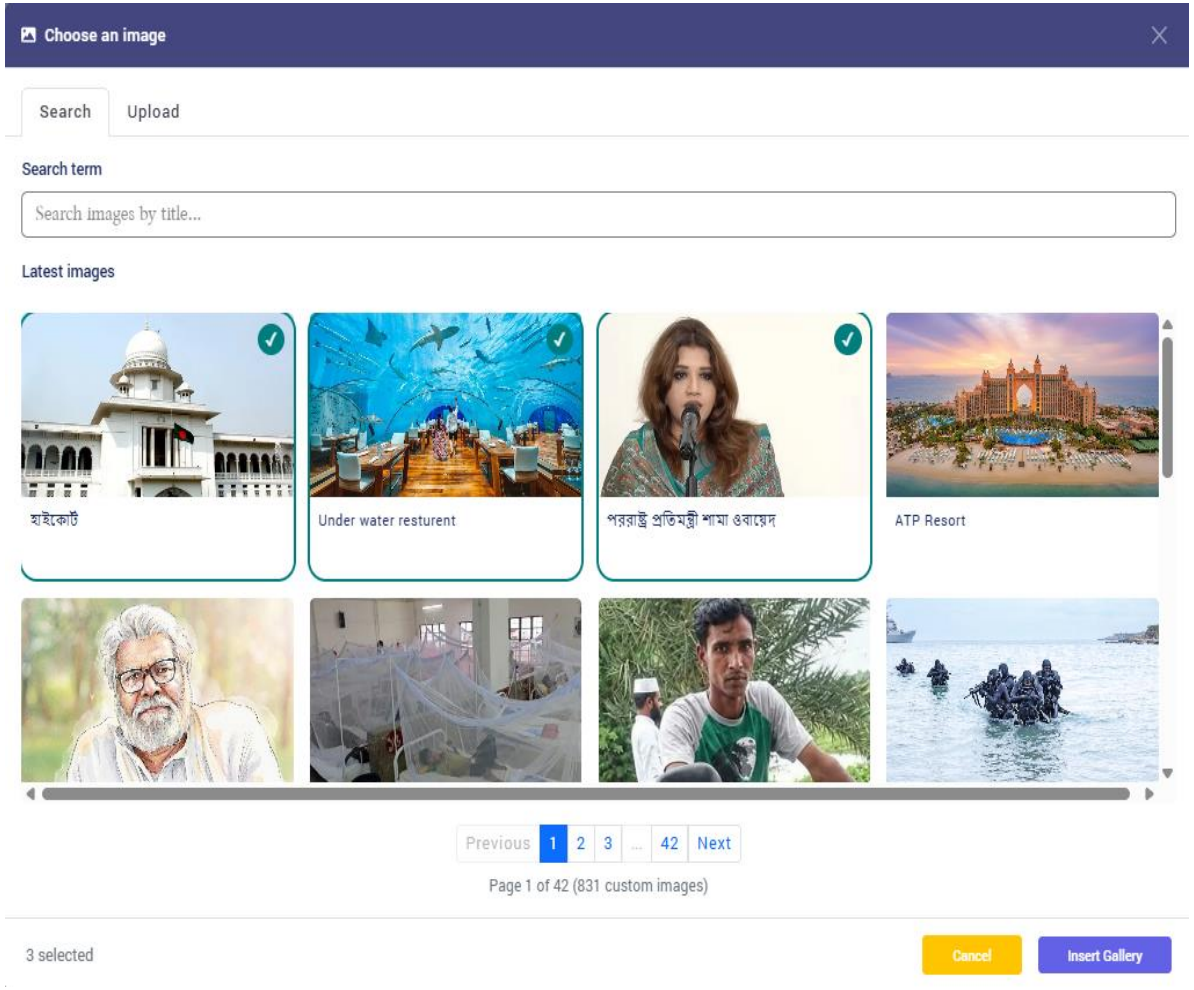

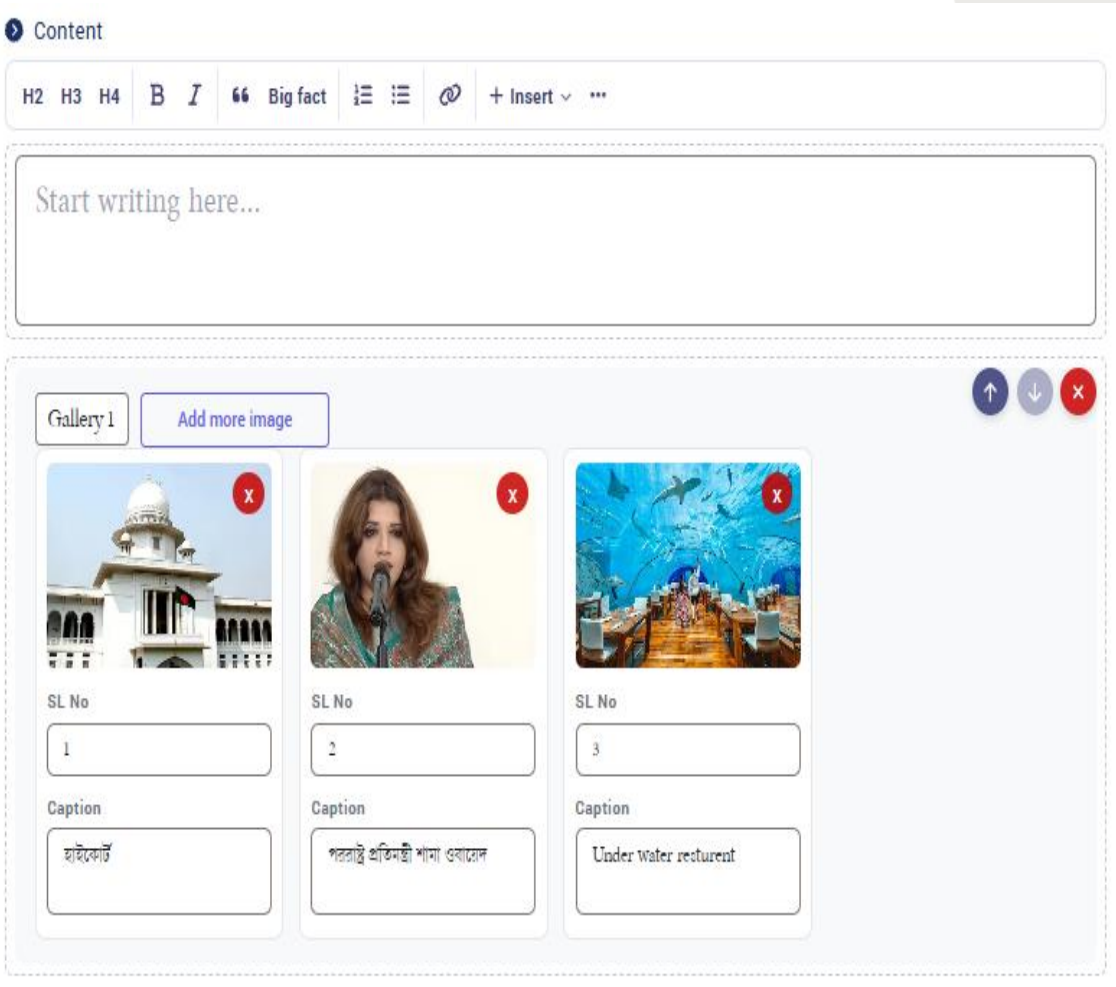

INSERT GALLERY

- Click the **Gallery** button in the content editor toolbar to open the image selection modal and create an image gallery.
- Select Multiple Images – Search
- On the **Search** tab, browse the media library. Use the search bar to find images by title. Click on multiple images to select them; a checkmark appears on each selected item. The bottom of the modal shows how many images are selected (for example, "3 selected"). Use pagination to browse more images. Once you have selected all desired images, click **Insert Gallery** to add them to the article.
- Upload New Images – Upload
- Switch to the **Upload** tab to add new images directly to the gallery. Click **Choose File** to select an image from your device (supported formats: AVIF, GIF, JPG, JPEG, PNG, WEBP; maximum 1.0 MB). Enter a **Title** (required), and optionally add a **Caption**, **Tags**, and **Attribute**. Click **Upload** to save the image. You can upload multiple images this way before inserting the gallery.
- Gallery in the Content Editor
- After insertion, a gallery block labeled **Gallery 1** appears in the article. Each image in the gallery displays with:
- An **SL No** field to set the serial or sort order.
- A **Caption** field to add a description for each image.
- A red **X** button on each image to remove it individually.
- Use the **Add more image** button to open the modal again and add additional photos to the existing gallery. Use the blue up/down arrows to move the entire gallery block within the content, or click the red **X** at the top-right to delete the whole gallery.

INSERT GALLERY VISUAL VIEW

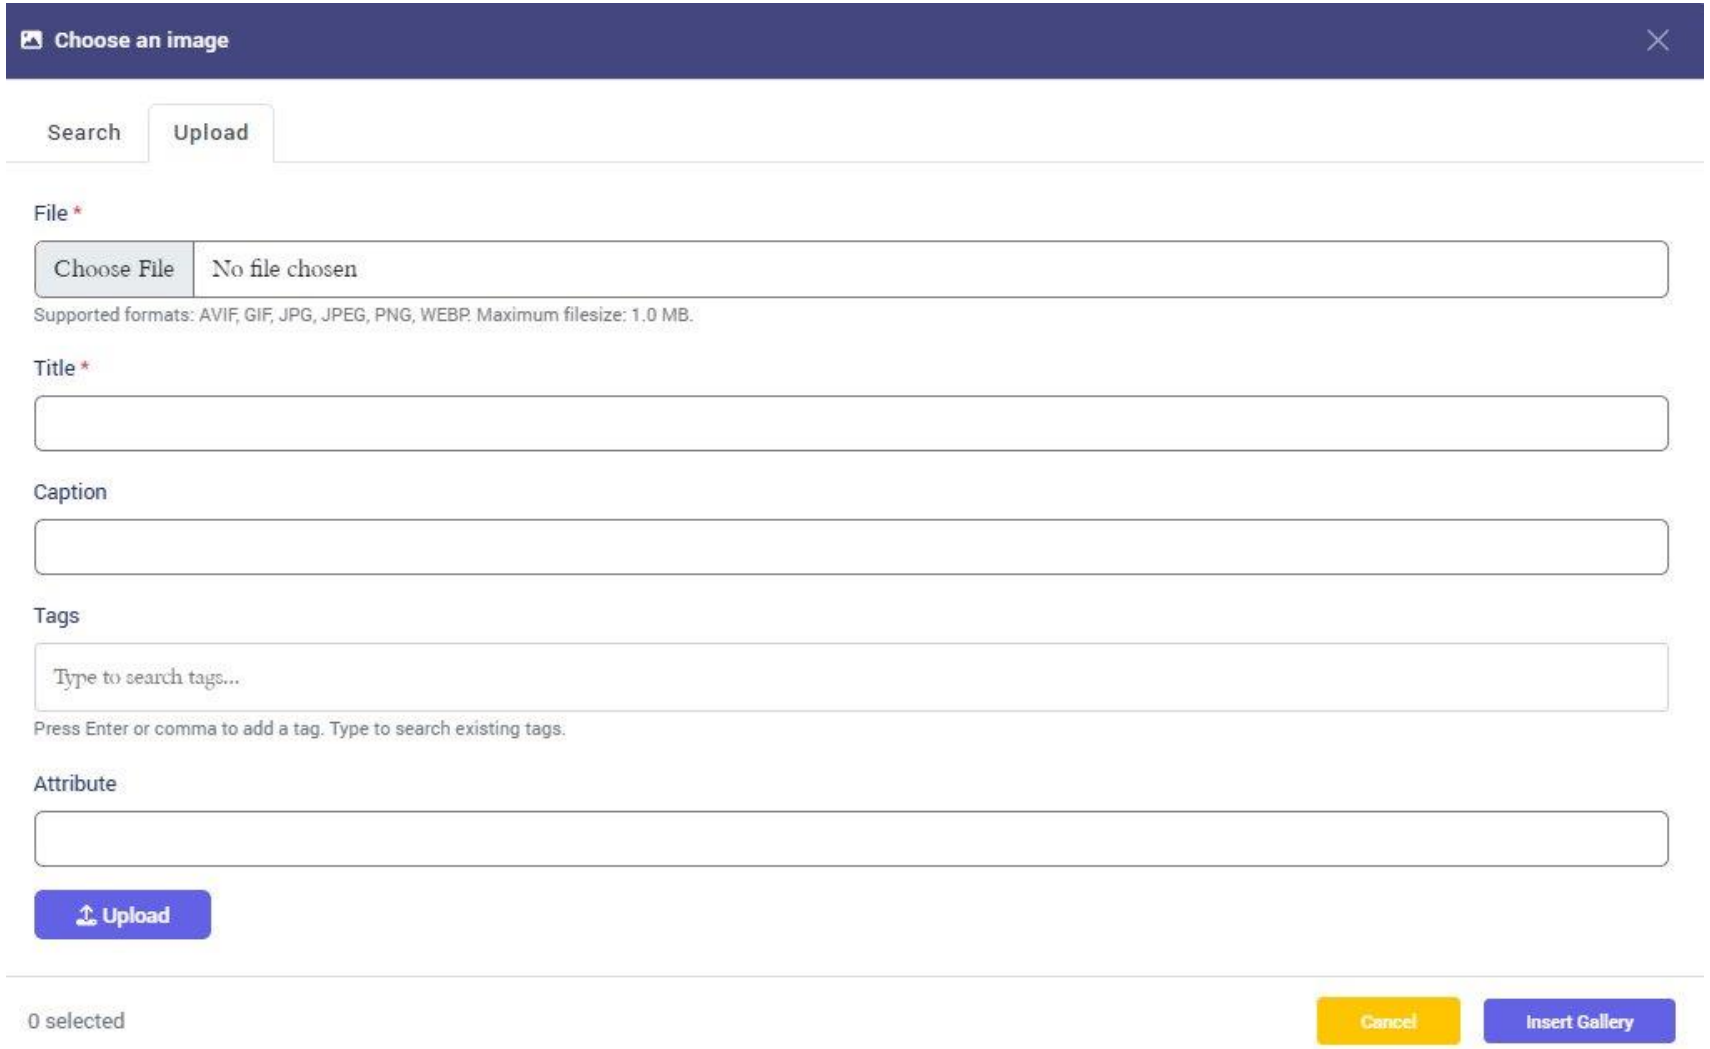

- Select Multiple Images – Search

- Gallery in the Content Editor

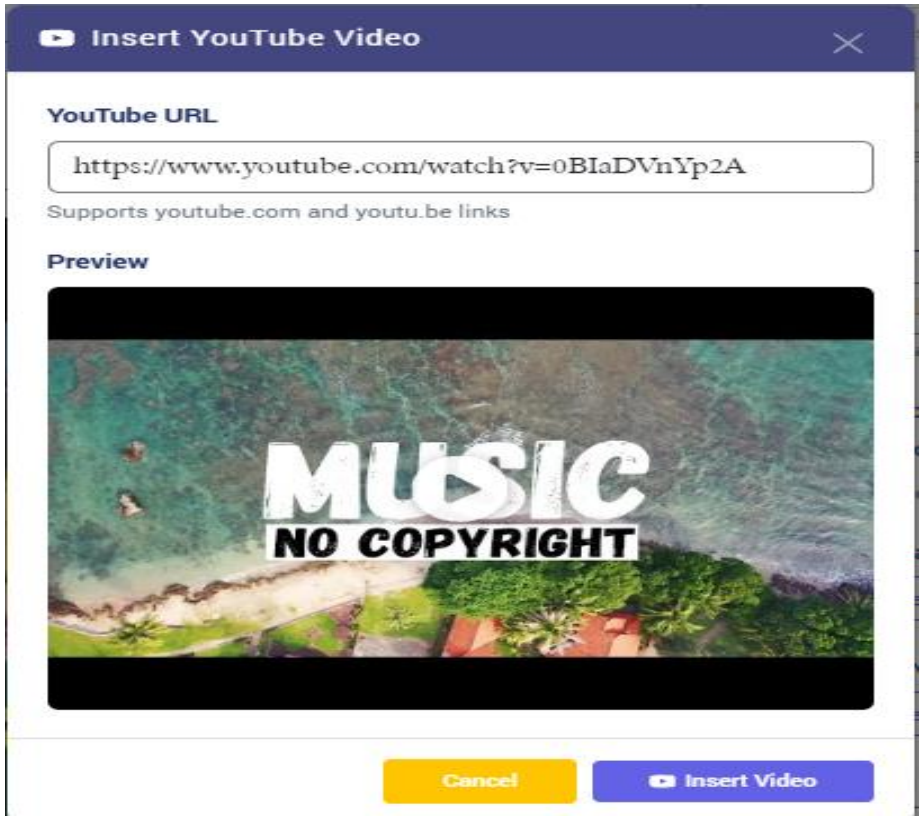

UPLOAD NEW IMAGES – UPLOAD

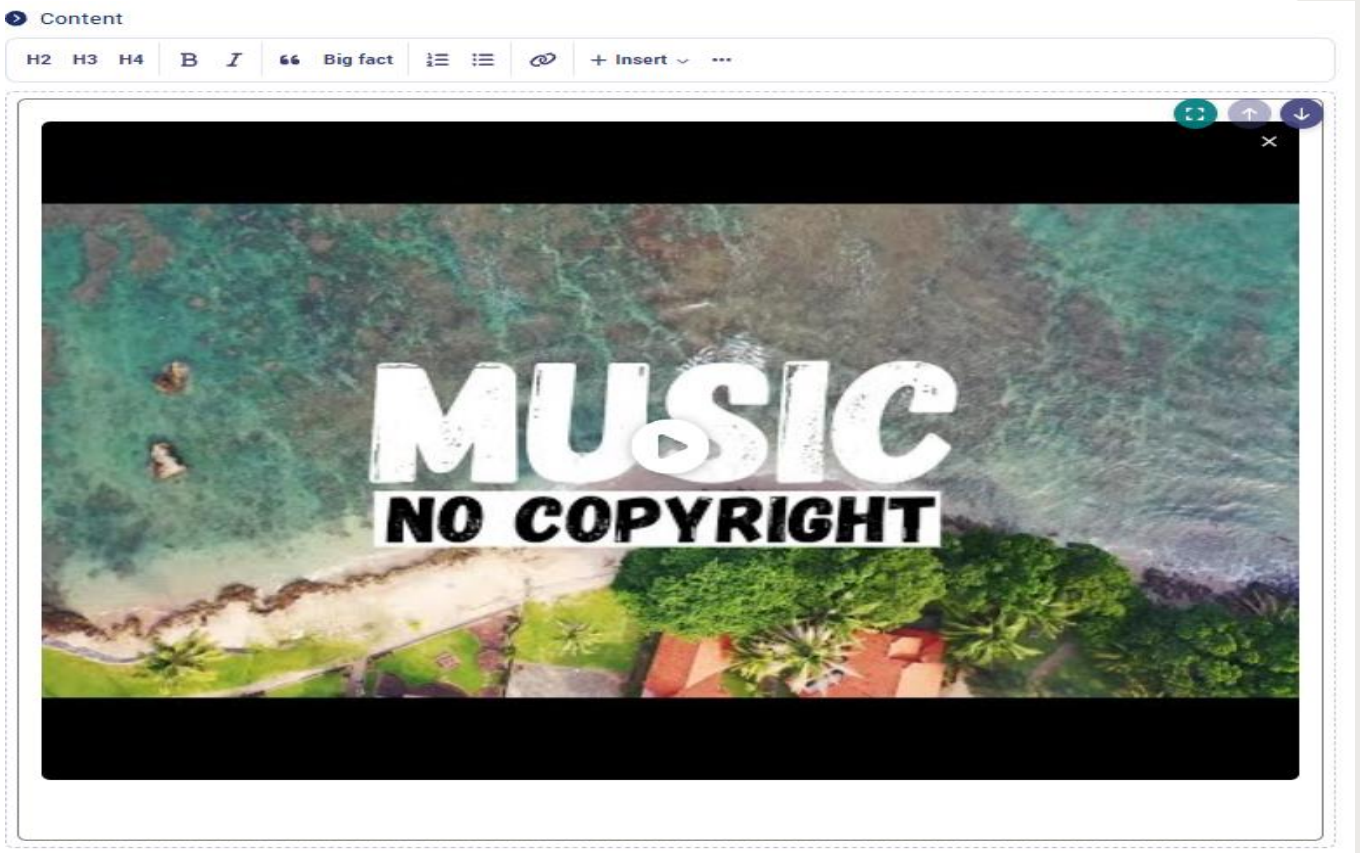

- Upload New Images – Upload

INSERT YOUTUBE VIDEO

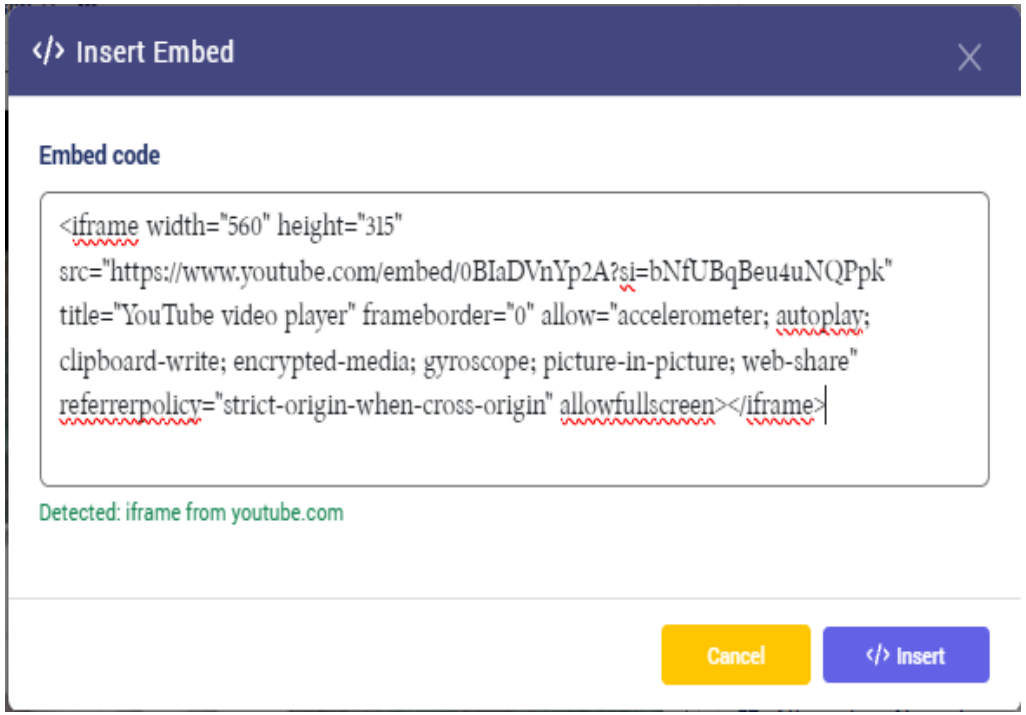

- Click the **YouTube video** option from the content editor's insert menu to embed a YouTube video. In the modal, paste the **YouTube URL** into the field (supports both `youtube.com` and `youtu.be` links). A live **Preview** of the video appears automatically below the URL field so you can confirm the correct video before inserting it. Click **Insert Video** to embed it into the article, or **Cancel** to close without adding.
- Once inserted, the video appears as an embedded player **directly inside the content editor with a play button** overlay. Use the top-right toolbar on the video block to expand the view, move the video up or down within the content, or remove it.

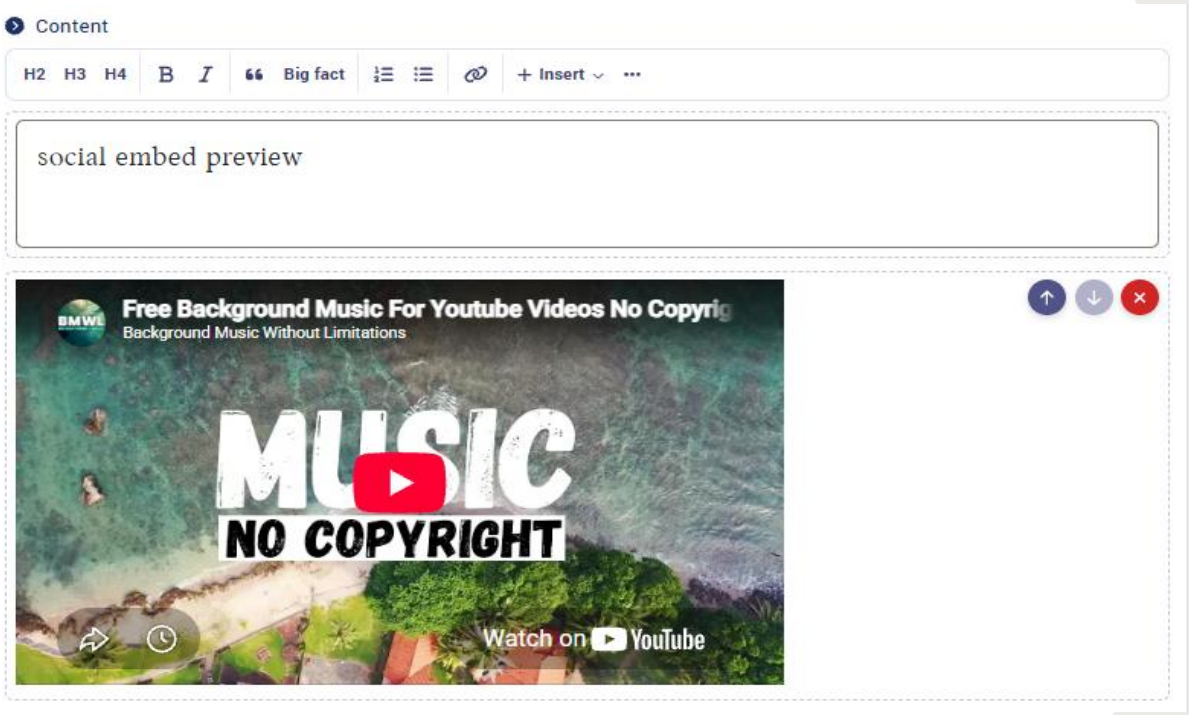

INSERT SOCIAL EMBED

- Click the **Social Embed** option from the content editor's **insert menu** to add external content. In the modal, paste the platform's embed code (such as an `<iframe>`) into the **Embed code** field. The system automatically detects the source platform (for example, "iframe from youtube.com"). Click **Insert** to place the embed into your article.
- Once inserted, a live preview of the embedded content appears directly in the content editor. Use the arrow buttons on the block to move it up or down within the article, or click the red delete button to remove it.

Insert Embed video

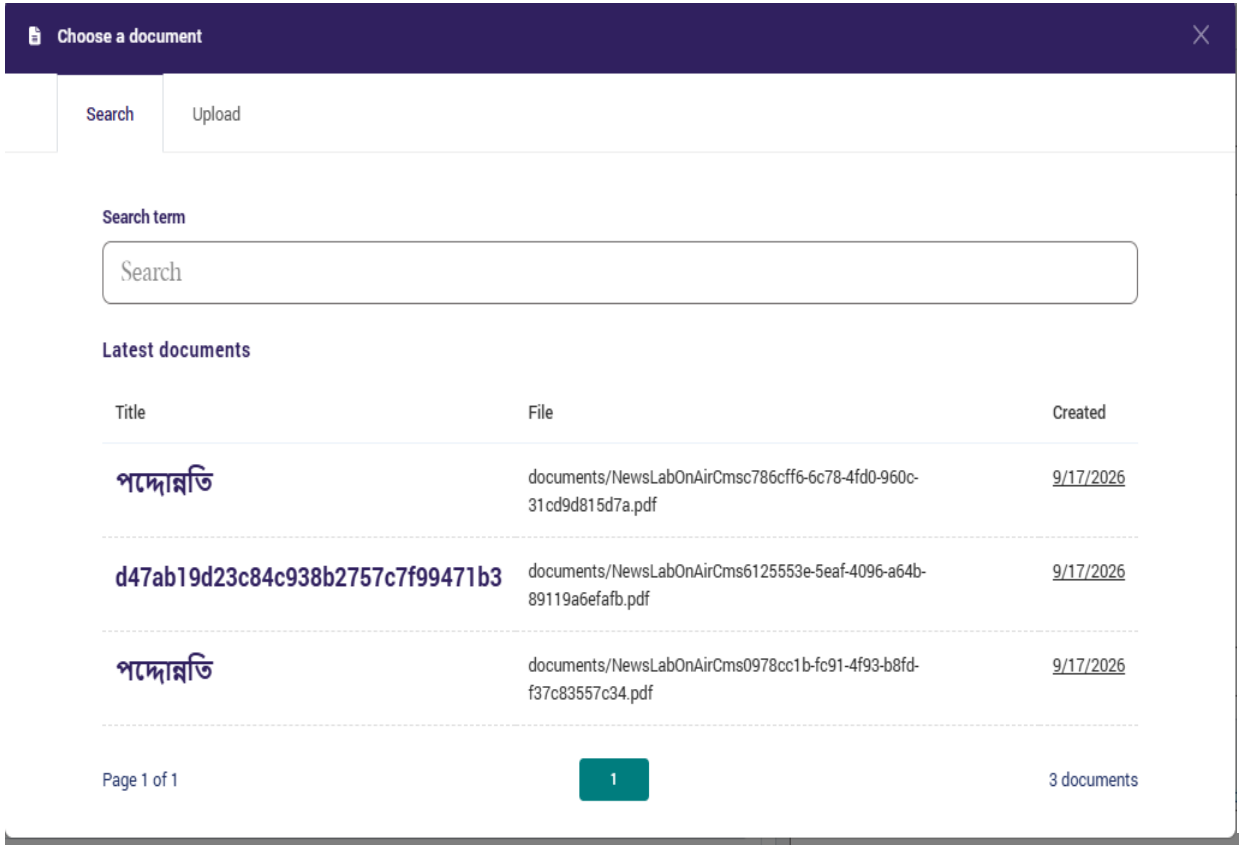

Embed video in the Content Editor

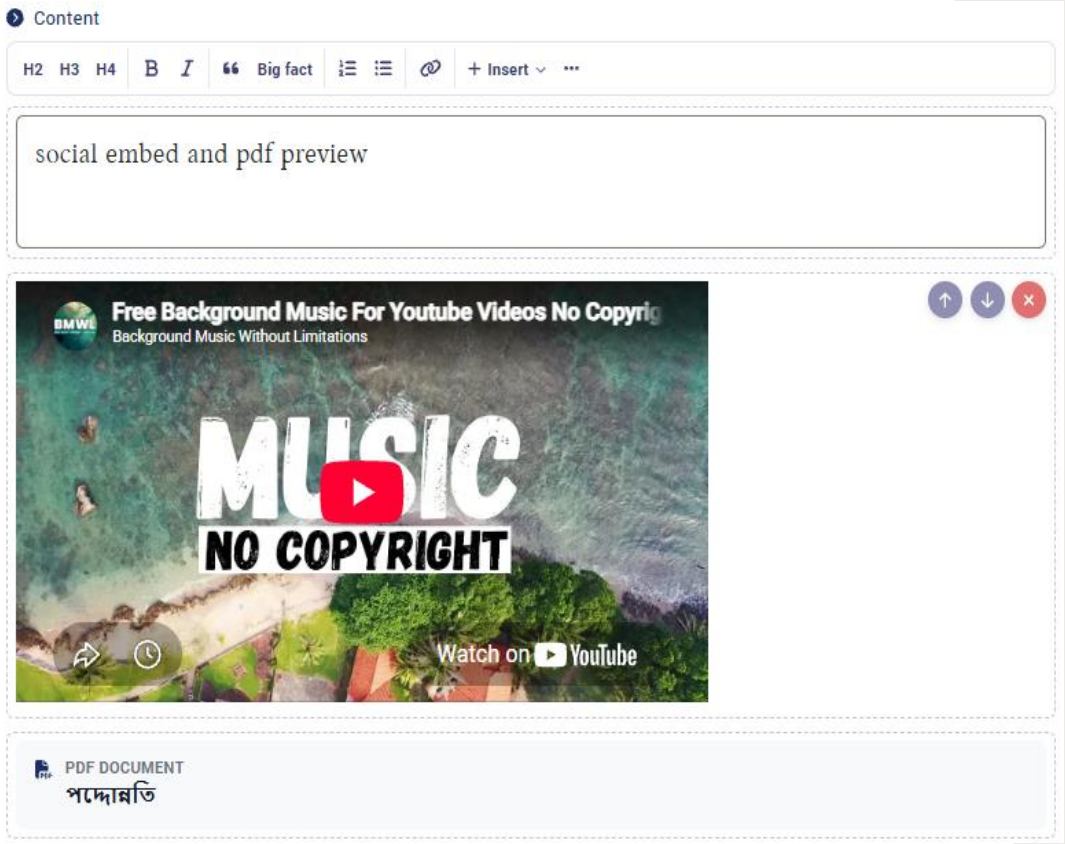

INSERT PDF

- Click the **PDF** option from the content editor's insert menu to attach a PDF document to your article.
- Choose a Document – Search
- On the **Search** tab, browse the existing document library. Use the **Search term** field to filter documents by title. The list shows each document's title, file path, and creation date. Click on the desired document to select and insert it.
- Choose a Document – Upload
- Switch to the **Upload** tab to add a new PDF. Enter a **Title** (required), click **Choose File** to select a PDF from your device (PDF format only, maximum 10 MB), and optionally add **Tags**. Click **Upload** to save the document to the library and insert it, or **Reset** to clear the fields.
- PDF in the Content Editor
- After insertion, a **PDF DOCUMENT** block appears in the article content showing the document title. Use the block controls to move it up or down within the article, or delete it if needed.

PDF VISUAL VIEW

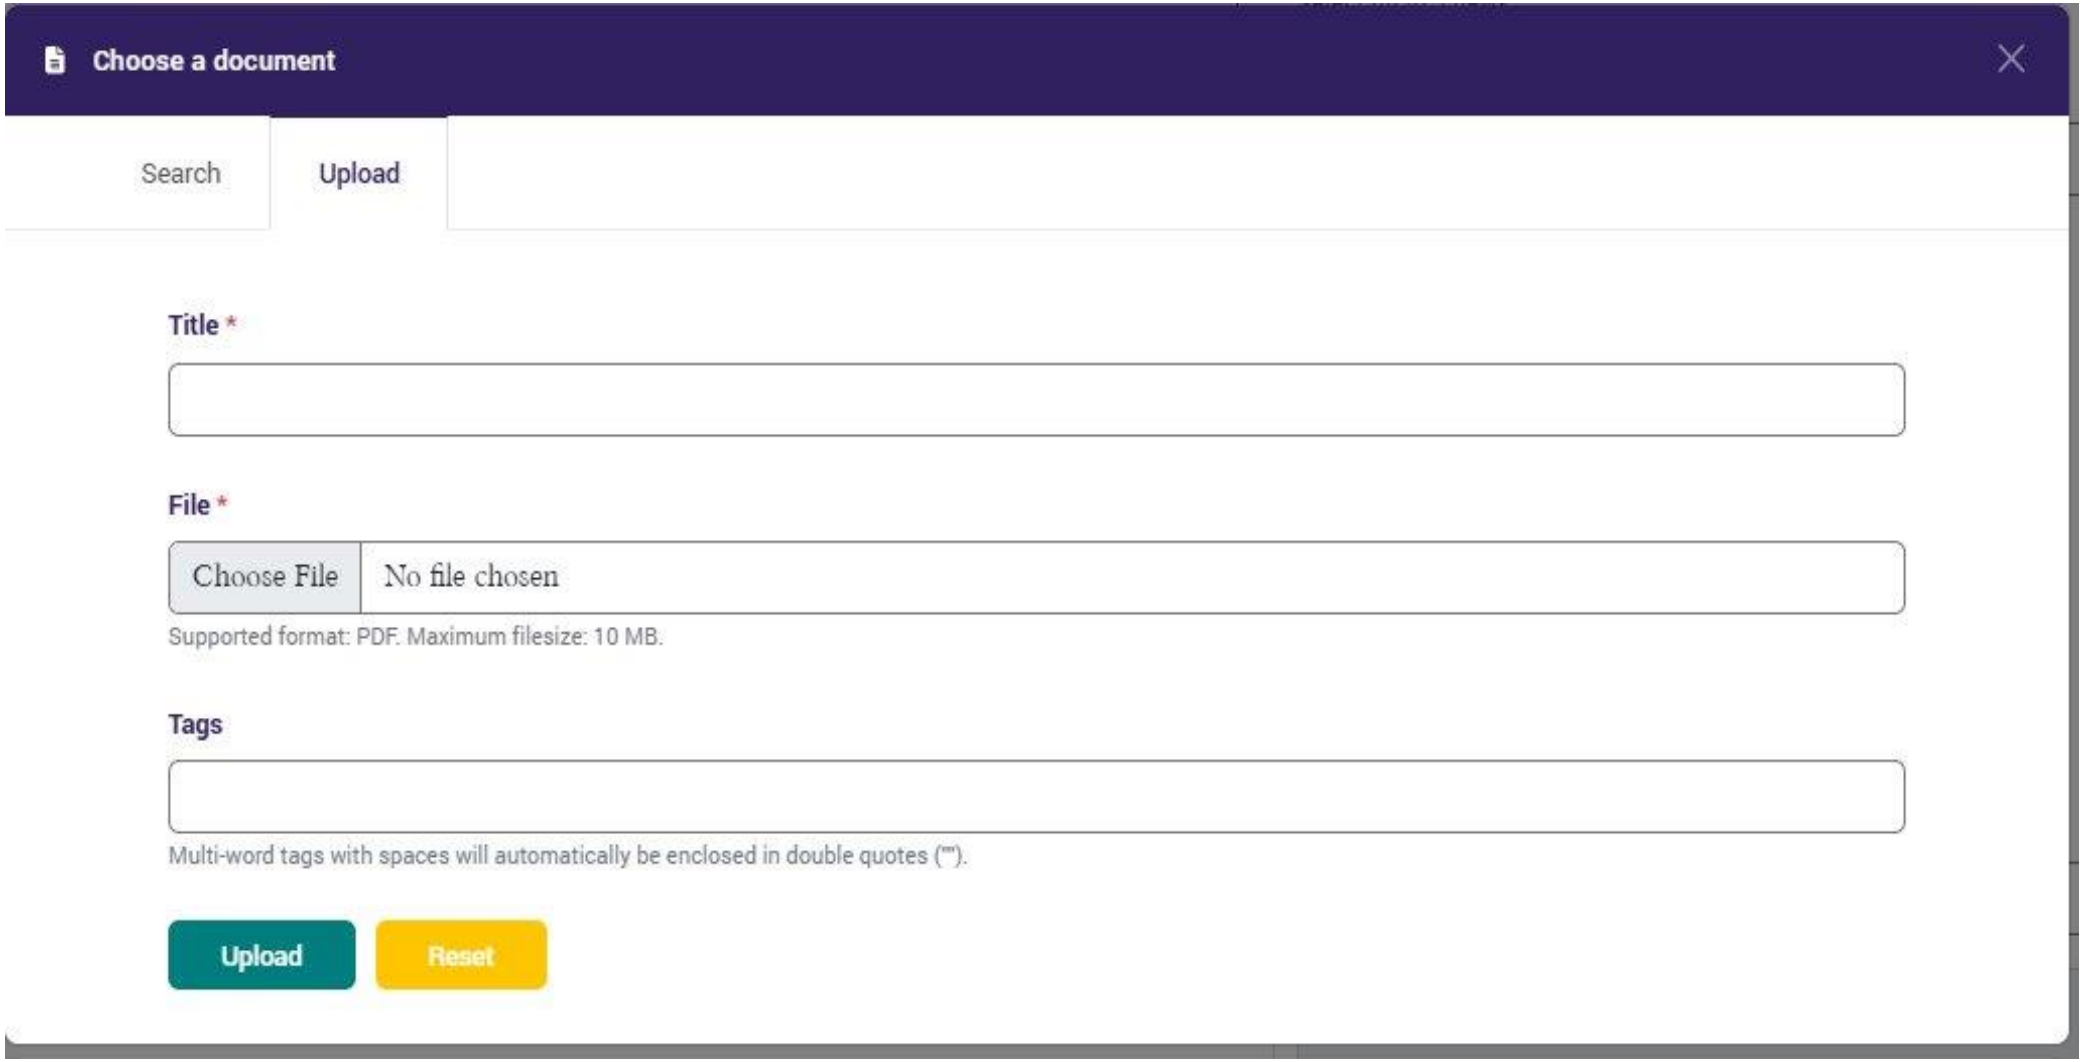

- Choose a Document – Search

- PDF in the Content Editor

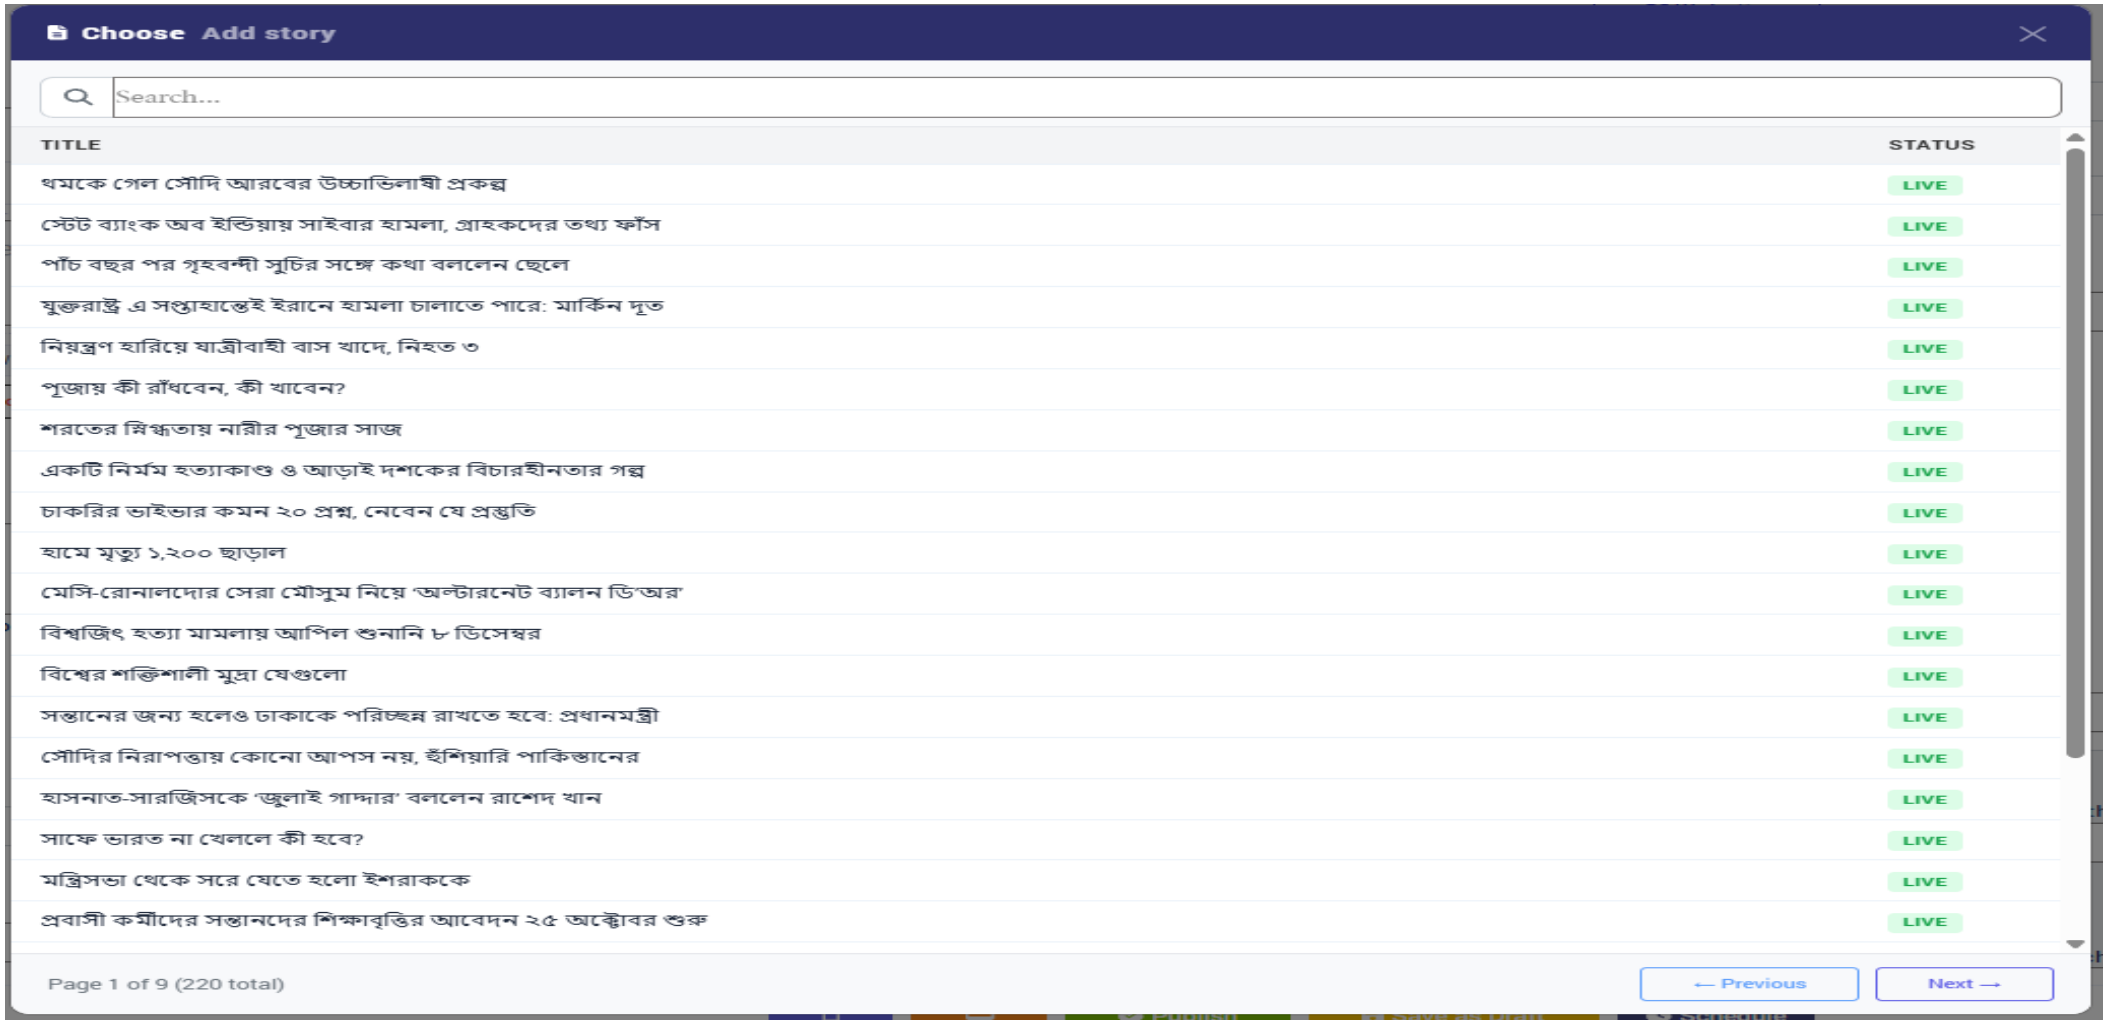

UPLOAD PDF

- Choose a Document – Upload

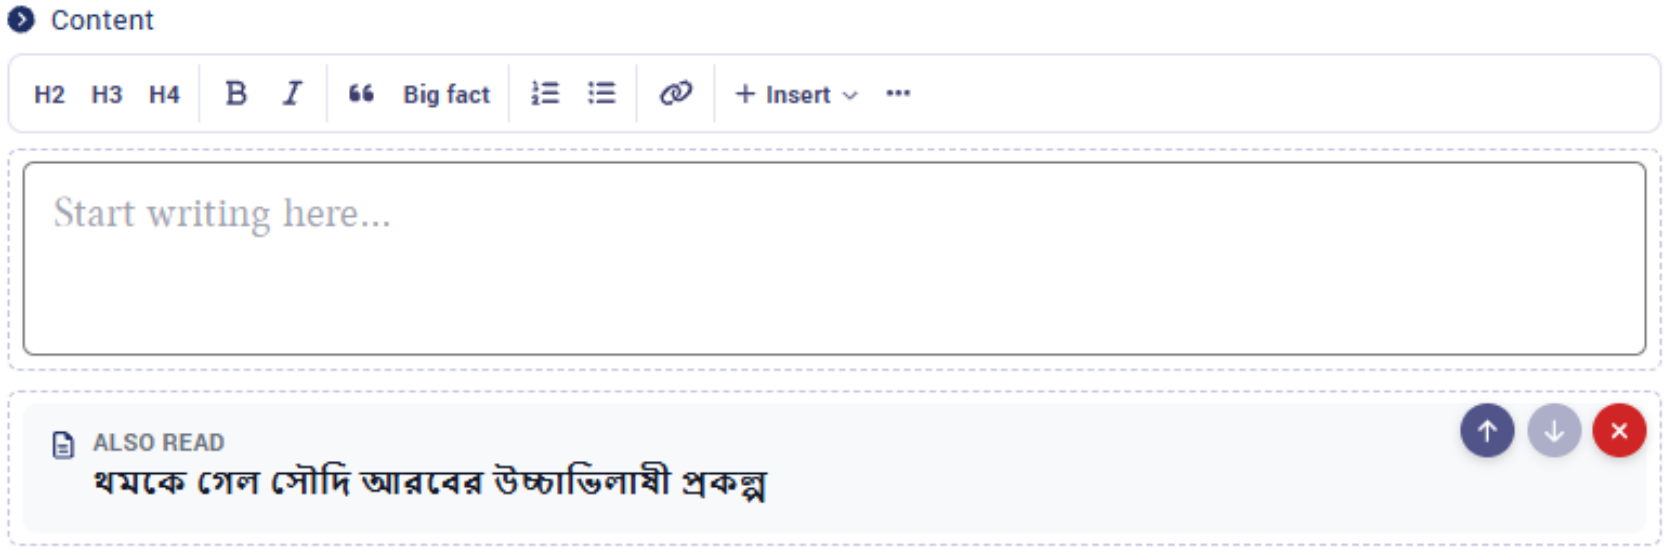

INSERT ALSO READ

- Click the **AlsoRead** button in the content editor toolbar to recommend a related story within your article. A modal titled **Choose Add story** will open, displaying a searchable list of all published (LIVE) articles. Use the search bar to find a specific story, then click on the desired title to select it.

INSERTED PDF PREVIEW

- Once inserted, an **ALSO READ** block appears inside the content editor showing the linked story title. You can reposition the block using the up and down arrows, or remove it by clicking the red delete button.

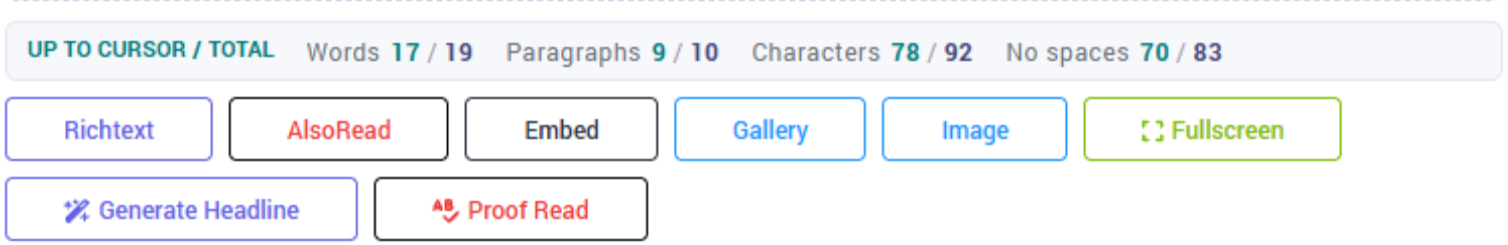

INSERT DIVIDER LINE

Click the **Divider line** option from the content editor's **insert menu** to add a horizontal separating line between sections of your article. Once inserted, a block labeled "Divider line" appears in the editor with a visual horizontal rule. On the published page, this renders as an HTML `<hr>` tag to create a clear content break.

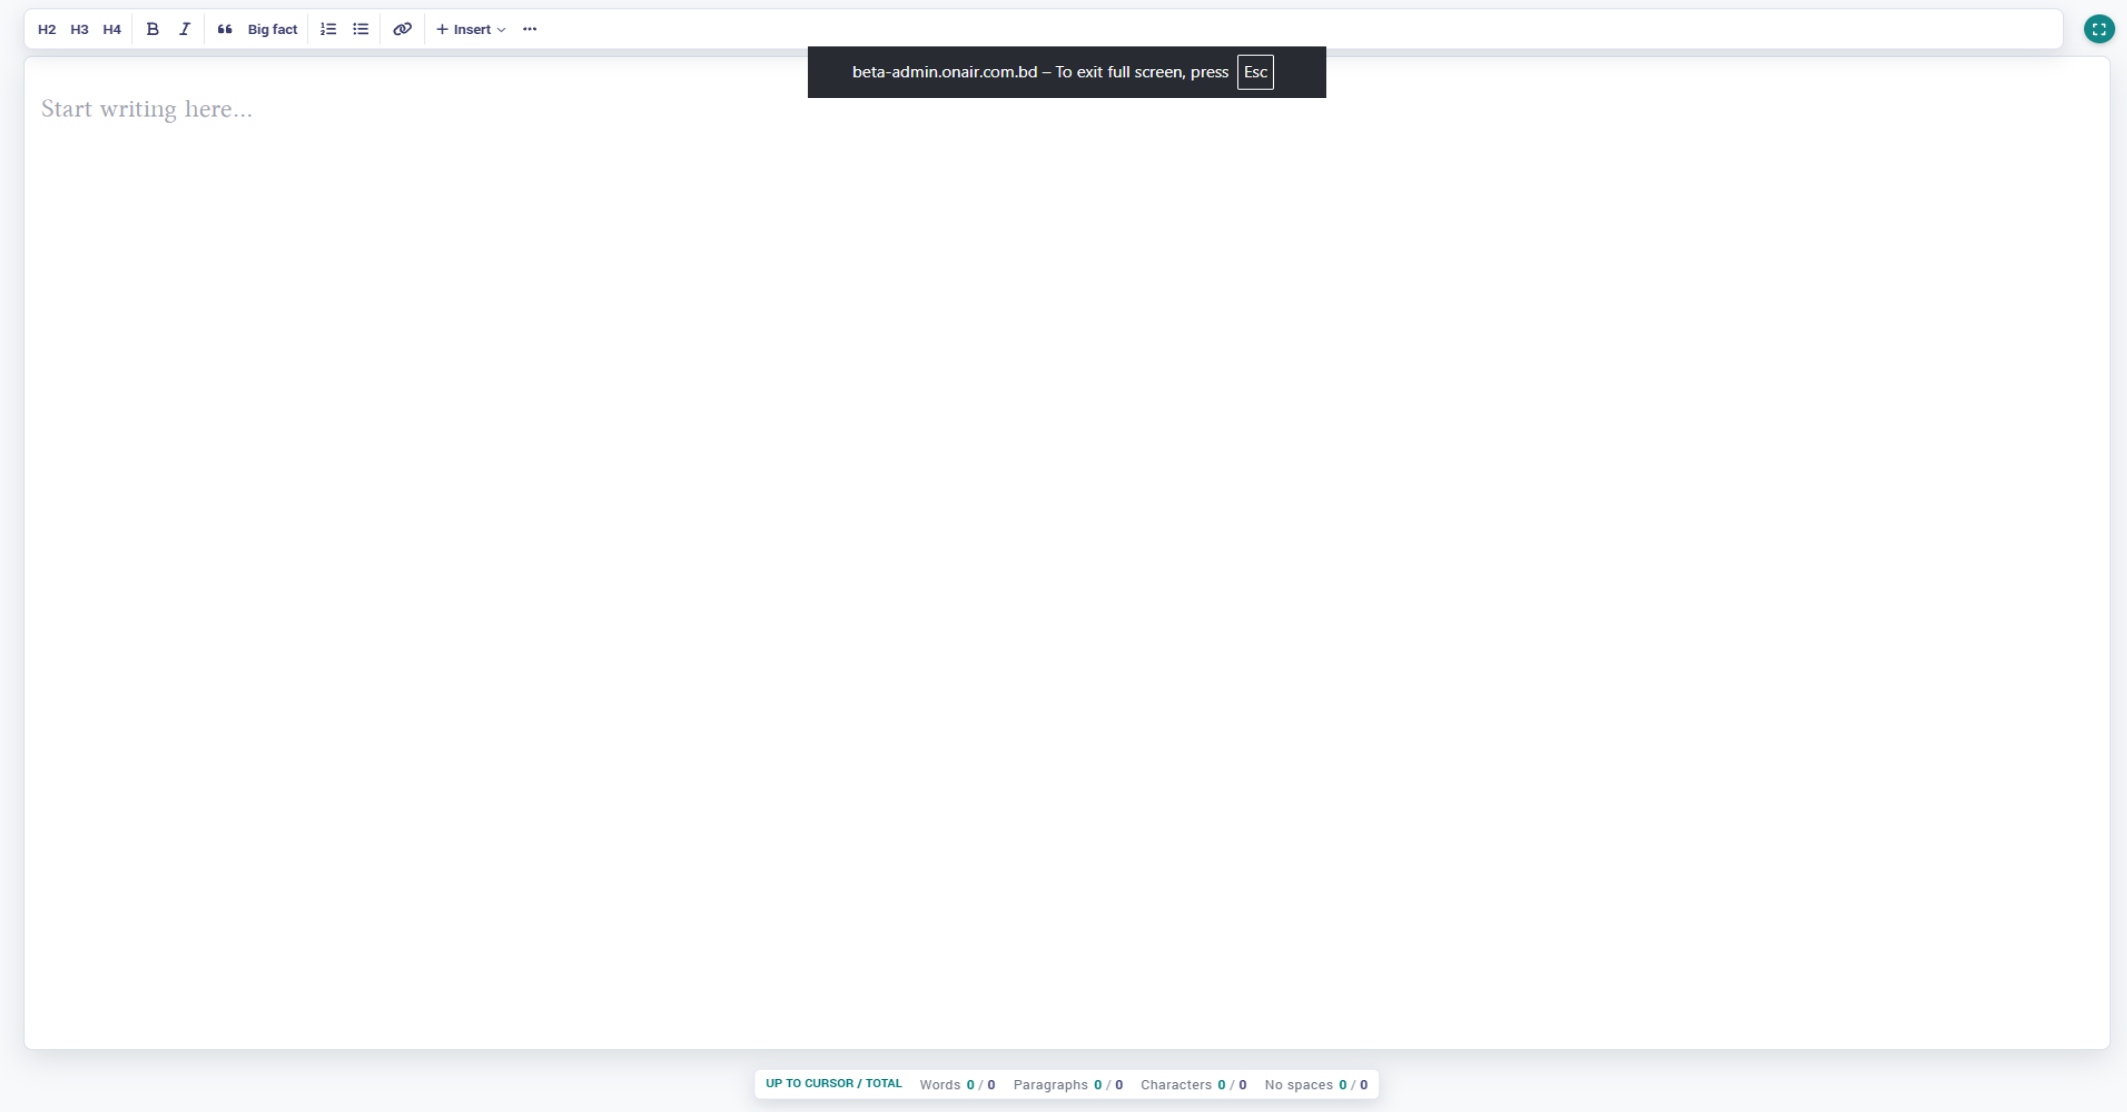

CONTENT BLOCK BUTTONS

- Below the main editor, these buttons let you quickly add special content blocks and access writing tools:
- **Richtext**: Opens an additional rich-text editor block to create a new content section within the article.
- **AlsoRead**: Inserts a related story recommendation block linking to another article.
- **Embed**: Adds a block for external content such as social media posts or iframe embeds.
- **Gallery**: Inserts an image gallery block to display multiple photos.
- **Image**: Adds a single image block into the article body.
- **Fullscreen**: Expands the editor to full-screen mode for distraction-free writing.
- **Generate Headline**: Automatically suggests or generates a headline based on the article content.
- **Proof Read**: Runs a proofreading check to review the article for errors or improvements.
- **Content Statistics**
- The bar above the buttons shows live stats comparing content up to the cursor versus the full article: **Words**, **Paragraphs**, **Characters**, and **Characters without spaces**.

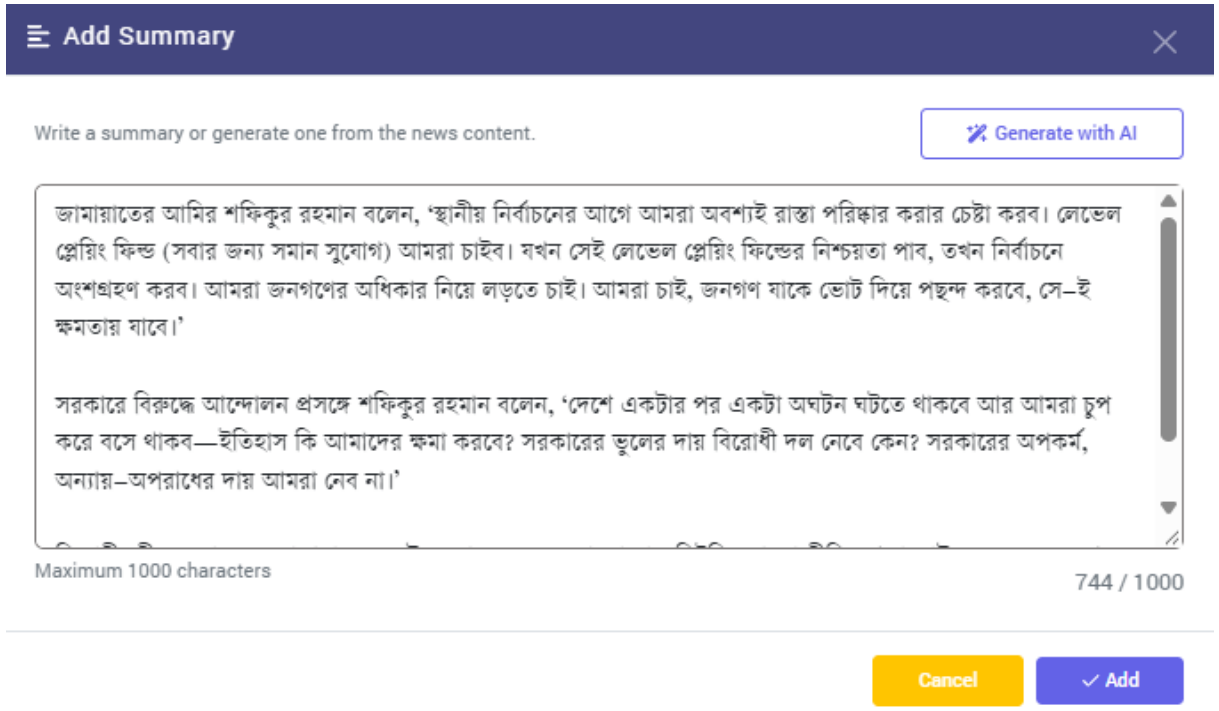

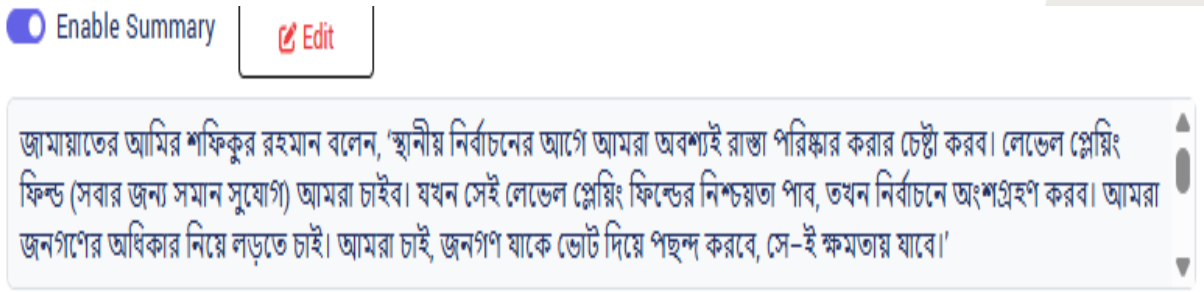

FULLSCREEN CONTENT BODY VIEW

ADD SUMMARY

- Toggle the **Enable Summary** switch to activate the article summary feature. When enabled, an **Add Summary** modal opens where you can write a brief overview of the article manually, or click **Generate with AI** to create one automatically from the news content. The summary is limited to **1000 characters**, with a live counter showing your current length. Click **Add** to save the summary, or **Cancel** to close without saving.
- Once added, the summary appears as a dedicated block within the article. You can click the **Edit** button next to the toggle at any time to modify the summary content.

CATEGORY, SUBCATEGORY & PIN TO CATEGORY PAGE

In the Add News form, you can assign a story to **multiple categories and subcategories**. Select the desired items from the dropdowns for each field. One category and one subcategory can be marked as **Primary** to set the main classification.

The **Pin in category page** section shows toggles for each selected category. Turn a toggle **on** to pin the story to the top of that category's public page as the lead story. The pinned item remains fixed in the lead position until you change or remove it.

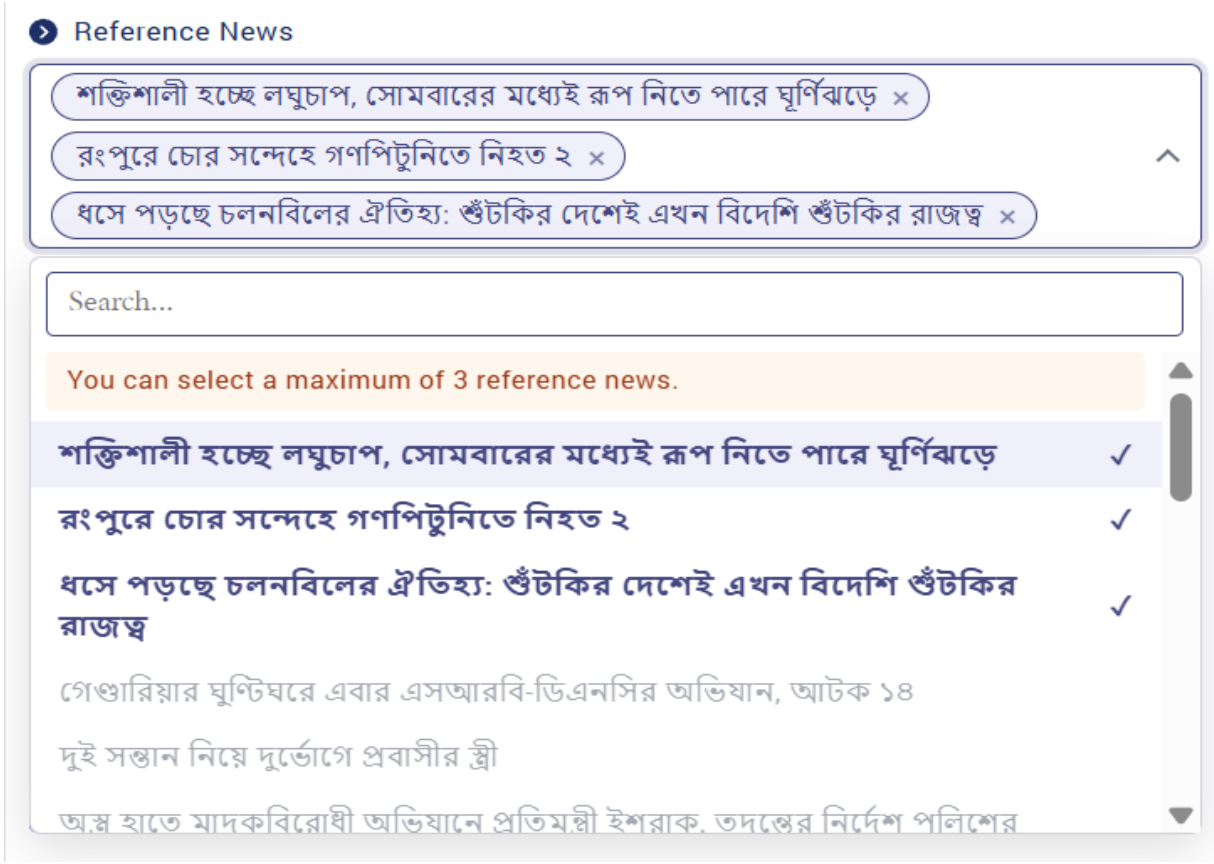

TAGS

- Assign one or more tags to the article using the multi-select dropdown. Selected tags appear as chips at the top of the field. Click the **X** on any chip to remove a tag. Use the **Search** field to quickly find and select tags from the existing list.

REFERENCE NEWS

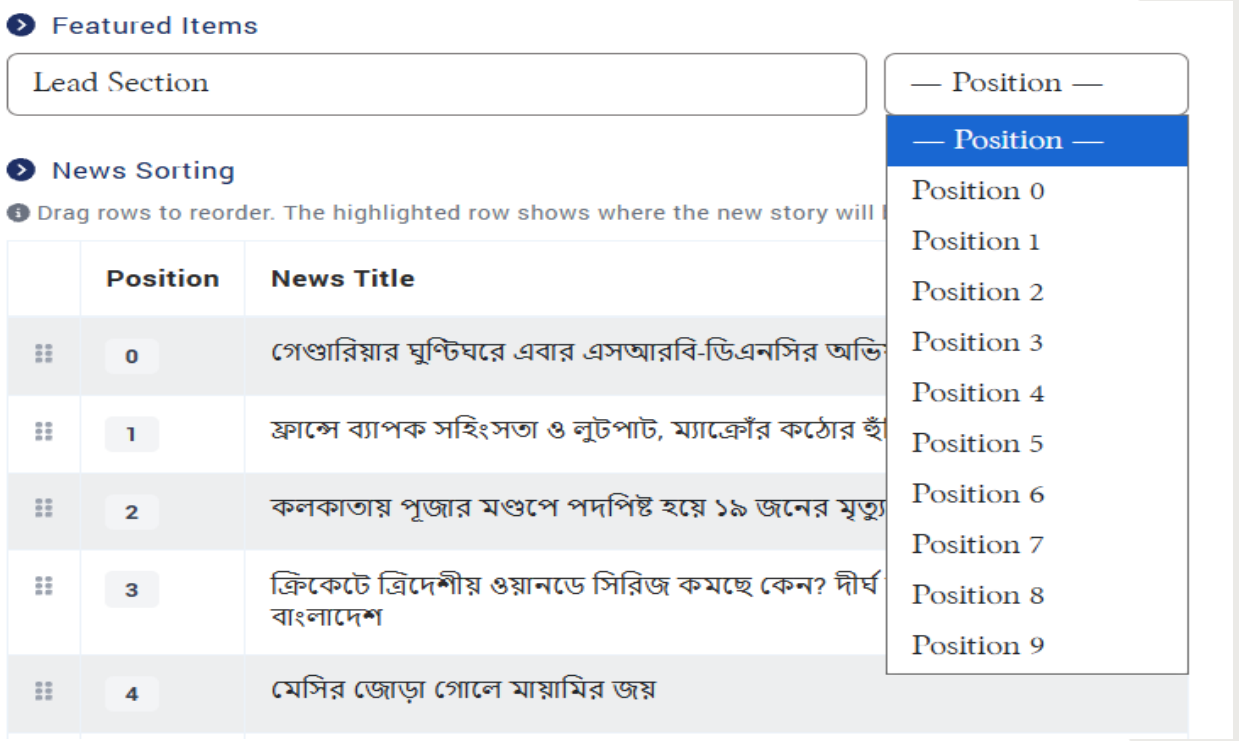

- Link up to 3 related news articles to the current story using the multi-select dropdown. Selected articles appear as chips at the top of the field; click the **X** to remove any selection. Use the **Search** field to quickly find articles from the list. A maximum of 3 reference news items can be selected.

FEATURED ITEMS

- Select a featured section where the story will be prominently displayed, such as **Lead Section**, **Second Lead**, **LiveFeatured**, or **FeaturedVideo**.
- After selecting a section, choose a **Position** (0 to 9) to set the story's placement order within that section. The **News Sorting** preview below shows the existing stories in the selected section and highlights exactly where the new story will be inserted. You can also drag rows using the handle icons to manually reorder stories within the list.

AFTER SELECT POSITION

Featured Items

Lead Section | Position 1

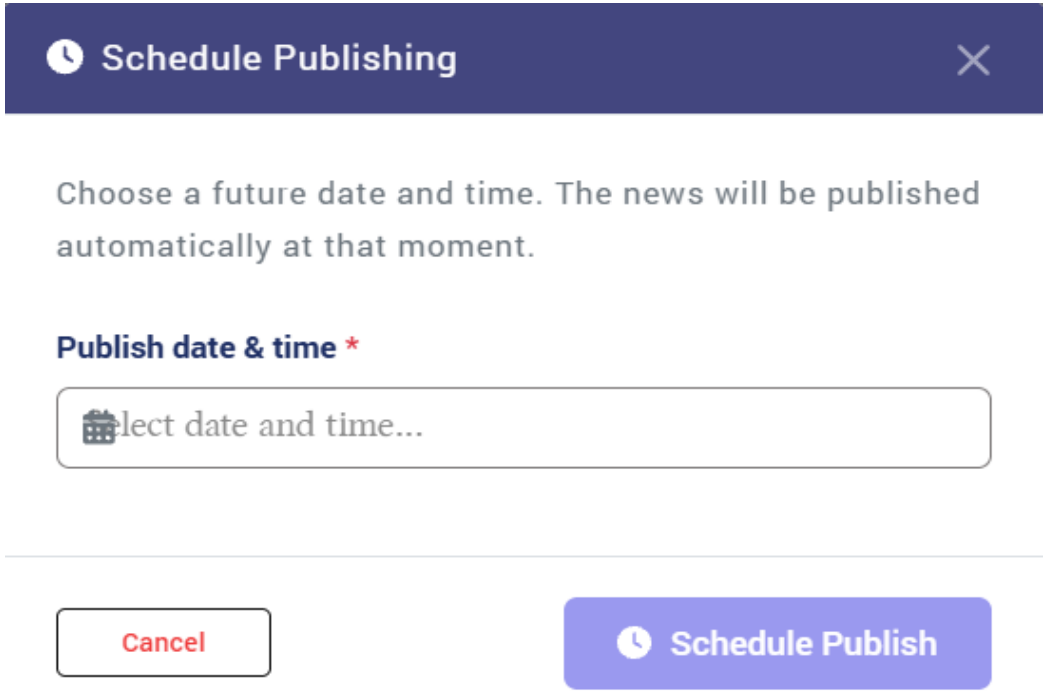

News Sorting

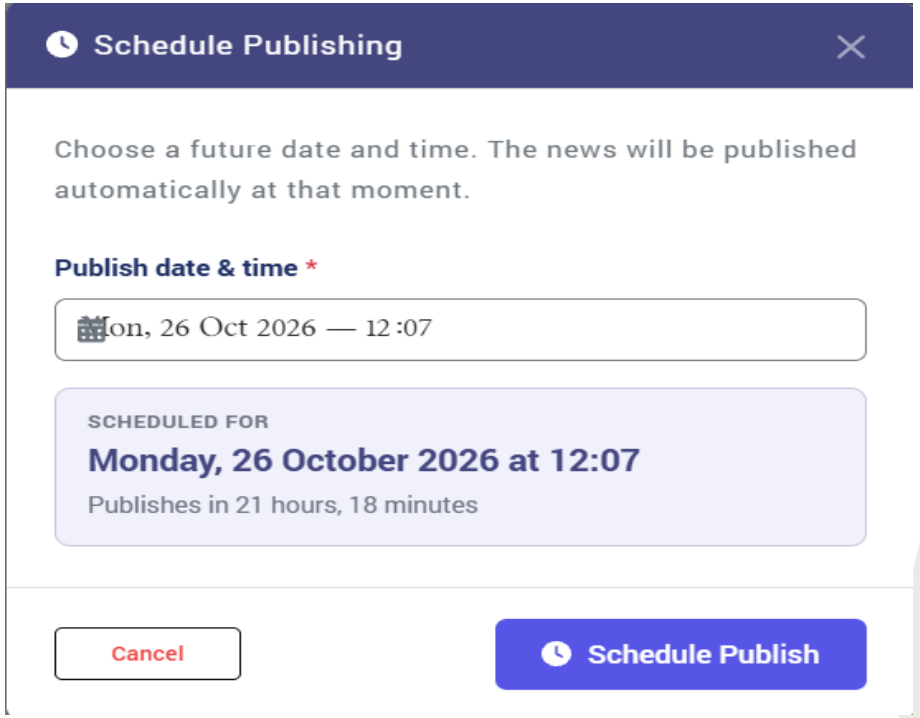

Drag rows to reorder. The highlighted row shows where the new story will be inserted.

	Position	News Title
⠿	0	গেণ্ডারিয়ার ঘুণ্টিঘরে এবার এসআরবি-ডিএনসির অভিযান, আটক ১৪
→	1	*New story will appear here*
⠿	2 ▼	ফ্রান্সে ব্যাপক সহিংসতা ও লুটপাট, ম্যাক্রোঁর কঠোর হুঁশিয়ারি
⠿	3 ▼	কলকাতায় পূজার মণ্ডপে পদপিষ্ট হয়ে ১৯ জনের মৃত্যু, আহত ২৫
⠿	4 ▼	ক্রিকেটে ত্রিদেশীয় ওয়ানডে সিরিজ কমছে কেন? দীর্ঘ বিরতির পর ফিরেছে বাংলাদেশ

SCHEDULE PUBLISHING

- Click the **Schedule** button at the bottom of the Add News form to set a future publication date and time. In the modal, click the **Publish date & time** field and select the desired date and time from the picker (required).
- Once a date and time are selected, a confirmation box appears showing the exact scheduled time (for example, "Monday, 26 October 2026 at 12:07") and a countdown (for example, "Publishes in 21 hours, 18 minutes"). Review the details, then click **Schedule Publish** to confirm. The article will be published automatically at the selected moment. Click **Cancel** to close the modal without scheduling.

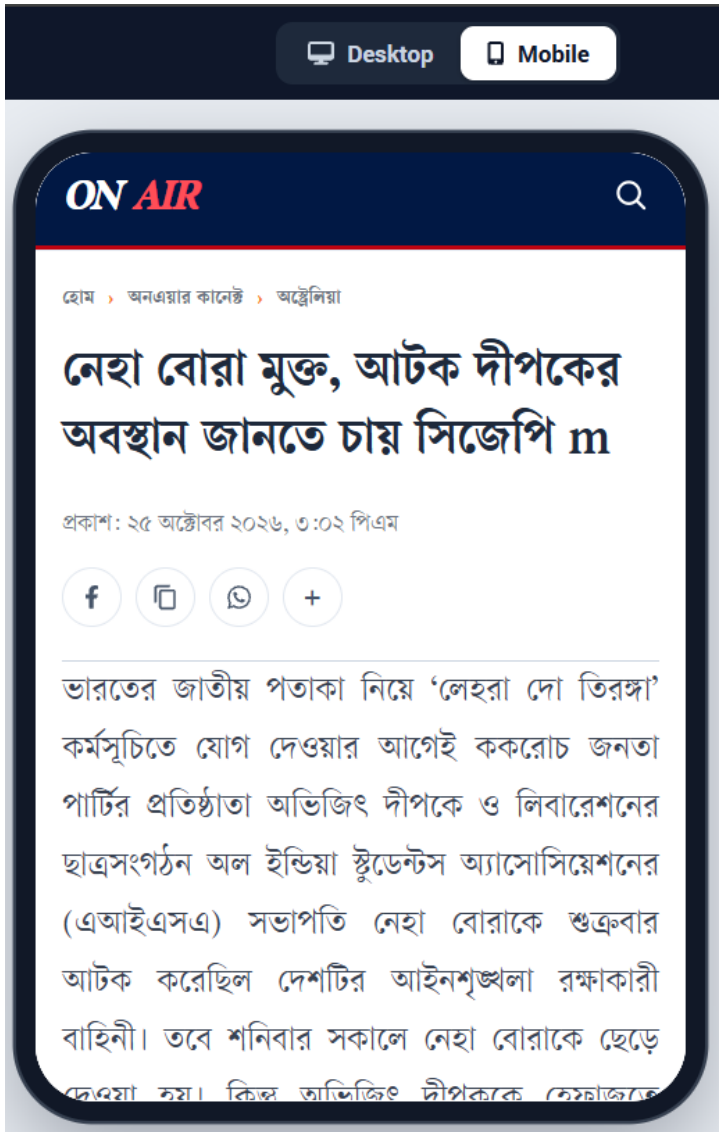

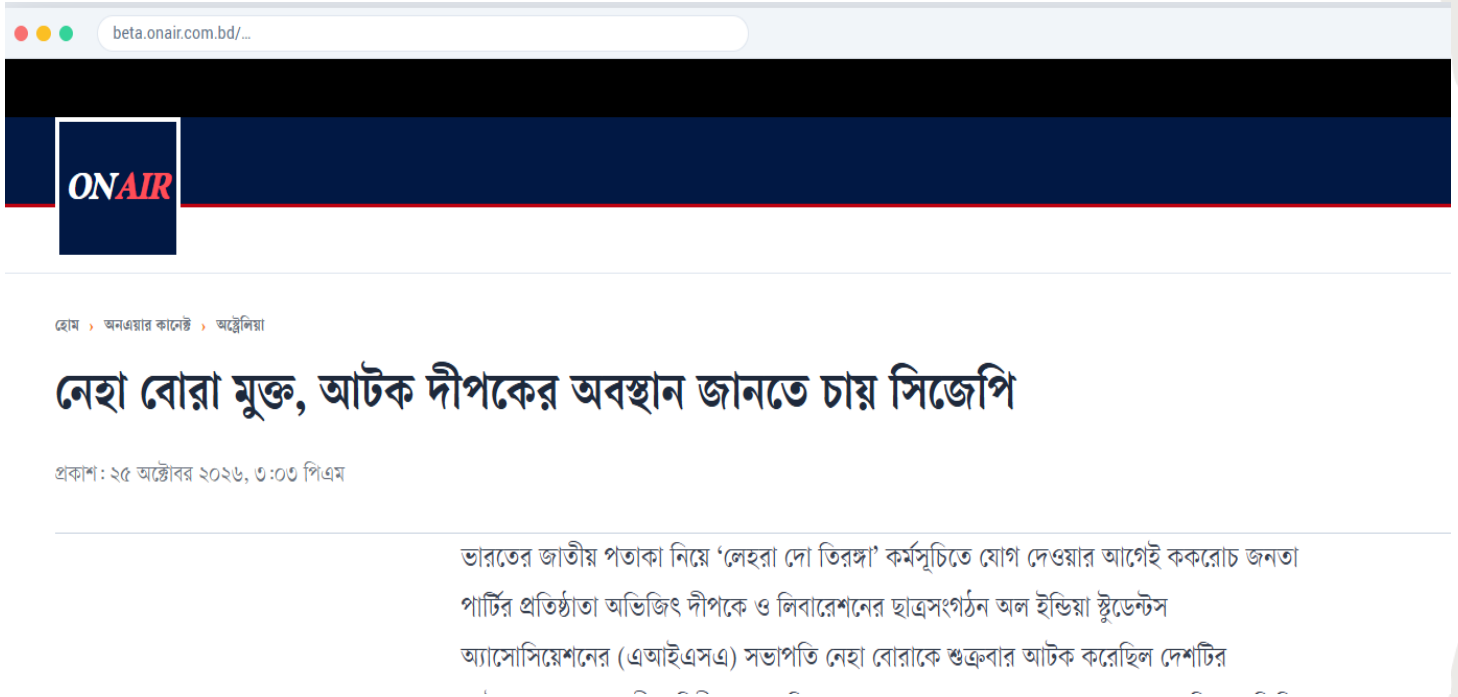

ACTION BUTTONS

- At the bottom of the Add News form, the action bar lets you finalize the article:
- **Mobile Preview**: Preview how the article will look on a mobile device.
- **Desktop Preview**: Preview how the article will appear on a desktop screen.
- **Publish**: Make the article live on the website immediately.
- **Save as Draft**: Save the article without publishing so you can edit it later.
- **Schedule**: Set a future date and time for the article to be published automatically.
- Article Preview
- Click the **Mobile** or **Desktop** preview button to open a live preview of the article before publishing. The preview shows exactly how the headline, content, and layout will appear to readers on the public website. Toggle between **Desktop** and **Mobile** views at the top of the preview screen to check responsiveness across devices.

ADD PHOTO NEWS FORM - 1

USE THIS FORM TO CREATE AND PUBLISH A PHOTO-BASED NEWS STORY.

- Story Details
- **Headline**: Enter the main headline for the photo news story (required).
- **Sub Heading**: Add an optional subheading.
- **Alternative Headline**: Provide an alternate headline if needed.
- **Highlight**: Mark the story as a highlight if applicable.
- Photo Content & Gallery
- **Photo Content**: Write the main narrative or description using the rich-text editor. Use the toolbar to format text, add headings, lists, links, and other media.
- **Photo Blocks**: Build your photo story by uploading images one by one. Each block (for example, **Photo 1**) includes a **Choose Image** button, a **Caption** field to describe the image, and arrow/trash buttons to reorder or remove that photo. Click the green **+ Add More** button to add additional photo blocks and create a multi-image gallery story.
- Content & Excerpt
- **Content**: Use this additional rich-text area to add supplementary descriptions or text content for the story.
- **Excerpt**: Write a short summary to display on the homepage (maximum 300 words)
- **Uploaded By**: Enter the name or credit of the person who uploaded the content.

Author & Classification (Right Panel)

- **Author**: Select the author(s), up to 3 (required).
- **Author Location**: Enter the author's location if applicable.
- **Initial**: Select an initial identifier from the dropdown.
- **Tags**: Assign relevant tags to the story.
- **Display Title**: Enter a short title for display purposes (maximum 100 characters).
- **Pin in category page**: Toggle on to pin this story to the top of its category page. The latest pinned story appears at the top.

Media & SEO

- **News Image**: Upload the main featured image for the photo news story (required).
- **Meta Title**: Enter the SEO page title (maximum 255 characters).
- **Meta Description**: Write the descriptive text shown underneath the headline in search engine results.
- **Meta Keyword**: Add keywords for search engine optimization (maximum 500 characters).

Publishing Options (Bottom Bar)

- **Mobile Preview**: Preview how the photo story will appear on mobile devices.
- **Desktop Preview**: Preview how it will appear on desktop screens.
- **Publish**: Make the photo news story live on the website immediately.

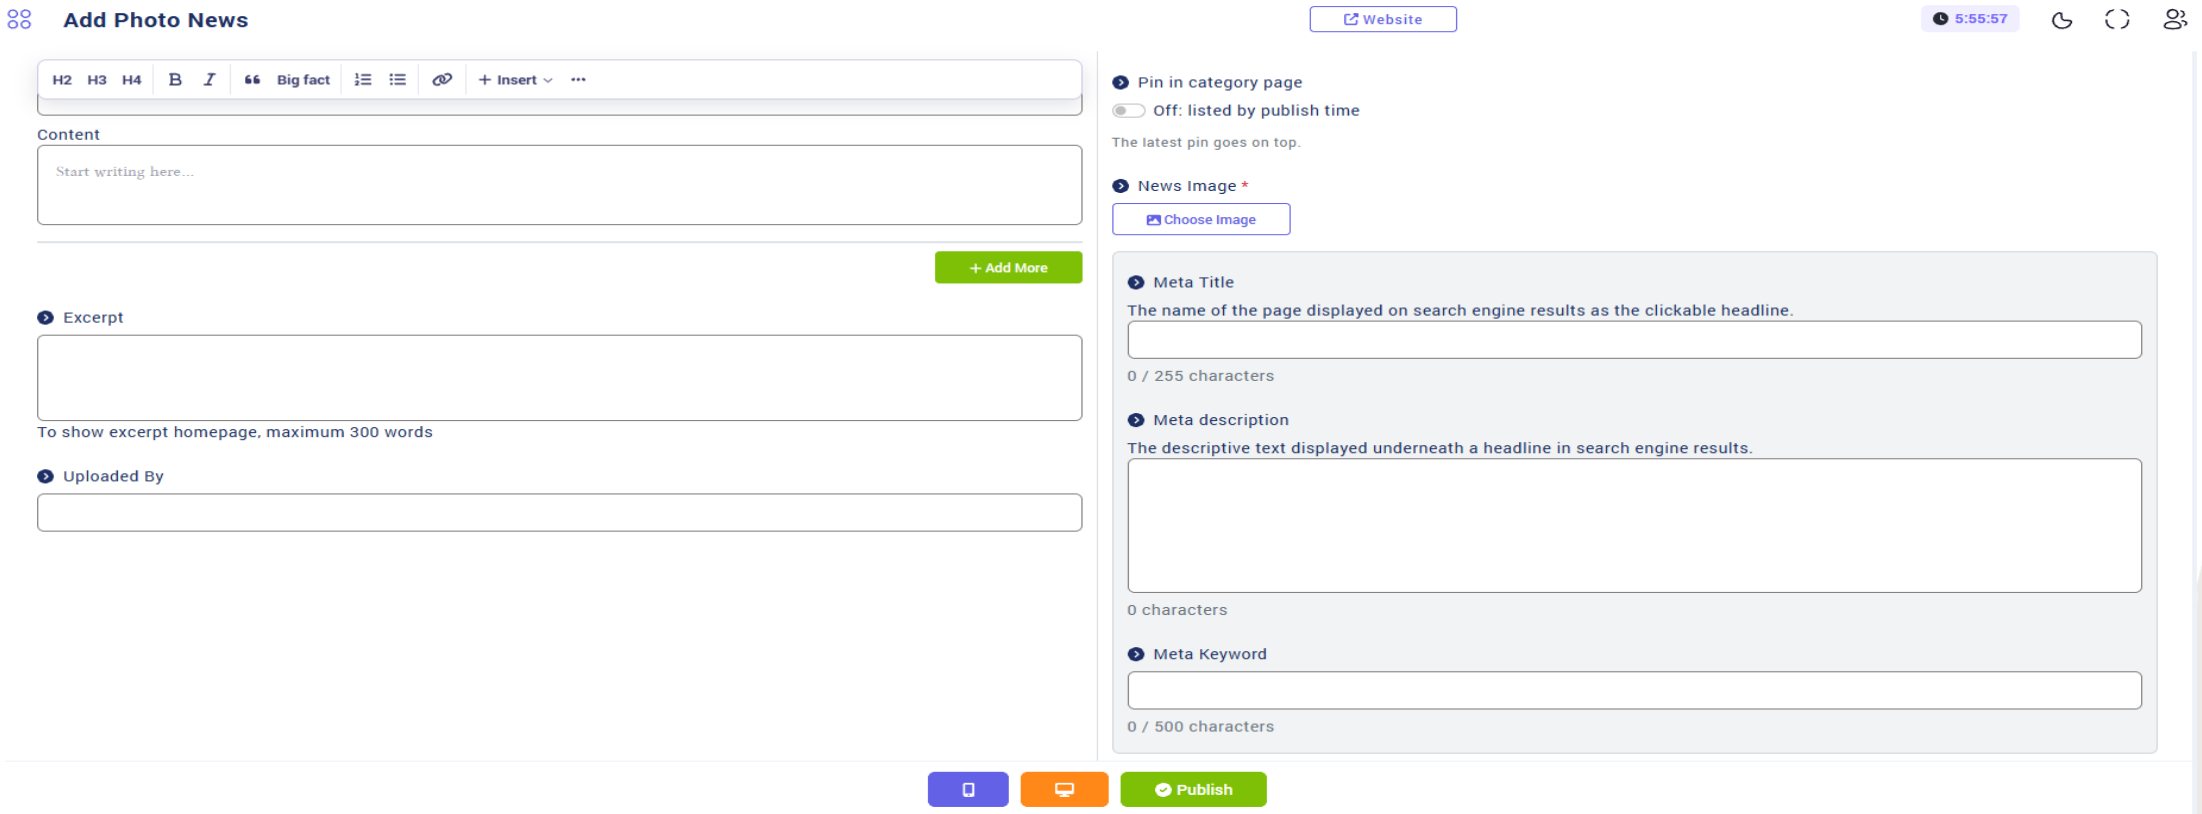

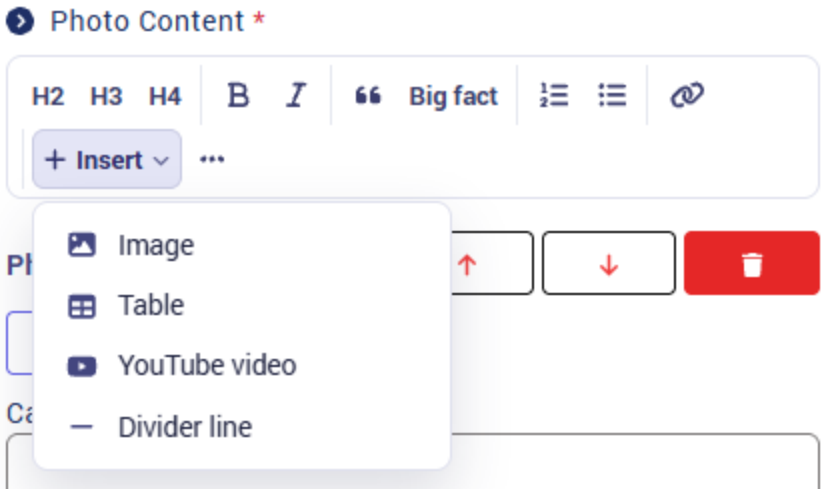

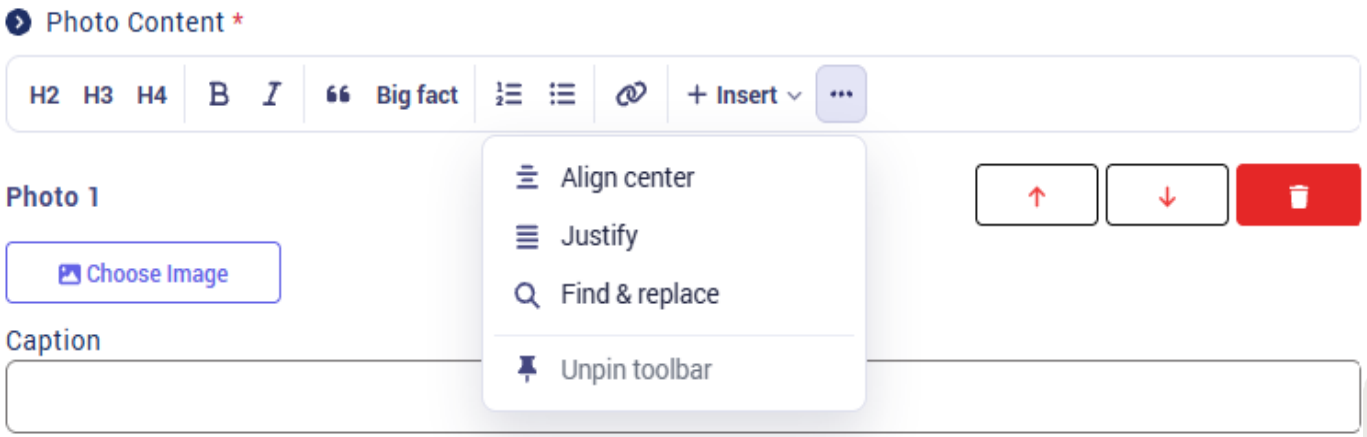

PHOTO CONTENT / CONTENT RICH-TEXT EDITOR – HTML TAGS & FEATURES

- Insert Menu (+ Insert)
- Click the **+ Insert** dropdown to add special content blocks within the photo story:
- **Image**: Insert a single image into the content area.
- **Table**: Add a data table by specifying rows and columns.
- **YouTube video**: Embed a YouTube video by pasting the video URL.
- **Divider line**: Insert a horizontal line (`<hr>`) to separate content sections.
- Insert Link
- Click the link icon in the toolbar to create hyperlinks. Choose between:
- **Internal link**: Search and link to another page within your website.
- **External link**: Paste an external URL and set the link text.
- Click **Insert Link** to add the hyperlink to the content.
- More Options (Three Dots)
- Click the three-dots menu for additional formatting tools:
- **Align center**: Center-align the current text block.
- **Justify**: Evenly space text across the line width.
- **Find & replace**: Search for specific text and replace it throughout the content.
- **Unpin toolbar**: Allow the toolbar to scroll with the page instead of remaining fixed at the top.

- Standard Formatting
- Use the toolbar buttons for everyday text styling:
- **H2, H3, H4**: Apply heading levels to structure the content.
- **B (Bold)**: Make text bold using `<strong>`.
- **I (Italic)**: Italicize text using `<em>`.
- **Big fact**: Highlight key facts or statistics in a styled block.
- **Numbered list / Bulleted list**: Create ordered (`<ol>`) or unordered (`<ul>`) lists.

- Note: This all functionalities same as Add News form content Editor.

ADD VIDEO NEWS FORM

- USE THIS FORM TO CREATE AND PUBLISH A VIDEO-BASED NEWS STORY
  Story Details
- **Headline**: Enter the main headline for the video news story (required).
- **Sub Heading**: Add an optional subheading.
- **Content**: Write the article body or video description using the rich-text editor. Use the toolbar to format text, add headings, lists, links, and insert media.
- **Excerpt**: Write a short summary to display on the homepage (maximum 300 words).
- **Uploaded By**: Enter the name or credit of the person who uploaded the content.
- **Alternative Title**: Provide an alternate title if needed.
- **Author & Classification (Right Panel)**
- **Author**: Select the author(s), up to 3 (required).
- **Author Location**: Enter the author's location if applicable.
- **Initial**: Select an initial identifier from the dropdown.
- **Category**: Choose the main category for the story.
- **SubCategory**: Select a subcategory based on the chosen category.

- **Pin in category page**: Toggle on to pin this story to the top of its category page. The latest pinned story appears first; when off, stories are listed by publish time.
- **Tags**: Assign relevant tags to the story.

Display & Media

- **Display Title**: Enter a short title for display purposes (maximum 100 characters).
- **News Image**: Upload a featured thumbnail image for the video news story (required).

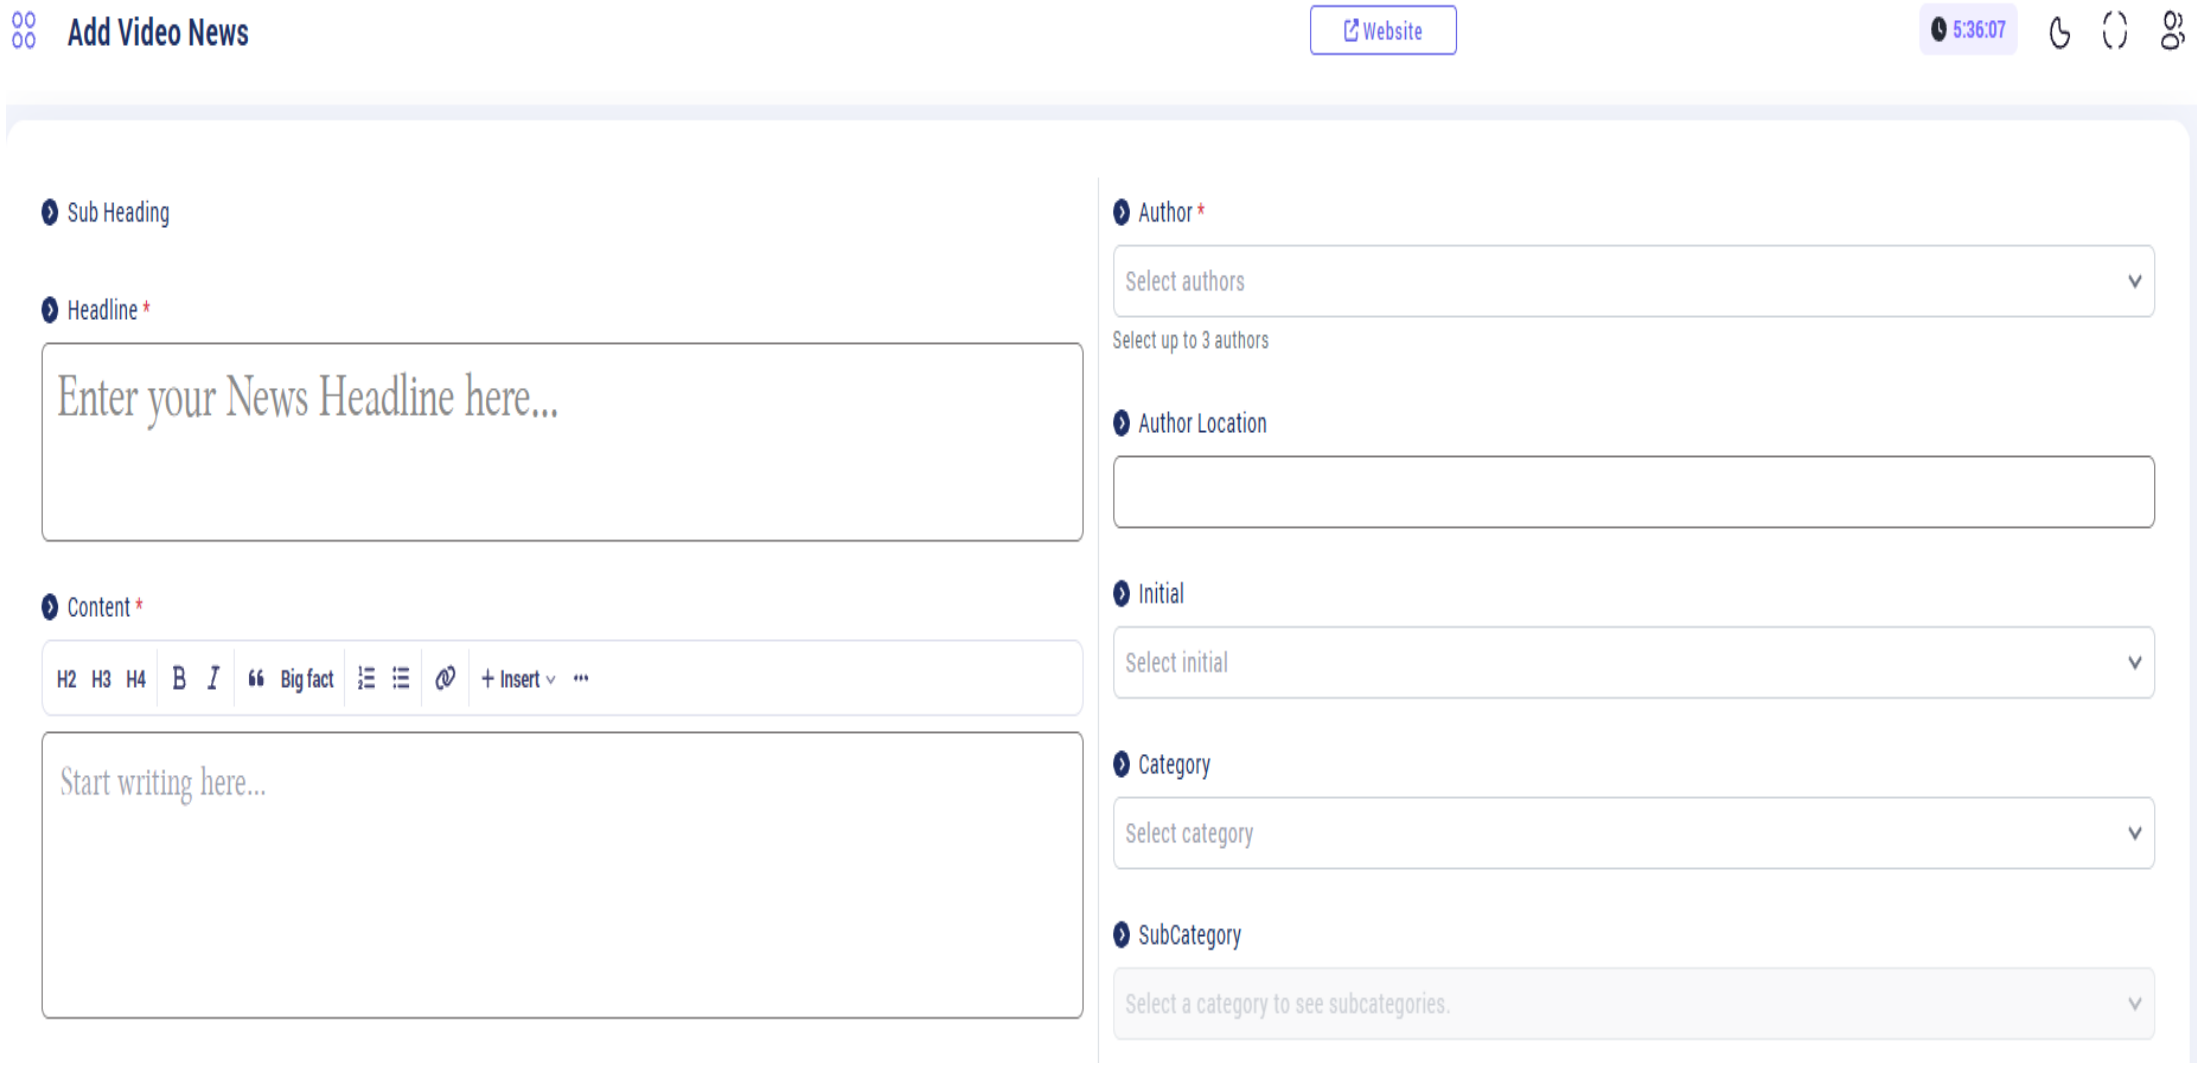

SEO Settings

- **Meta Title**: Enter the SEO page title (maximum 255 characters).
- **Meta Description**: Write the descriptive text shown underneath the headline in search engine results.
- **Meta Keyword**: Add keywords for search engine optimization (maximum 500 characters).

Publishing Options (Bottom Bar)

- **Mobile Preview**: Preview how the video story will appear on mobile devices.
- **Desktop Preview**: Preview how it will appear on desktop screens.
- **Publish**: Make the video news story live immediately.
- **Save as Draft**: Save the story without publishing so you can edit it later.

- **Meta Title**: Enter the SEO page title (maximum 255 characters).
- **Meta Description**: Write the descriptive text shown in search engine results.
- **Meta Keyword**: Add keywords for search engine optimization (maximum 500 characters).

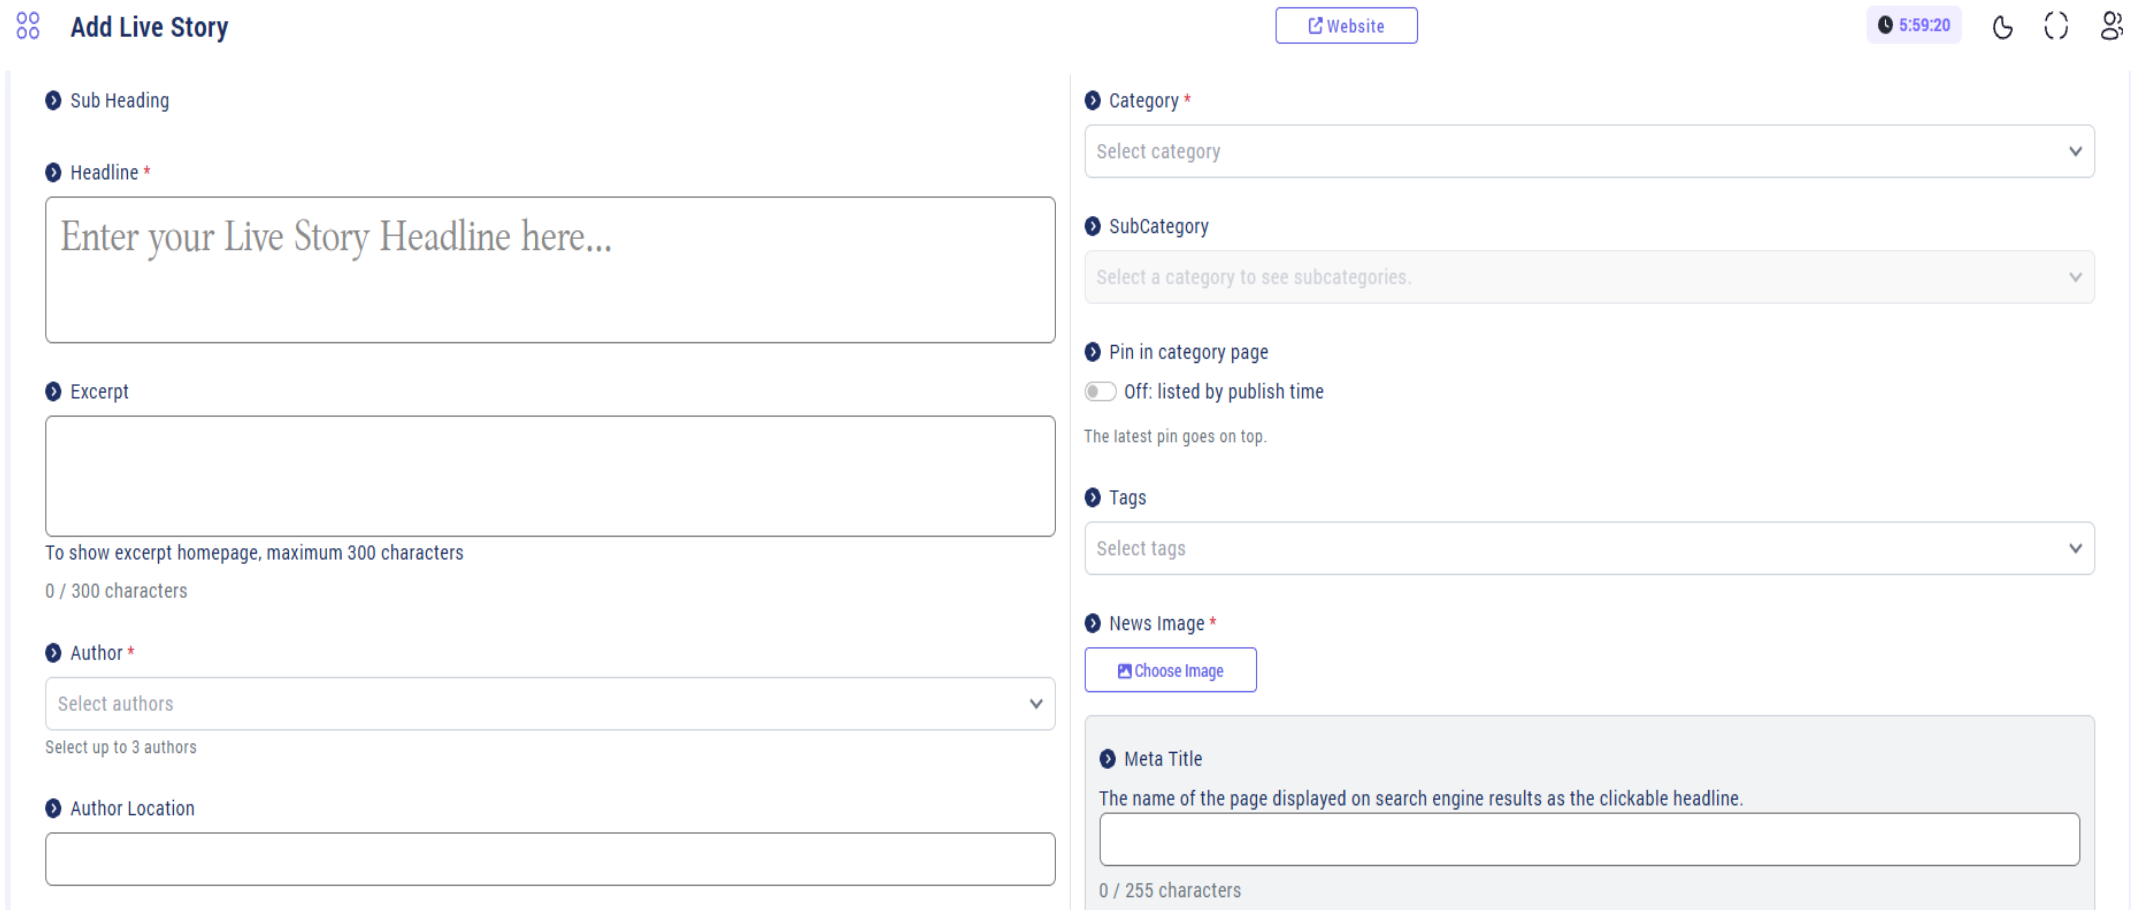

LIVE NEWS CONTENT

- Click the **Add live news content** button to create a new live update section. Each click generates a new numbered block (for example, **Live Content #1**, **Live Content #2**, and so on), allowing you to post multiple sequential updates within the same live story.
- Each live content block includes:
- **Pinned**: Check this to keep the update fixed at the top of the live feed.
- **Breaking**: Check this to mark the update as breaking news.
- **Delete**: Remove the specific update block.
- **Sub Heading (optional)**: Add a subheading for the update.
- **Title**: Enter the title of the live update.
- **Image (optional)**: Upload an image specific to this update.
- **Content**: Write the update details using the rich-text editor.
- Live Content Editor
- The rich-text editor toolbar provides:
- **H2, H3, H4**: Apply heading levels.
- **B / I**: Bold and italic formatting.

- **Quote / Big fact**: Insert styled quote or highlighted fact blocks.
- **List buttons**: Create numbered or bulleted lists.
- **Link**: Insert internal or external hyperlinks.
- **+ Insert**: Add images, tables, YouTube videos, or divider lines.
- **Three dots**: Access align center, justify, find & replace, and unpin toolbar options.
- A live statistics bar below the editor shows word, paragraph, character, and space counts.
- Content Block Buttons
- Under each live content editor, quick-insert buttons let you add:
- **Richtext**: Add another rich-text content block.
- **AlsoRead**: Insert a related story reference.
- **Embed**: Add an external embed code block.
- **Gallery**: Insert a multi-image gallery.
- **Image**: Add a single image block.
- Publishing Options
- **Mobile Preview / Desktop Preview**: Review how the live story appears on different devices.
- **Publish**: Make the live story active on the website immediately.
- **Save as Draft**: Save the story without publishing to continue editing later.

ADD WEB STORY FORM

USE THIS FORM TO CREATE A VISUAL, SLIDE-STYLE WEB STORY.

- Story Details
- **Headline**: Enter the main headline for the web story (required).
- **Sub Heading**: Add an optional subheading.
- **Alternative Headline**: Provide an alternate headline if needed.
- **Highlight**: Mark the story as a highlight if applicable.
- Web Story Content Blocks
- Build the story by adding sequential visual slides. Each block (for example, **Content 1**) contains:
- **Choose Image**: Upload or select the background image for that slide.
- **Title**: Enter a short title for the slide (maximum 100 characters).
- **Caption**: Add a description or narrative text for the slide (maximum 500 characters).
- **Reorder / Delete**: Use the arrow buttons to move the slide up or down in the sequence, or the red delete button to remove it.
- Click the green **+ Add More** button to add additional slides and build out the full web story sequence.

- Excerpt
- Write a short summary for the homepage (maximum 300 characters). If left empty, the system automatically uses the first slide's caption as the excerpt.
- Author & Classification (Right Panel)
- **Author**: Select the author(s), up to 3 (required).
- **Author Location**: Enter the author's location if applicable.
- **Initial**: Select an initial identifier from the dropdown.
- **Tags**: Assign relevant tags to the story.
- **Pin in category page**: Toggle on to pin the story to the top of its category page. The latest pinned story appears first.
- **News Image**: Upload the main featured thumbnail image for the web story (required).
- SEO Settings
- **Meta Title**: Enter the SEO page title (maximum 255 characters).
- **Meta Description**: Write the descriptive text shown underneath the headline in search engine results.
- **Meta Keyword**: Add keywords for search engine optimization (maximum 500 characters).

- **Publishing Options (Bottom Bar)**
- **Mobile Preview**: Preview how the web story will appear on mobile devices.
- **Desktop Preview**: Preview how it will appear on desktop screens.
- **Publish**: Make the web story live immediately.
- **Save as Draft**: Save the story without publishing to continue editing later.
- **Schedule**: Set a future date and time for the web story to be published automatically.

ALL STORIES LIST PAGE - VIEW

ALL STORIES LIST PAGE

- This page displays a centralized list of all content created in the CMS, including standard news articles, video stories, photo stories, web stories, and live news updates.
- Top Controls
- **Add Story**: Click the dropdown button to quickly create a new story. Choose from the available story types to jump directly to the relevant creation form.
- **Search stories**: Use the search bar to find specific stories by typing keywords from the title or content.
- **Drafts**: Click the **Drafts** button to filter and view only unpublished stories saved as drafts.
- **Filters / View Options**: Use the filter and layout icons to refine the list by criteria such as story type, status, or author, and switch between list or grid views.
- **Pagination**: The top of the list shows the current range (for example, "Showing 1–25 of 171"). Use the **Per page** dropdown to change how many stories display at once (for example, 25, 50, or 100).

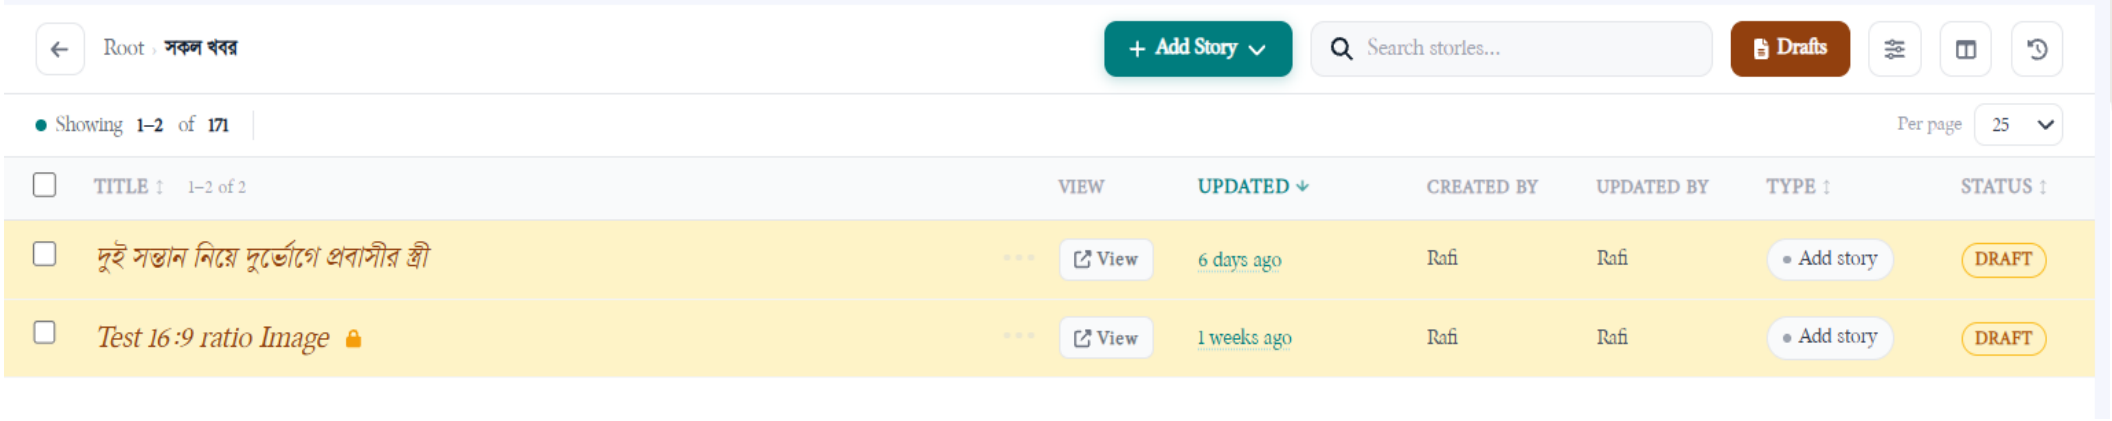

- ## Story List Table
- Each row in the table represents one story with the following columns:
- **Checkbox**: Select one or multiple stories to perform bulk actions.
- **Title**: The headline of the story. Click the title to open the story in **Edit** mode.
- **View**: Click the **View** link (external link icon) to open and see how the story appears on the live public website.
- **Updated**: Shows when the story was last modified (for example, "23 hr ago" or "6 days ago").
- **Created By**: Displays the name of the user who originally created the story.
- **Updated By**: Displays the name of the user who last edited the story.
- **Type**: Indicates the story format, such as "Add story" (standard news), "Video story", "Photo story", or "Web story".
- **Status**: Shows the current publication state. **LIVE** means the story is published and visible on the website. **DRAFT** means the story is unpublished and only visible in the admin panel.
- ## Row Actions
- **Three-dot menu**: Click the menu icon on any row to access additional options:

  History: View the edit history and activity log for that story.

  Preview: Open the story in the editor (edit page) to review or modify it before publishing.

- Bulk Actions
- Select one or more stories using the checkboxes on the left. When items are selected, a floating action bar appears at the bottom showing how many are selected (for example, "2 selected"). From this bar you can:
- **Publish**: Publish all selected draft stories at once, making them live.
- **Unpublish**: Unpublish all selected live stories. Unpublished stories are moved to the **Drafts** list and are no longer visible on the public site.
- **Cancel**: Clear the current selection without performing any action.
- Status Indicators
- Stories marked **LIVE** are actively displayed on the website.
- Stories marked **DRAFT** are saved but not yet published. Any story you unpublish will automatically return to the Drafts list.

DRAFT LIST VISUAL VIEW

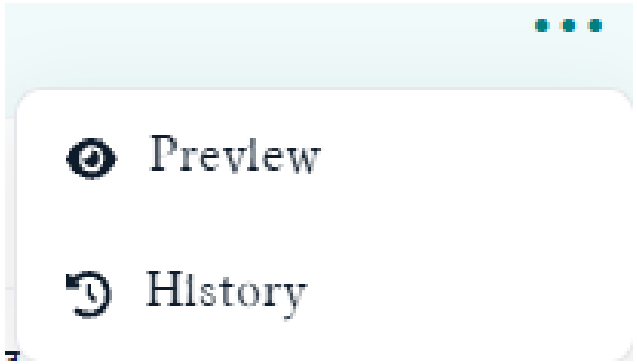

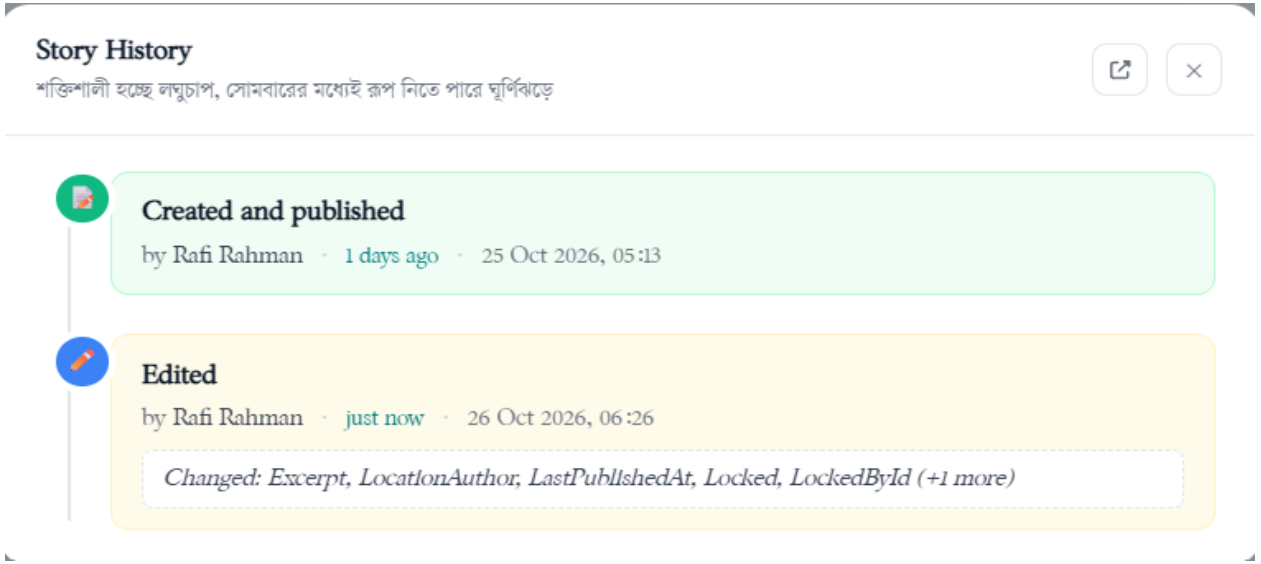

STORY SEARCH RESULT

STORY HISTORY

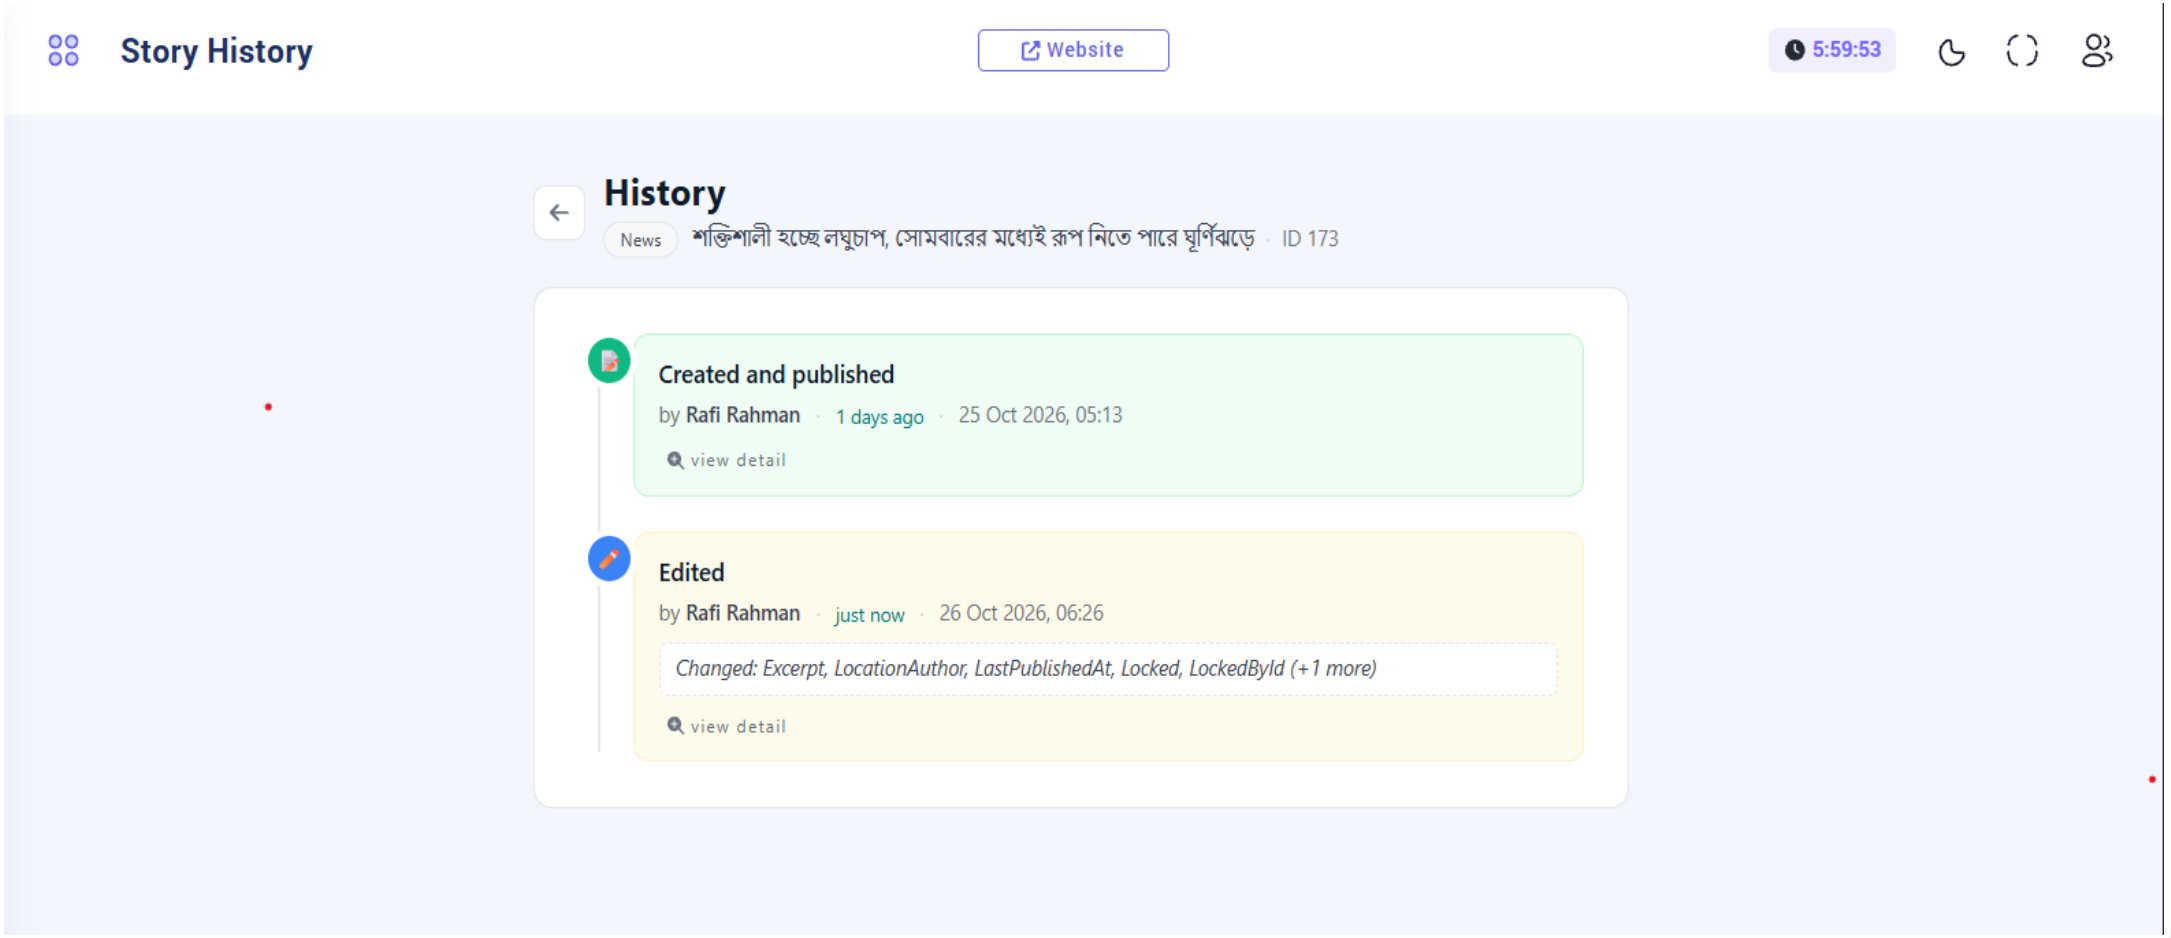

- Access the history of any story by clicking the three-dot menu on the story list and selecting **History**. This opens a timeline showing every major action taken on that article.
- History Modal
- The modal displays the story's activity log as a chronological timeline:
- **Created and published**: Shows the user who originally created and published the story, along with the date and time (for example, "by Rafi Rahman, 1 days ago, 25 Oct 2026, 05:13").
- **Edited**: Shows each subsequent edit, including the user who made the change, when it occurred, and a summary of which fields were modified (for example, "Changed: Excerpt, LocationAuthor, LastPublishedAt, Locked, LockedById (+1 more)").
- Each history entry includes a **view detail** link to see the full specifics of that change.

FULL HISTORY PAGE

- Clicking the story **title hyperlink from the modal** (or navigating directly) opens the dedicated **Story History** page. This page provides the same chronological timeline in a full-screen layout, displaying the story title, story type (for example, "News"), story ID, and a complete log of all creation and edit events with timestamps and changed field details. Use the back arrow to return to the stories list.

update Success on news #173

শক্তিশালী হচ্ছে লঘুচাপ, সোমবারের মধ্যেই রূপ নিতে পারে ঘূর্ণিঝড়ে

Rafi Rahman (#2)
26 Oct 2026, 06:26:31 · 103.117.193.10 · 599ms

Action Kind: update | Was Published: Yes | Is Now Published: Yes

Field Changes (6)

Plain Text | Rich Preview | Raw

Field	Old Value	New Value
Excerpt Excerpt		
Last Published At LastPublishedAt	25/10/2026 05:13:45 +00:00	26/10/2026 06:26:31 +00:00
Author Location LocationAuthor		ঢাকা
Locked Locked	True	False
Locked At LockedAt	26/10/2026 06:26:18 +00:00	
Locked By LockedById	2	

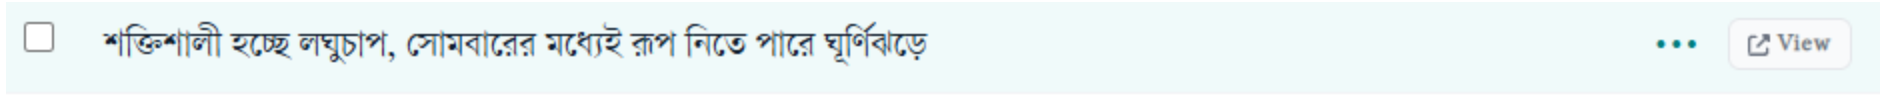

AUDIT DETAIL PAGE

- Click **view detail** from any entry in the Story History timeline(**bottom of every log**) to open the full audit log for that specific change. This page provides a complete breakdown of exactly what was modified in a single edit.
- Audit Header
- **Audit ID**: Displays the unique audit number (for example, "Audit Detail #576").
- **Action & Status**: Shows the action type (for example, "update") and whether it was successful.
- **Story Reference**: Indicates which story was affected (for example, "on news #173") along with the story headline.
- **User & Timestamp**: Displays the user who made the change (for example, "Rafi Rahman"), the exact date and time, IP address, and how long the action took to process.
- **Publication State**: Badges show whether the story was published before the change ("Was Published") and after the change ("Is Now Published").
- Field Changes Table
- The main section lists every field that was modified in this edit. The table has three columns:
- **Field**: The name of the modified field (for example, Excerpt, Last Published At, Author Location, Locked, Locked At, Locked By).

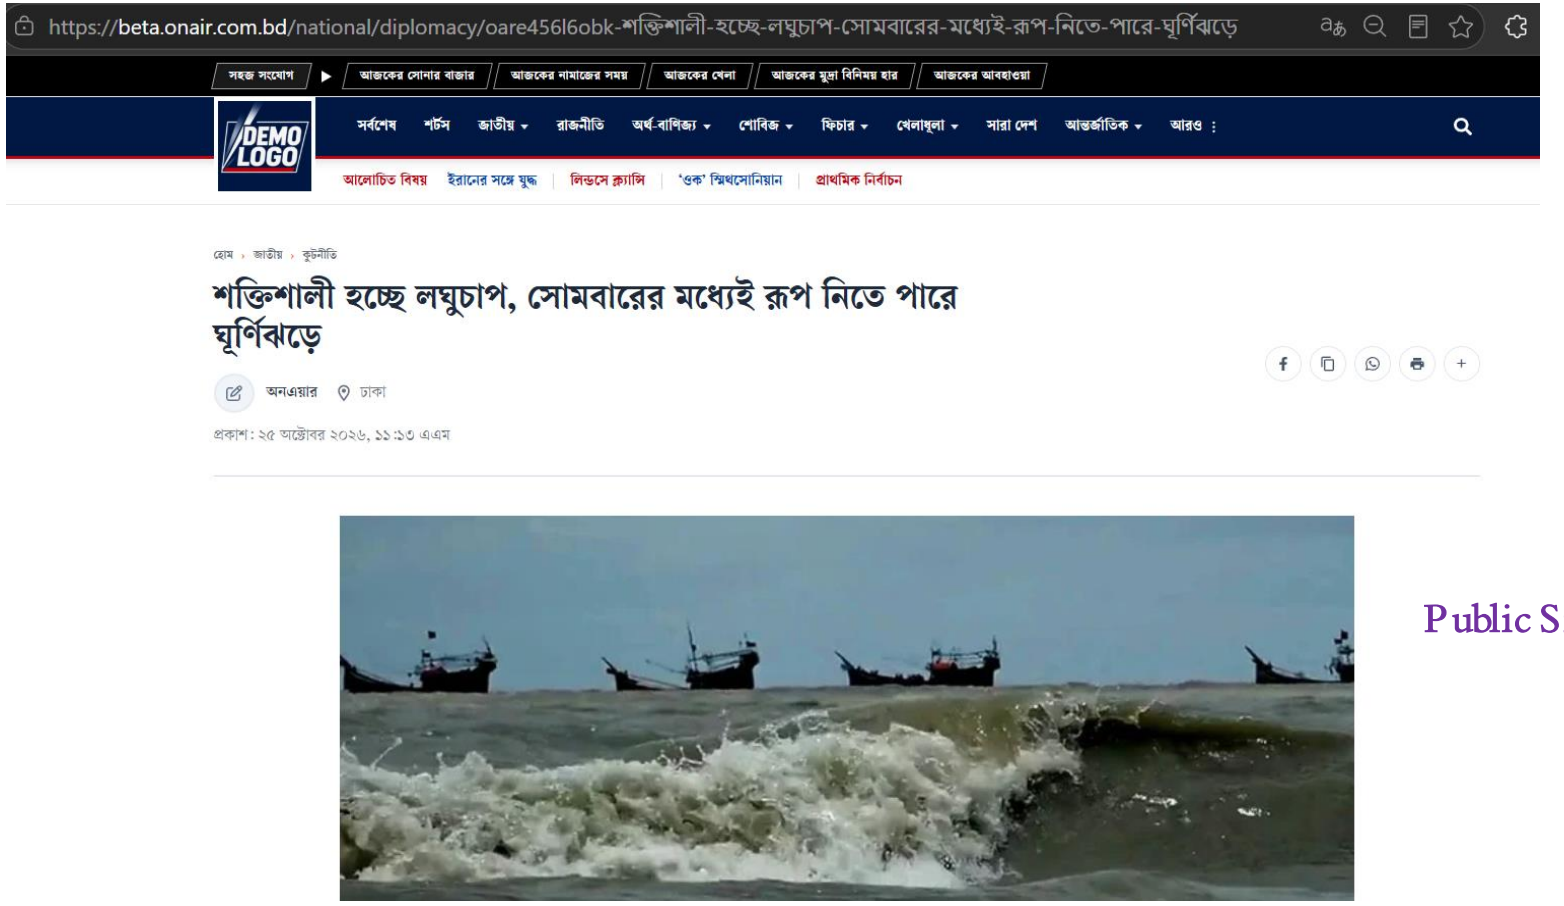

- **Old Value**: The previous value before the edit. If a field was empty or unchanged, this may be blank.
- **New Value**: The updated value after the edit.
- In the example shown, you can see:
- The **Last Published At** timestamp was updated from "25/10/2026 05:13:45" to "26/10/2026 06:26:31".
- The **Author Location** was changed to "ঢাকা".
- The **Locked** status changed from "True" to "False".
- The **Locked At** and **Locked By** fields were cleared.
- View Modes
- At the top-right of the changes table, three tabs let you switch how the data is displayed:
- **Plain Text**: Shows values in simple readable text.
- **Rich Preview**: Renders formatted or styled content where applicable.
- **Raw**: Displays the raw data values as stored in the system.

VIEW STORY ON PUBLIC SITE

- From the **All Stories** list, click the **View** button (external link icon) next to any story to open and review how it appears on the live public website. This opens the article in a new browser tab using the actual front-end URL, showing exactly what readers will see.

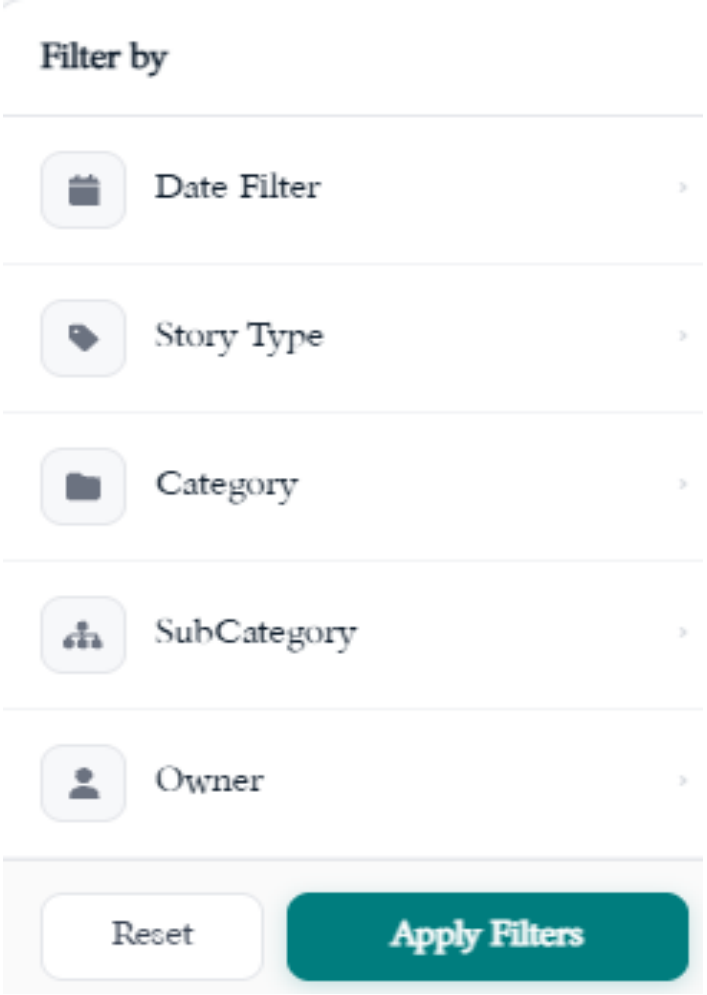

View button in list

Public Site After Click on View button from list

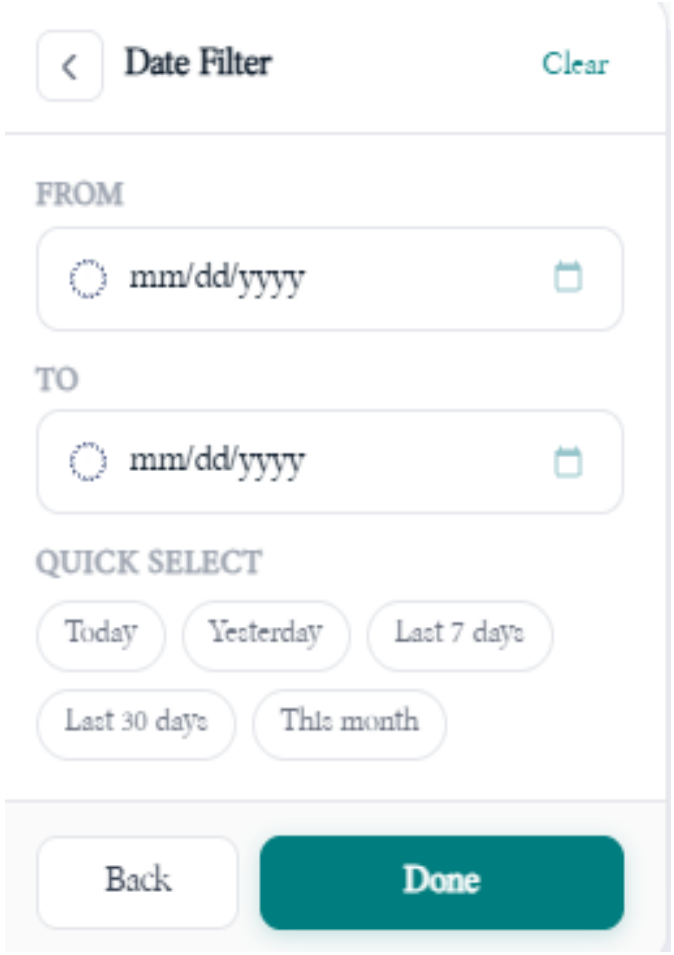

FILTER STORIES

- Click the filter icon(**after Draft button**) on the **All Stories** page to open the filter panel. You can filter the story list by multiple criteria to quickly find specific content. Select your desired filters, then click **Apply Filters** to update the list, or **Reset** to clear all selections.

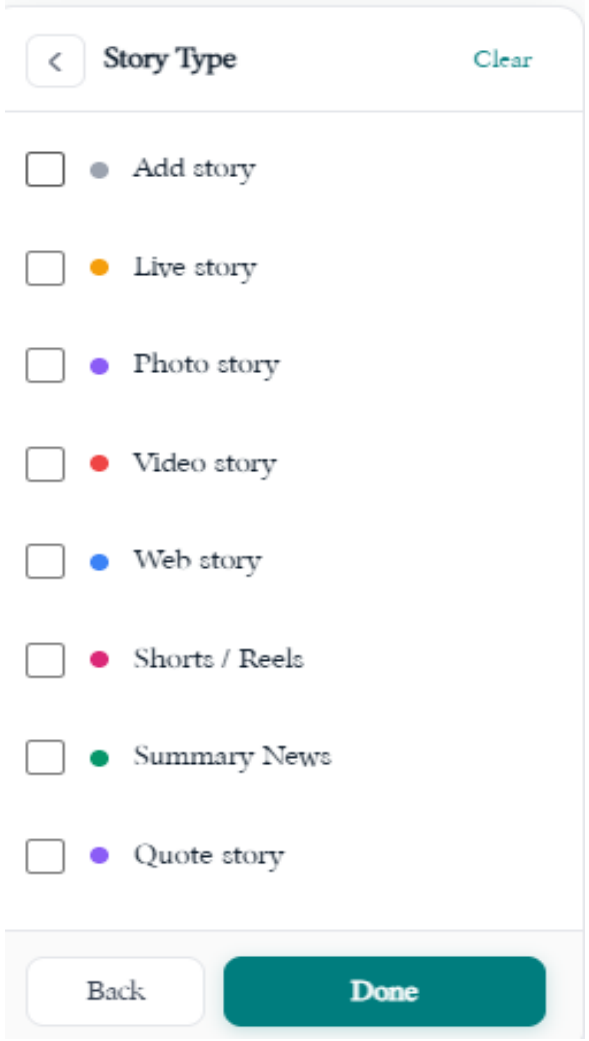

DATE FILTER

- Narrow down stories by publication or creation date. Enter a **From** and **To** date using the date picker, or use the **Quick Select** shortcuts to instantly choose **Today**, **Yesterday**, **Last 7 days**, **Last 30 days**, or **This month**. Click **Done** to confirm your date selection.

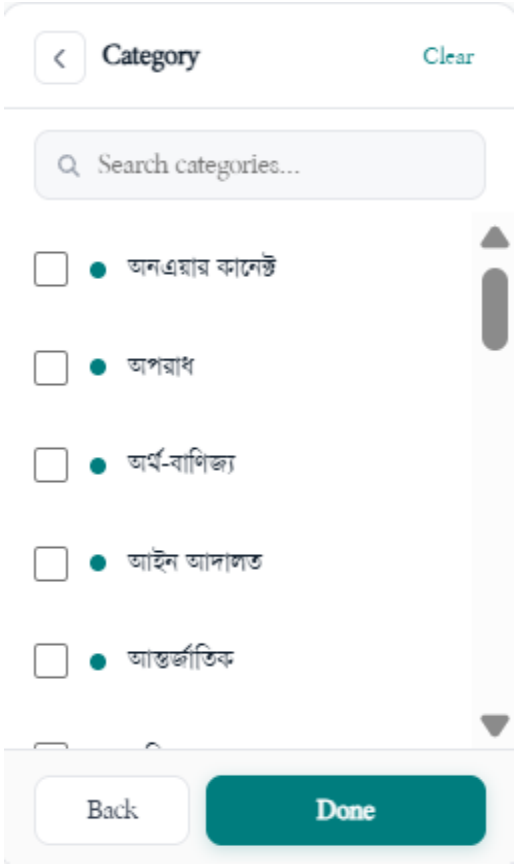

FILTER BY STORY TYPE

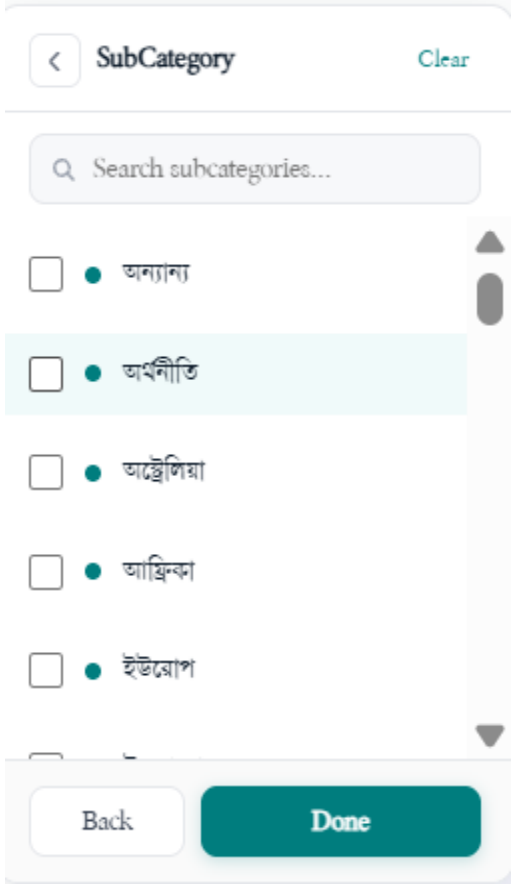

- Filter by the format of the content. Select one or more types from the list:
- Add story (standard news)
- Live story
- Photo story
- Video story
- Web story
- Shorts / Reels
- Summary News
- Quote story

FILTER BY CATEGORY & SUBCATEGORY

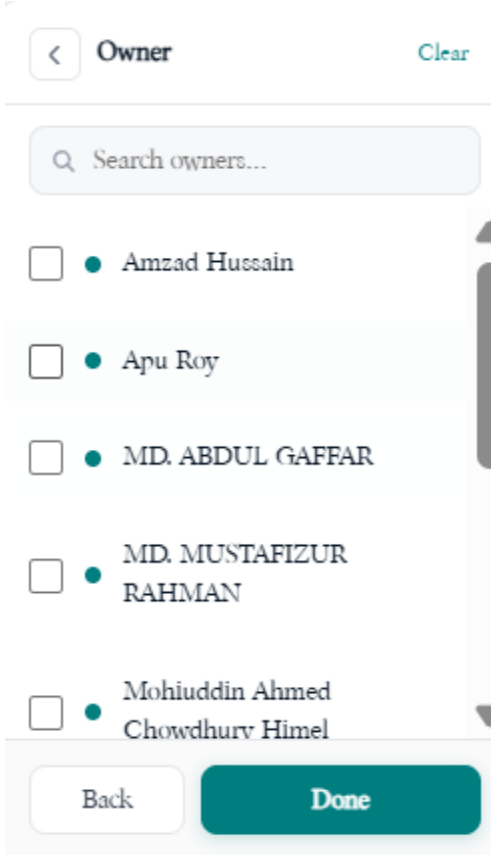

- Filter stories by their assigned **Category** or **SubCategory**. Use the search box at the top of each list to quickly find a category, then check the boxes to select one or more. SubCategory options can be filtered after selecting a parent category.

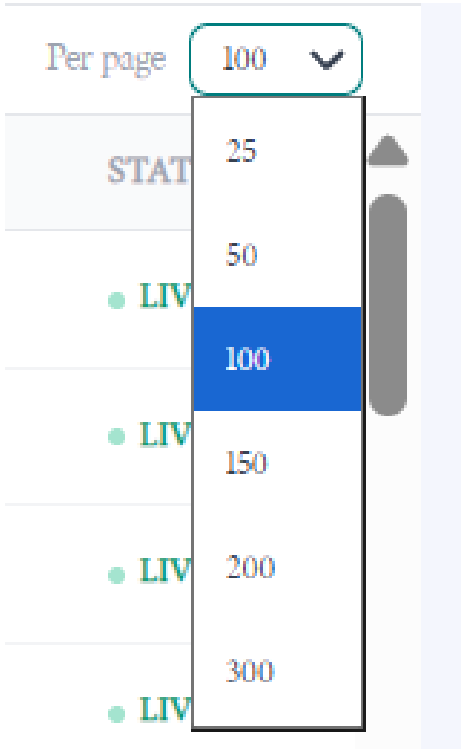

FILTER BY OWNER NAME

- Filter stories by the user who created them. Use the search box to find a specific author or editor, then check the names you want to include in the filtered results.
- After making selections in any filter section, click **Done** to confirm that section, then click **Apply Filters** on the main panel to refresh the story list.

PAGINATION CONTROLS

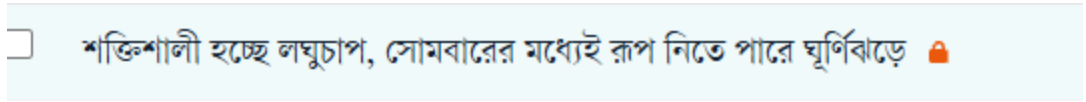

- Use the **Per page** dropdown to change how many stories display on a single page. Choose from **25**, **50**, **100**, **150**, **200**, or **300** items per page. The list will refresh automatically to show the selected number of stories.
- The **Showing** indicator above the table updates to reflect the current view, for example "Showing 1–100 of 171", letting you know which items you are currently viewing and the total number of stories available in the filtered list.

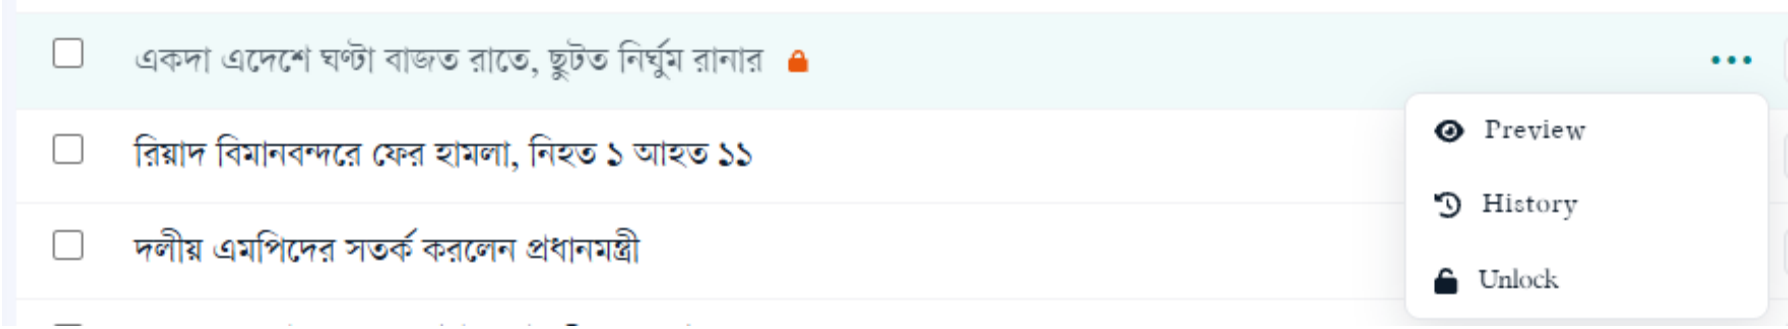

NEWS LOCK & UNLOCK

- When a user opens a story in the edit page, that story becomes **locked** by that user. A lock icon appears next to the story title in the list, indicating it is currently being worked on and is temporarily reserved to prevent conflicting edits by multiple users at the same time. Hover over the lock icon to see the name of the user who has locked the story.
- If another user needs to edit the same story, they can unlock it using the three-dot menu next to the story row and selecting **Unlock**, provided they have the necessary unlock permission. Once unlocked, the story becomes available for that user to open and modify

EDIT NEWS STORY

- Click any story title from the **All Stories** list to open it in edit mode. The form loads with all existing content pre-filled, allowing you to modify text, replace images, update categories, or adjust SEO settings. Once finished, click **Update** to save your changes, or **Cancel** to discard them.

সিরাজগঞ্জ মৎস্য বিভাগ সূত্রে জানা গেছে, জেলায় বছরে মোট মাছ উৎপাদন হয় ৭৮ হাজার ৯৪৫ দশমিক ১৪ মেট্রিক টন। এর মধ্যে চলনবিল অধ্যুষিত উল্লাপাড়া ও তাড়াশ উপজেলায় উৎপাদিত হয় ৫ হাজার ২৩০ দশমিক ৭৩ মেট্রিক টন মাছ। ২০২৩-২৪ অর্থবছরে এ দুই উপজেলার ৬০টি শুঁটকিমহালে উৎপাদিত হয়েছিল ৩০২ মেট্রিক টন শুঁটকি। যার বাজারমূল্য ছিল প্রায় ৮ কোটি টাকা। কিন্তু পরবর্তী ২০২৪-২৫ অর্থবছরে উৎপাদন কমে দাঁড়ায় ১৮৫ দশমিক ১৭ মেট্রিক টনে। অর্থাৎ এক বছরের ব্যবধানে উৎপাদন কমেছে প্রায় ৩৮ দশমিক ৭ শতাংশ। চলতি মৌসুমে চলনবিলে মাছের সরবরাহ আরও কমে যাওয়ায় উৎপাদন নিয়ে নতুন করে উদ্বেগ দেখা দিয়েছে।

NEWS SORTING / FEATURED ITEMS

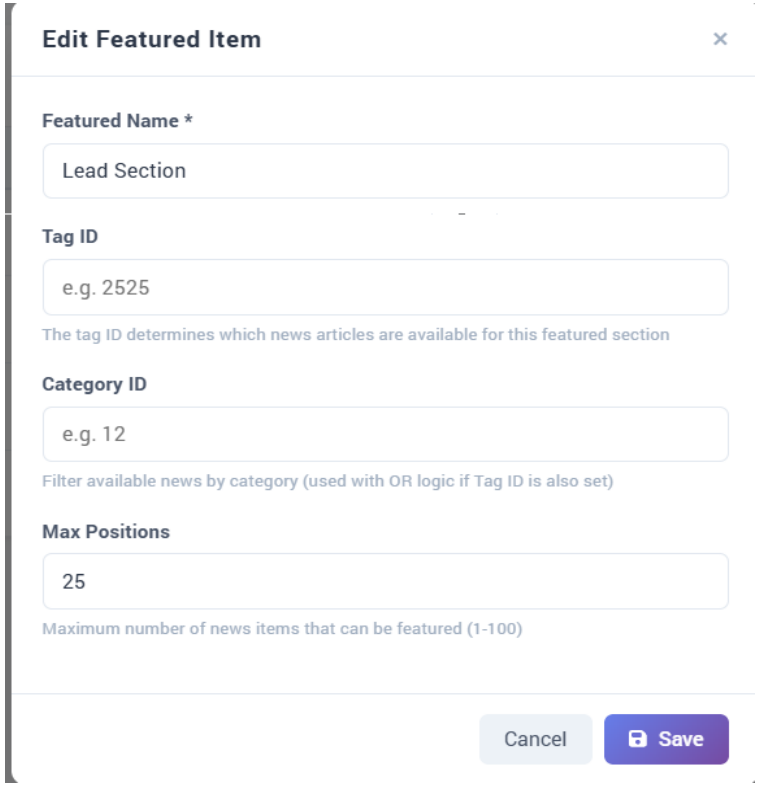

- This section lets you create and manage featured content sections that appear on the public website homepage or category pages, such as **Lead Section**, **Second Lead**, **LiveFeatured**, and **FeaturedVideo**.
- **Featured Items List**
- The main page displays all existing featured sections. Each row shows the section name, associated Tag ID, Category ID, maximum allowed positions, and current news count (for example, "25 / 25"). Use the **+ Add Featured** button to create a new section, or use **Edit** and **Delete** to modify or remove existing ones.

ADD / EDIT FEATURED SECTION

- When adding or editing a featured section, you can configure:
- **Featured Name**: The label for the section (required).
- **Tag ID**: Optionally restrict available news to a specific tag.
- **Category ID**: Optionally filter available news by category (works with OR logic if combined with a Tag ID).
- **Max Positions**: The maximum number of stories allowed in this section (range 1–100).

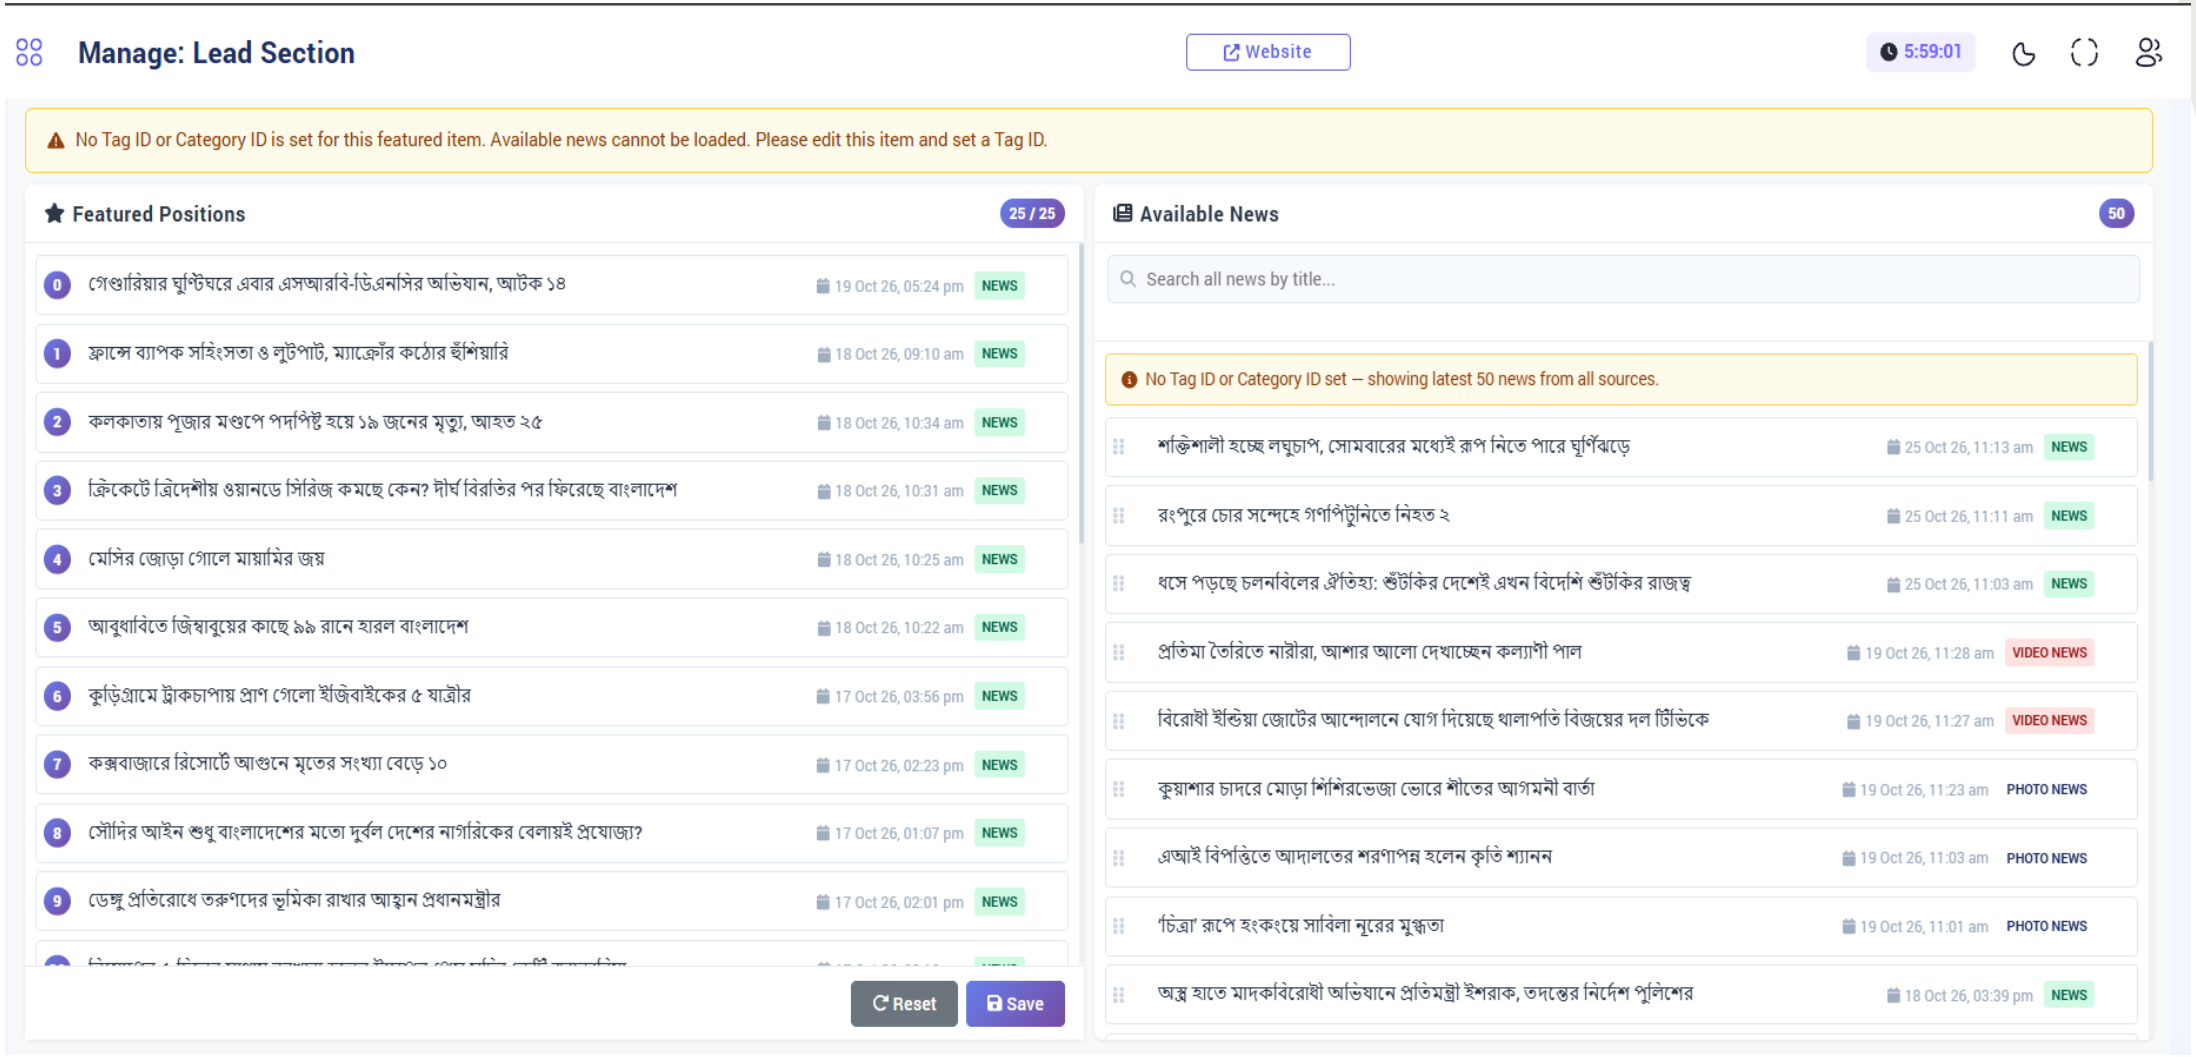

MANAGE POSITIONS (DRAG & DROP)

- Click **Manage** on any featured section to open the position manager. This screen has two panels:
- **Featured Positions (left)**: Shows the stories currently assigned to this section in their display order (Position 0, 1, 2, etc.). This exact order determines how stories appear on the public site.
- **Available News (right)**: Shows the pool of stories eligible for this section. Use the search bar to find specific news by title.
- To populate or reorder the section, drag stories from the **Available News** panel into the **Featured Positions** panel, or drag items within the featured list to reorder them. The position numbers update automatically to reflect the new sequence.

- আজকের আবহাওয়া

COLLECTIONS

- Collections are grouped content sections that control how stories appear together on the **website frontend**. The Collections List page displays all available content groups (for example, **LeadSection, SecondLead, VideoSection, EditorsPick**) and lets you manage their structure, content source, and display order.
- Collections List
- The main list shows all collection groups with the following details:
- **Group Order**: Numbered sequence showing the display order on the page.
- **Collection Name**: The identifier for the section (for example, LeadSection, EightStoriesLeftBig).
- Mode: Shows whether the collection is **AUTO** (automatically populated), **MANUAL** (curated by editors), or **STATIC** (pulled from a custom data source).
- **Source Info**: Displays the assigned category, tag, or featured item feeding the collection.
- **Slots**: Shows how many content slots exist within the group (for example, "3 slots").
- Actions:
  - **+ Slot**: Add a new content slot to the collection.
  - **Expand arrow**: Click to expand the collection and view or manage its individual slots.
  - **Edit**: Modify the collection settings.
  - **Delete**: Remove the entire collection group.

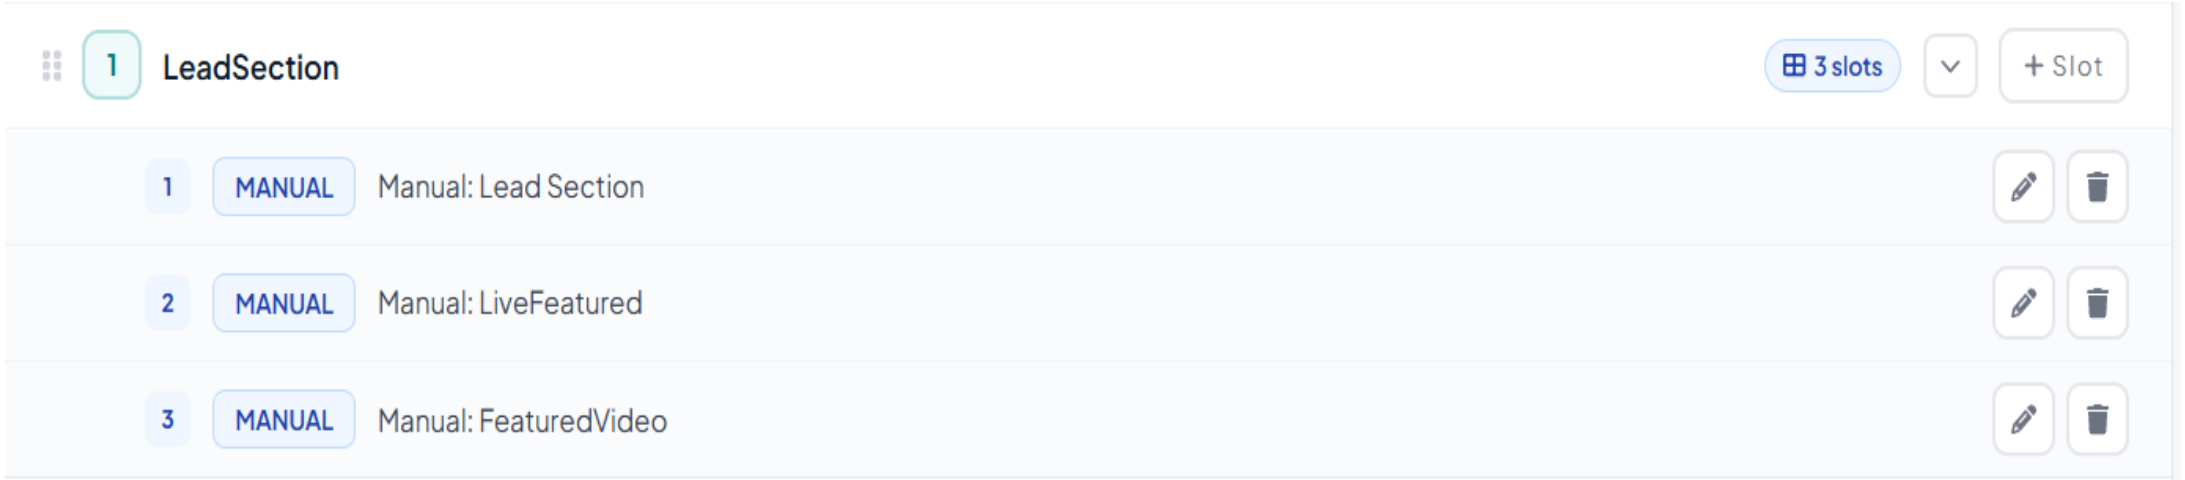

REORDER COLLECTIONS

- Drag and drop collection groups using the handle icons to rearrange their display order. Once you have arranged the sections in the desired sequence, click the **Save Order** button at the top right to apply the changes. The saved order determines exactly how these sections appear on the public website.

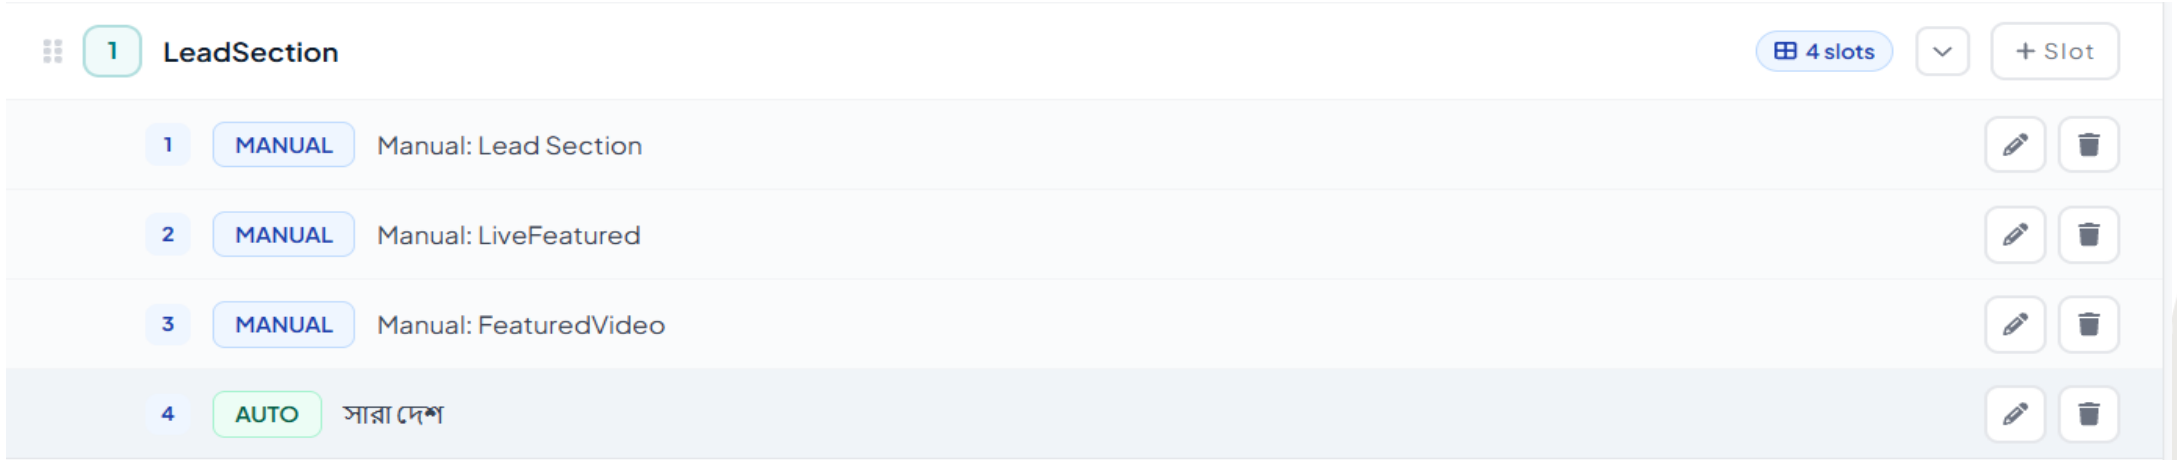

EXPAND SLOTS (ARROW BUTTON)

Click the arrow next to any collection to expand it and reveal its internal slots. Each slot represents a specific content position or sub-section within that collection. The expanded view shows the slot number, story type (Manual/Automatic/Static), and the source name. Each slot can be edited or deleted individually from this view.

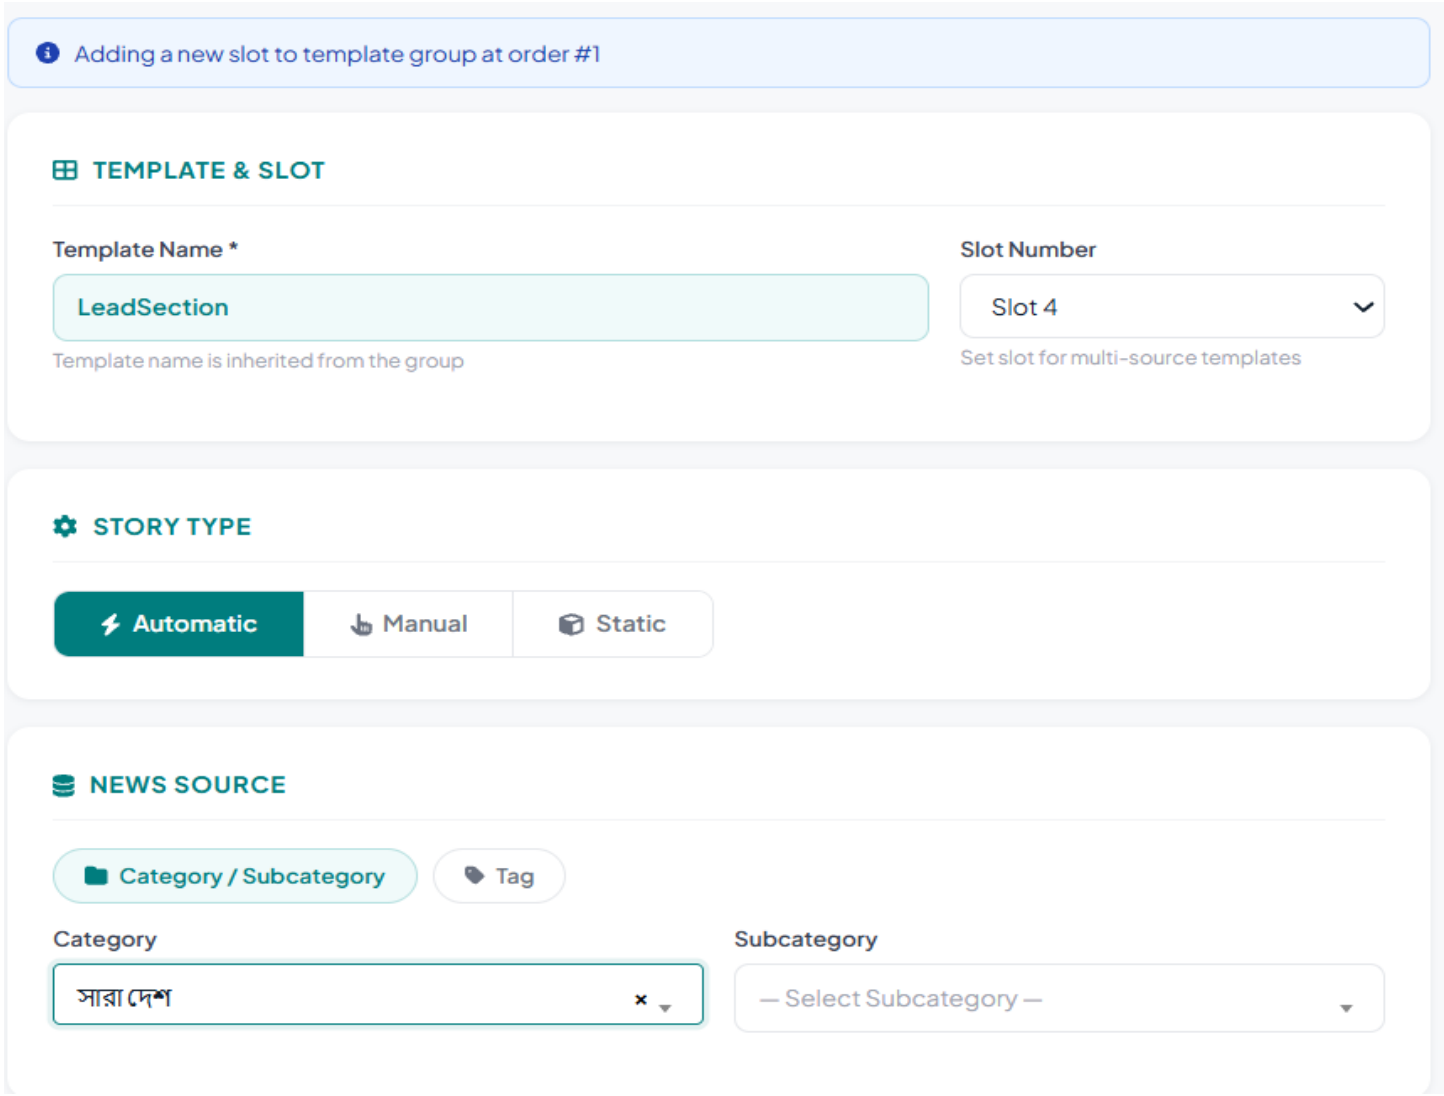

ADD NEW SLOT TO A COLLECTION

- Click the **+ Slot** button on any collection row to add a new content slot. The form inherits the **Template Name** from the parent group (for example, "LeadSection") and lets you choose the **Slot Number** (for example, "Slot 4").
- Select a **Story Type**:
- **Automatic**: Pulls stories automatically from a chosen source.
- **Manual**: Links to a featured item.
- **Static**: Uses a data source identifier.
- For **Automatic** slots, choose the **News Source** by **Category / Subcategory** or **Tag**. In the example, Slot 4 was added to the **LeadSection** collection using **Automatic** mode with the **সারা দেশ** (National) category as the source. Once saved, the new slot appears in the expanded collection list and feeds content into that section on the public site.

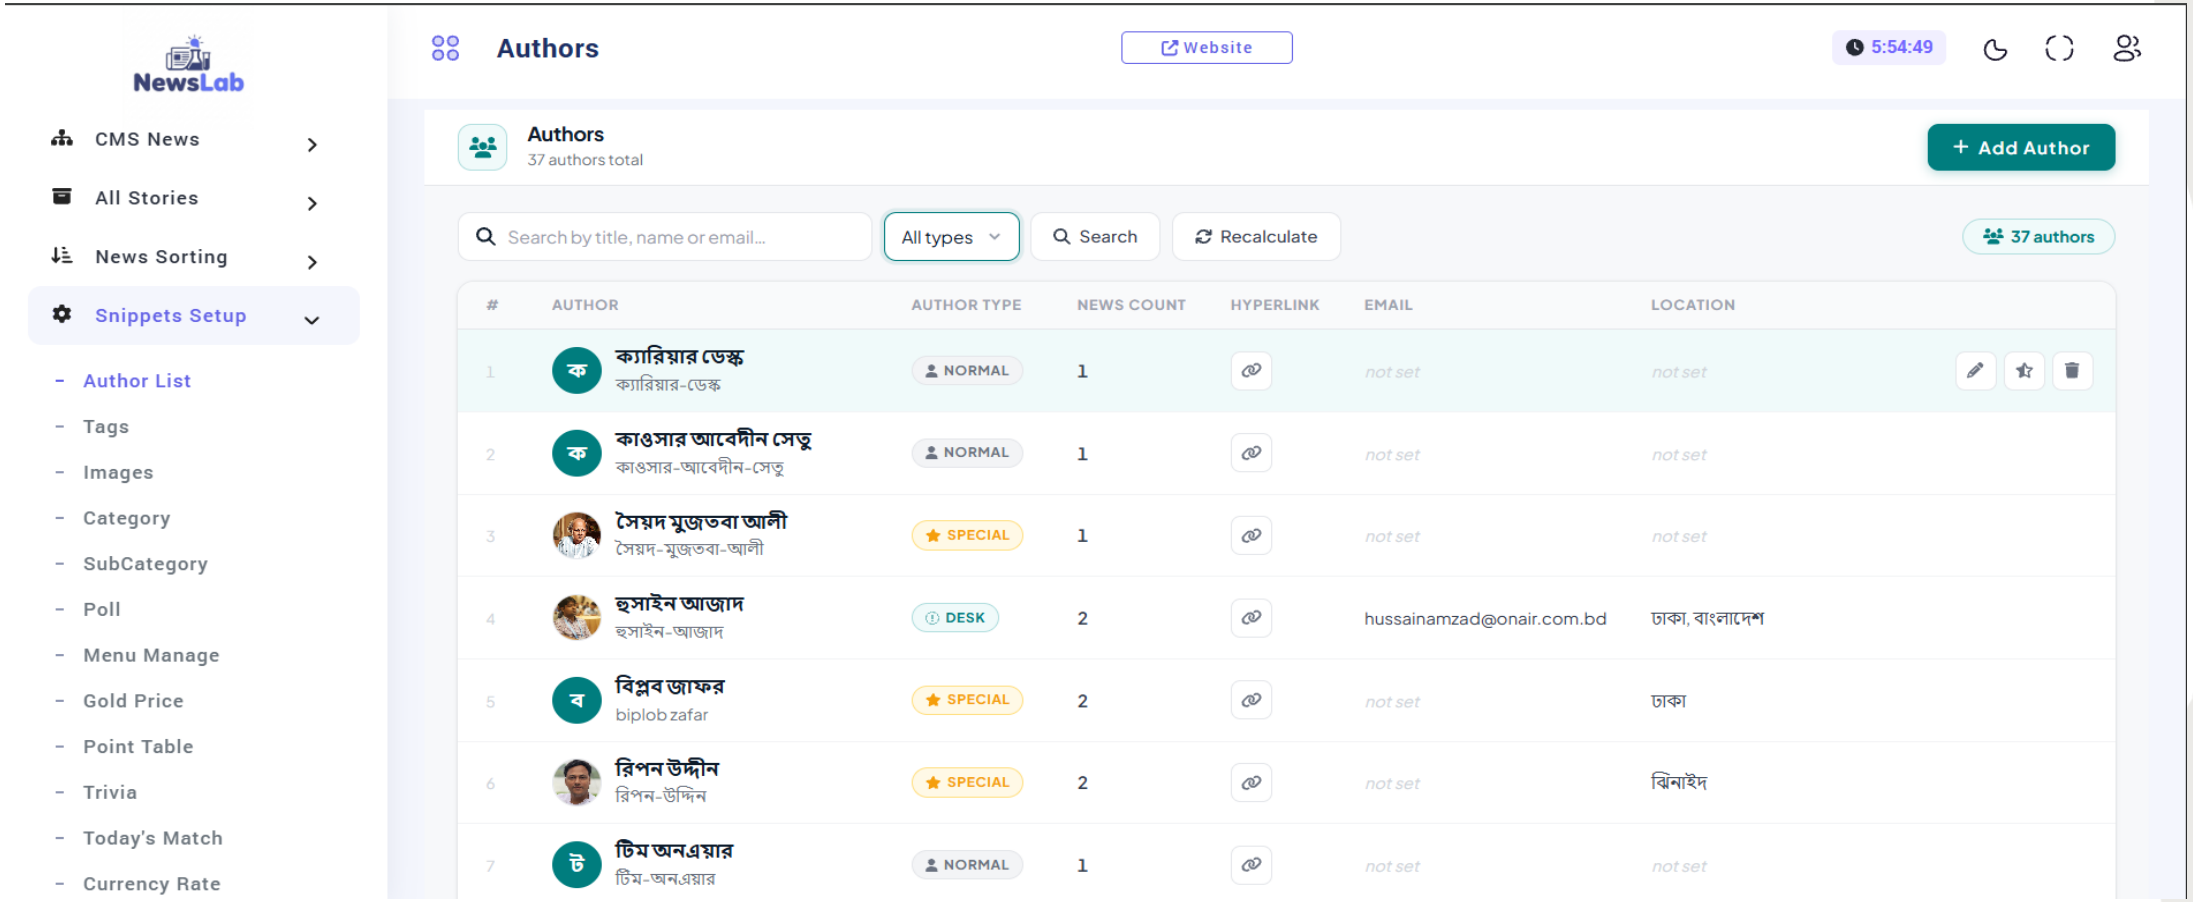

ADD SLOT VIEW

SNIPPETS SETUP - AUTHOR LIST

- Author List
- This page displays all authors in the CMS. The list shows each author's profile image, name, author type (Normal, Special, or Desk), news count, public hyperlink, email, and location. Click **+ Add Author** to create a new author profile.
- Search & Filter
- **Search by title, name or email**: Type keywords to quickly find a specific author.
- **All types**: Use the dropdown to filter authors by their type (for example, Normal, Special, or Desk).
- **Search button**: Executes the search based on your entered criteria.
- **Recalculate**: Click this button to refresh and recalculate author statistics, such as news counts.
- Author Type & Special Toggle
- Each author has an assigned type shown as a badge. To mark an author as **Special**, click the **star icon** next to the edit button on the author's row. Authors marked as Special receive a gold "SPECIAL" badge and are typically highlighted differently on the public website.
- Hyperlink
- Click the **link icon** in the **Hyperlink** column to open the author's public profile page on the live website. This page displays the author's details and all news stories written by them.

- Row Actions
- **Edit (pencil)**: Modify the author's profile information.
- **Special toggle (star)**: Switch the author between Normal and Special status.
- **Delete (trash)**: Remove the author from the system.

AFTER CLICK ON HYPERLINK FROM AUTHOR LIST

CREATE AUTHOR FORM

USE THIS FORM TO ADD A NEW AUTHOR PROFILE TO THE CMS.

- Basic Info
- **Author Title**: Enter the author's display name or title (required). This is the primary identification for the author.
- **Name**: Auto-populated from the Author Title using hyphens for multi-word titles. Click the **Lock** icon to manually edit or prevent auto-updates.
- **Designation**: Enter the author's role or position (for example, "বিশেষ প্রতিনিধি").
- **Email**: Enter the author's email address.
- **Location**: Enter the author's city and country.
- **Description**: Write a brief biography or summary about the author.
- Author Type Toggles (Right Panel)
- **Special Author**: Toggle on to mark this author as featured or special.
- **Desk Author**: Toggle on to mark this author as a desk or editorial team member.
- **Guest Author**: Toggle on to mark this author as a guest or contributing writer.
- Profile Image
- Upload the author's profile photo using the **Choose Image** button.

- Live Preview
- A real-time preview panel on the right shows how the author card will appear with the current information.
- Website & Social Media
- **Website**: Enter the author's personal or portfolio website URL.
- **Social Media**: Add links to the author's **Facebook**, **Twitter (X)**, **LinkedIn**, and **YouTube** profiles.
- SEO & Meta
- **Meta Title**: Enter the SEO page title for the author's public profile page.
- **Meta Description**: Write a brief description for search engine results (maximum 500 characters).
- **Meta Keywords**: Add relevant keywords separated by commas to improve search visibility.
- Publishing
- Click **Create Author** to save and publish the new author profile, or **Cancel** to discard the form.

EDIT AUTHOR FORM

- Click the **edit (pencil) icon** on any author row in the Author List to open the Edit Author form. This form loads all existing author information pre-filled, allowing you to update profile details, change author type settings, replace the profile image, modify social media links, and adjust SEO metadata.
- **Basic Info**
- Update the author's **Author Title**, **Name**, **Designation**, **Email**, **Location**, and **Description**. The **Name** field can be manually edited by clicking the **Edit** (unlock) icon next to it.
- **Author Type Toggles**
- **Special Author**: Toggle to mark or unmark the author as featured.
- **Desk Author**: Toggle to set the author as a desk/editorial team member.
- **Guest Author**: Toggle to set the author as a guest/contributing writer.
- **Profile Image**
- View the current profile image and use **Choose Image** to upload a replacement, or click **Remove** to delete the existing image.
- **Live Preview**
- The right panel shows a real-time preview of how the author card appears with the updated information.

- **Website & Social Media**
- Update the author's **Website** URL and social profile links for **Facebook**, **Twitter**, **LinkedIn**, and **YouTube**.
- **SEO & Meta**
- Edit the **Meta Title**, **Meta Description** (maximum 500 characters), and **Meta Keywords** to optimize the author's public profile page for search engines.
- Click **Save Changes** to apply all updates, or **Cancel** to discard them.

MEDIA LIBRARY -IMAGE

- The Media Library stores and manages all images uploaded to the CMS. The top summary bar displays the total number of images, total pages, and how many items are currently visible.
- **Search & Pagination**
- Use the **Search** field to find images by title or caption. The **per page** dropdown controls how many images display at once. Toggle between **Grid view** and **List view** using the icons next to the dropdown to switch between a visual thumbnail grid and a detailed list layout.
- **Upload**
- Click the **Upload Images** button to add new images to the library.
- **Grid View**
- In grid view, images appear as thumbnails. Click any image to open the **View** modal, which shows the full image along with details including title, caption, dimensions, file size, file path, and upload date. From the modal, you can **Edit Image** to modify its details, **Delete** to remove it, or **Close** to return to the library.
- **List View**
- In list view, images display as rows with columns for the thumbnail, title, caption, dimensions, file size, and upload date. Each row has quick action buttons for **View** (eye icon), **Edit** (pencil icon), and **Delete** (trash icon).

UPLOAD AND EDIT IMAGE

- **Upload Images**
- Drag and drop images into the upload area or click **Or choose from your computer** to select files. Supported formats are WEBP, JPG, AVIF, GIF, JPEG, and PNG, with a maximum file size of 10.0 MB per image. After selecting, a preview appears for each image where you can add a **Title** (required), **Caption**, **Description**, and **Attribute**. Click **Upload All** to save all selected images to the library, or **Cancel** to discard.
- **Edit Image**
- Click the **Edit** button on any image to open the full edit view. The left panel shows the original image preview, dimensions, file size, CDN URL (with a **Copy** button), and a 16:9 card preview. The right panel lets you update the **Title**, **Caption**, **Attribute**, and **Description**, and displays the file path. Click **Save Changes** to apply updates. In the **Danger Zone** at the bottom, you can permanently **Delete Image**, which removes the file from both the database and cloud storage.

VISUAL VIEW OF UPLOAD IMAGE

Drag and drop images into this area to upload immediately.

Supported formats: WEBP, JPG, AVIF, GIF, JPEG, PNG. Maximum filesize: 10.0 MB.

⚠ DANGER ZONE

Deleting this image is permanent and cannot be undone. The file will be removed from both the database and cloud storage.

Delete Image

CATEGORIES

- **This page lists all content categories in the CMS**. The table displays each category's **Name**, **Slug**, and **Meta Title** status. Use the **Search** field to find categories by name or slug. Click **+ Add Category** to create a new category, or use the **Edit** (pencil) and **Delete** (trash) icons on each row to manage existing ones.

CREATE CATEGORY

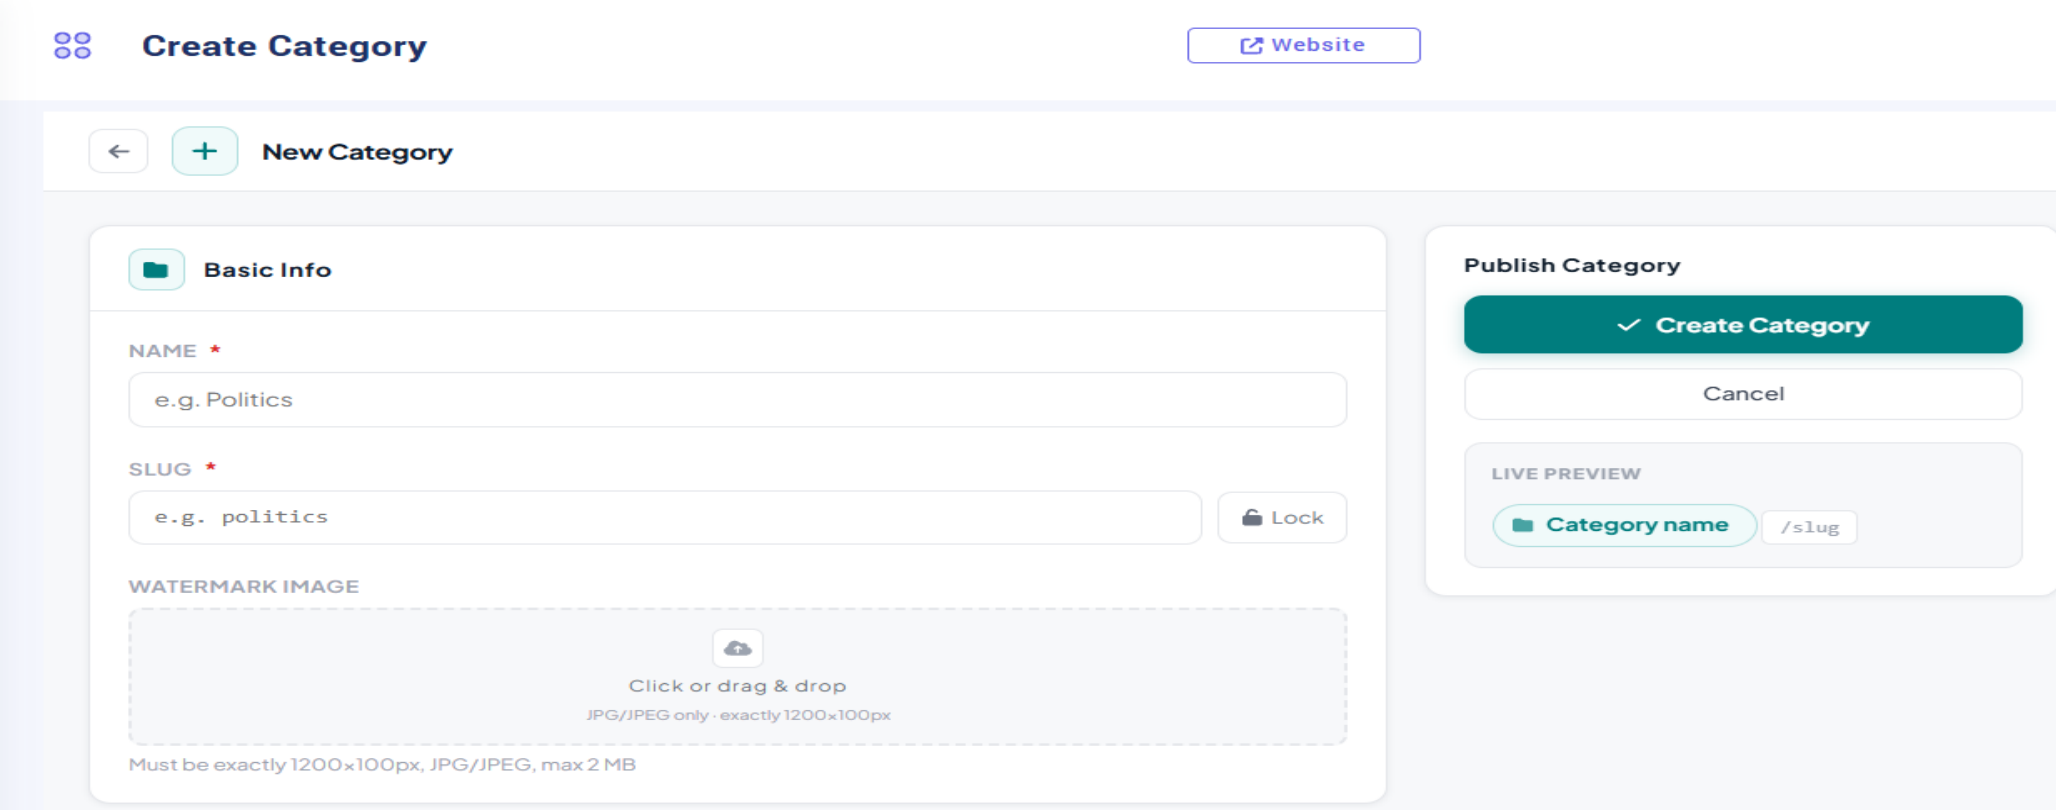

Use this form to add a new category.

•**Name**: Enter the category name (required).

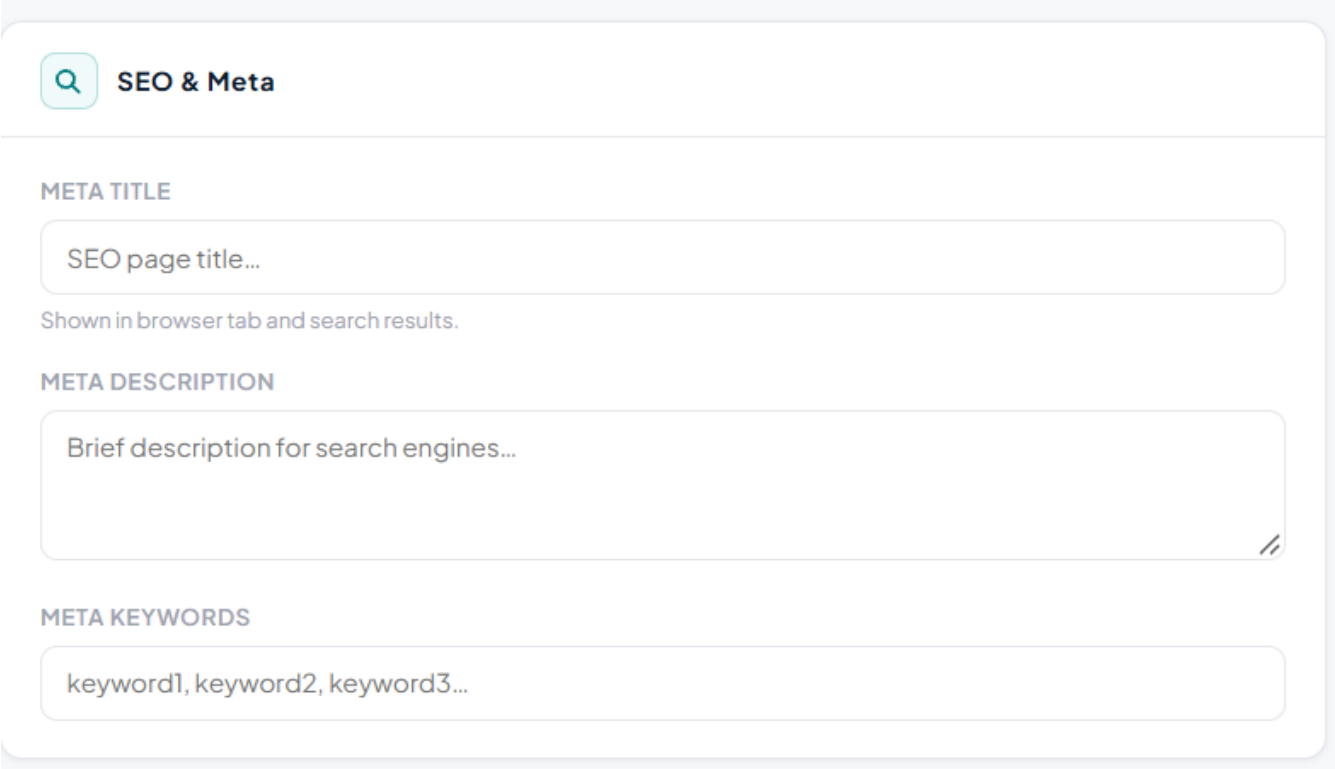

•**Slug**: The URL-friendly identifier, auto-generated from the name. Click the **Lock** icon to edit it manually.

•**Watermark Image**: Upload a watermark image for this category. Must be exactly **1200 x 100 px**, JPG/JPEG only, maximum 2 MB.

A **Live Preview** on the right shows how the category label will appear.

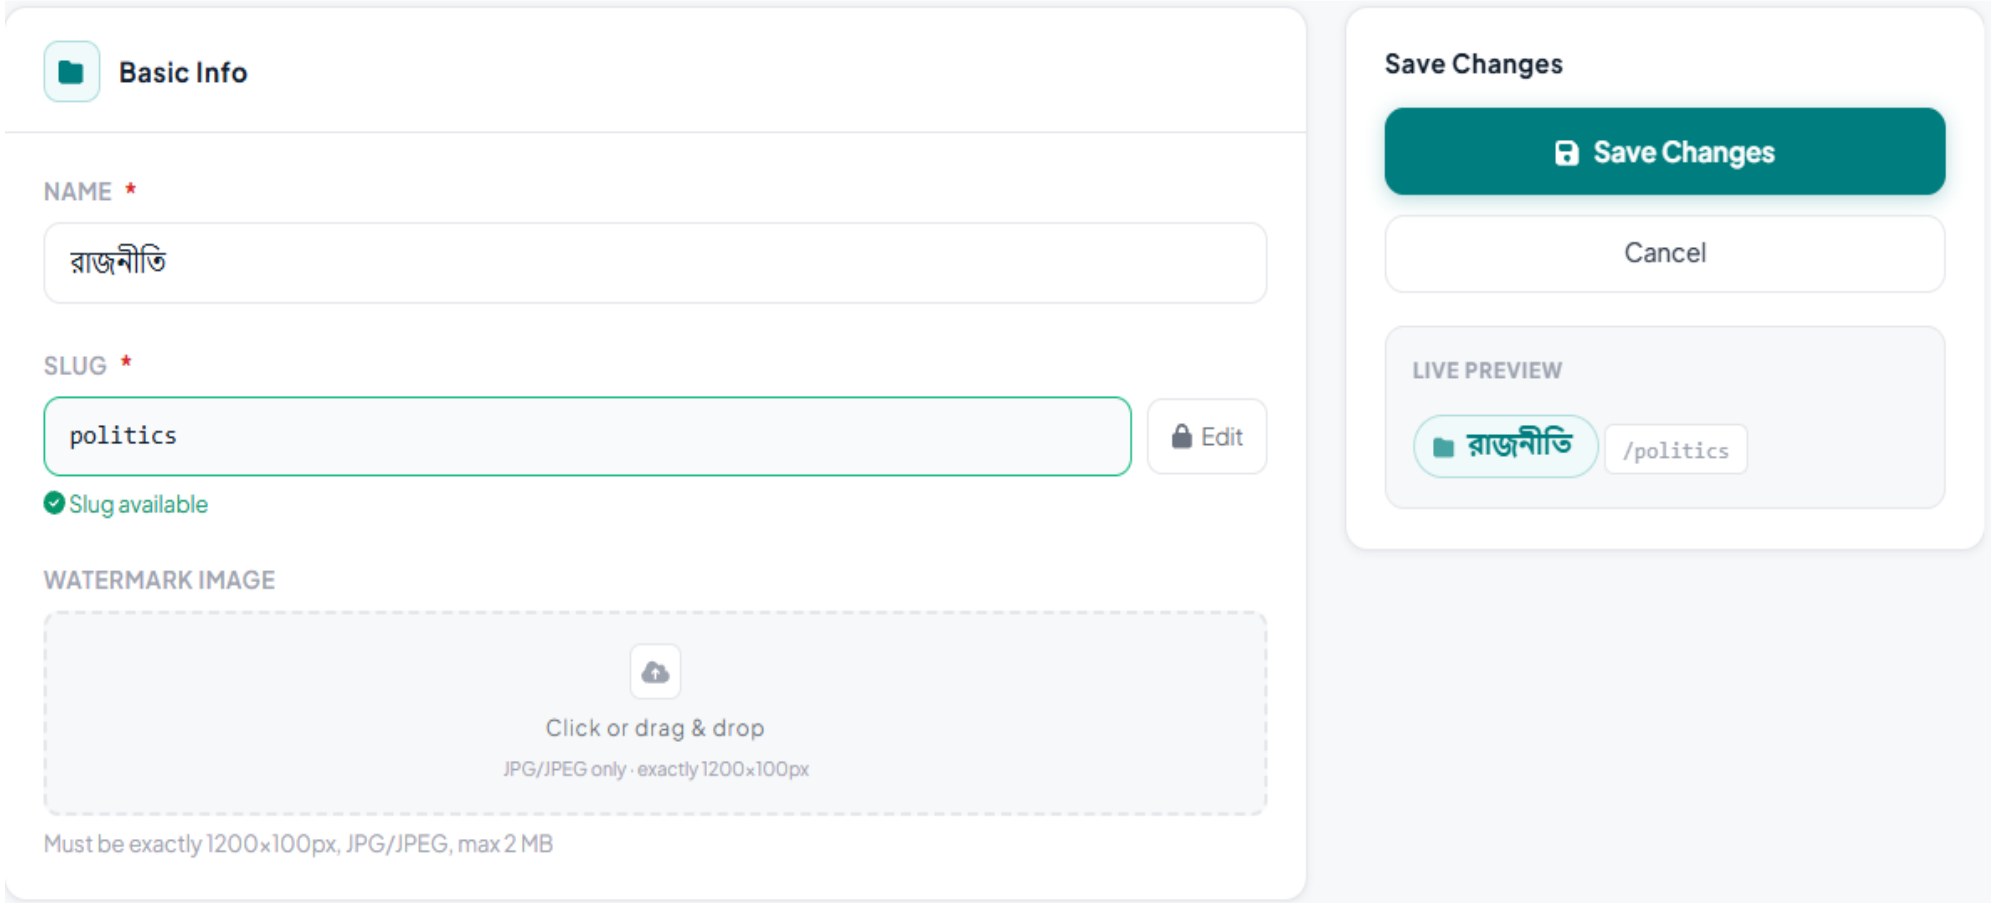

- **SEO & Meta**
- Optimize the category page for search engines:
- **Meta Title**: The page title shown in browser tabs and search results.
- **Meta Description**: A brief description for search engine results.
- **Meta Keywords**: Relevant keywords separated by commas.
- Click **Create Category** to save, or **Cancel** to discard.

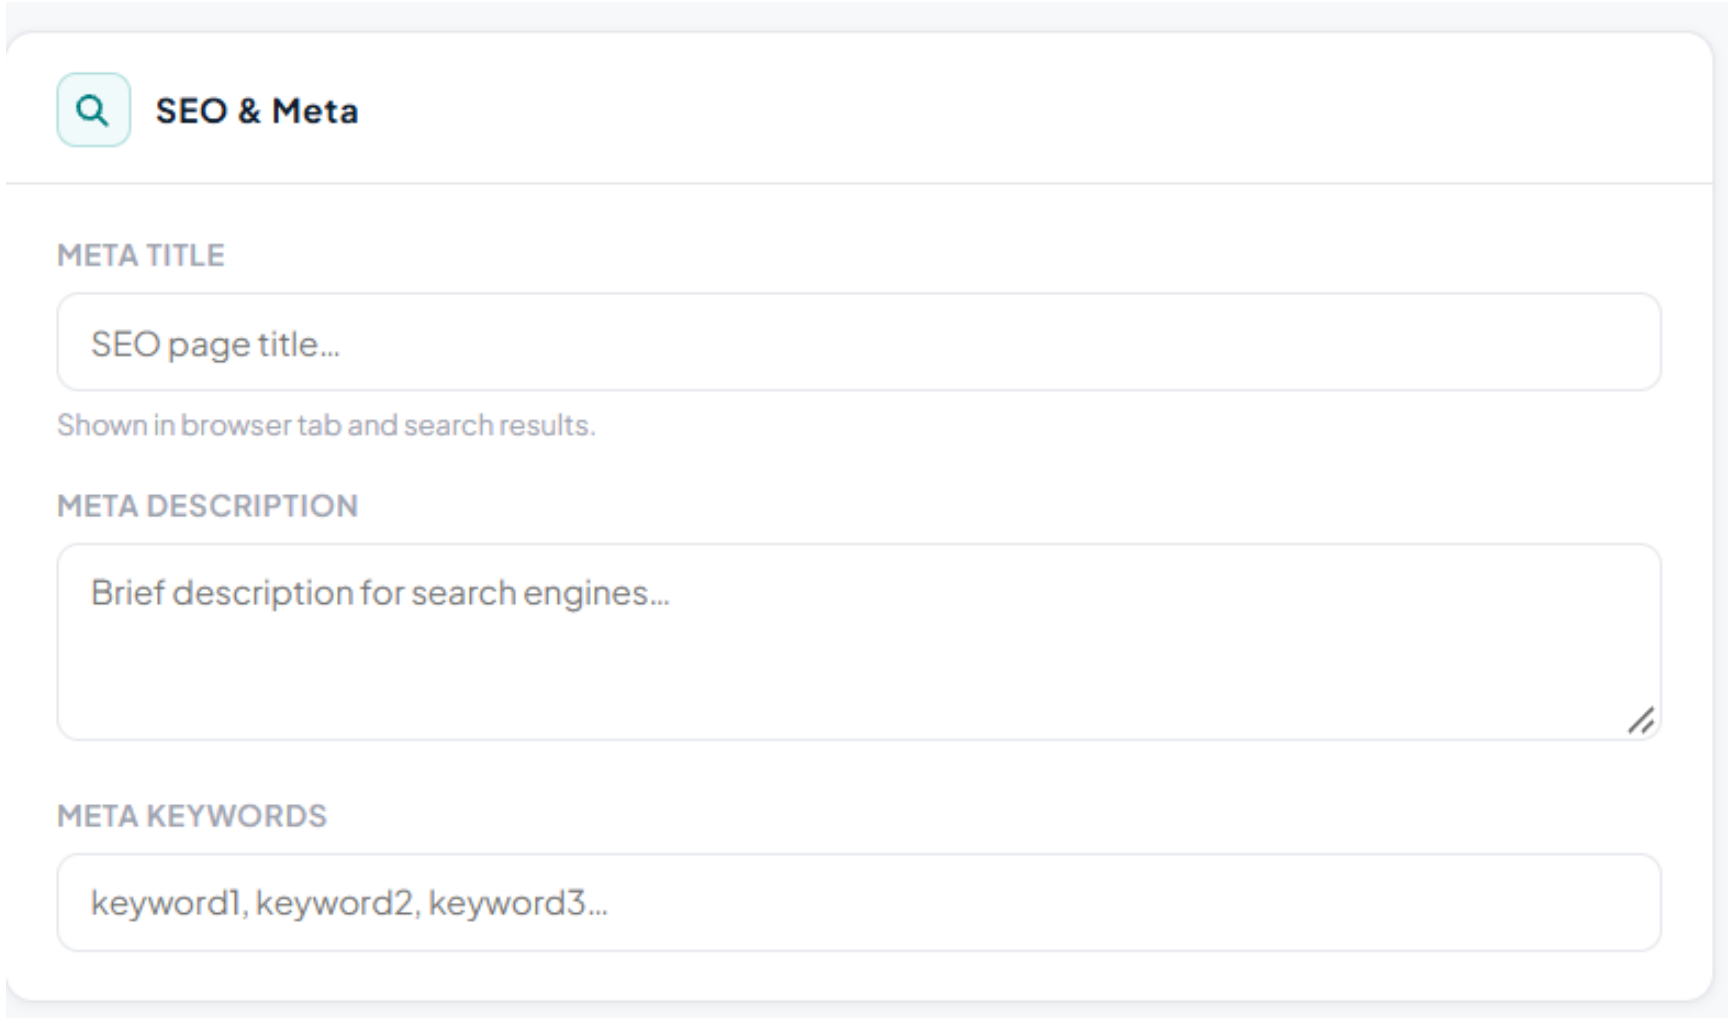

EDIT CATEGORY

- Click the **edit (pencil) icon** on any category row to open the Edit Category form. Update the **Name**, **Slug**, and **Watermark Image** (JPG/JPEG, exactly 1200 x 100 px, max 2 MB). The slug can be manually edited by clicking the **Edit** button, and the system confirms availability. The **Live Preview** on the right shows the updated category label.

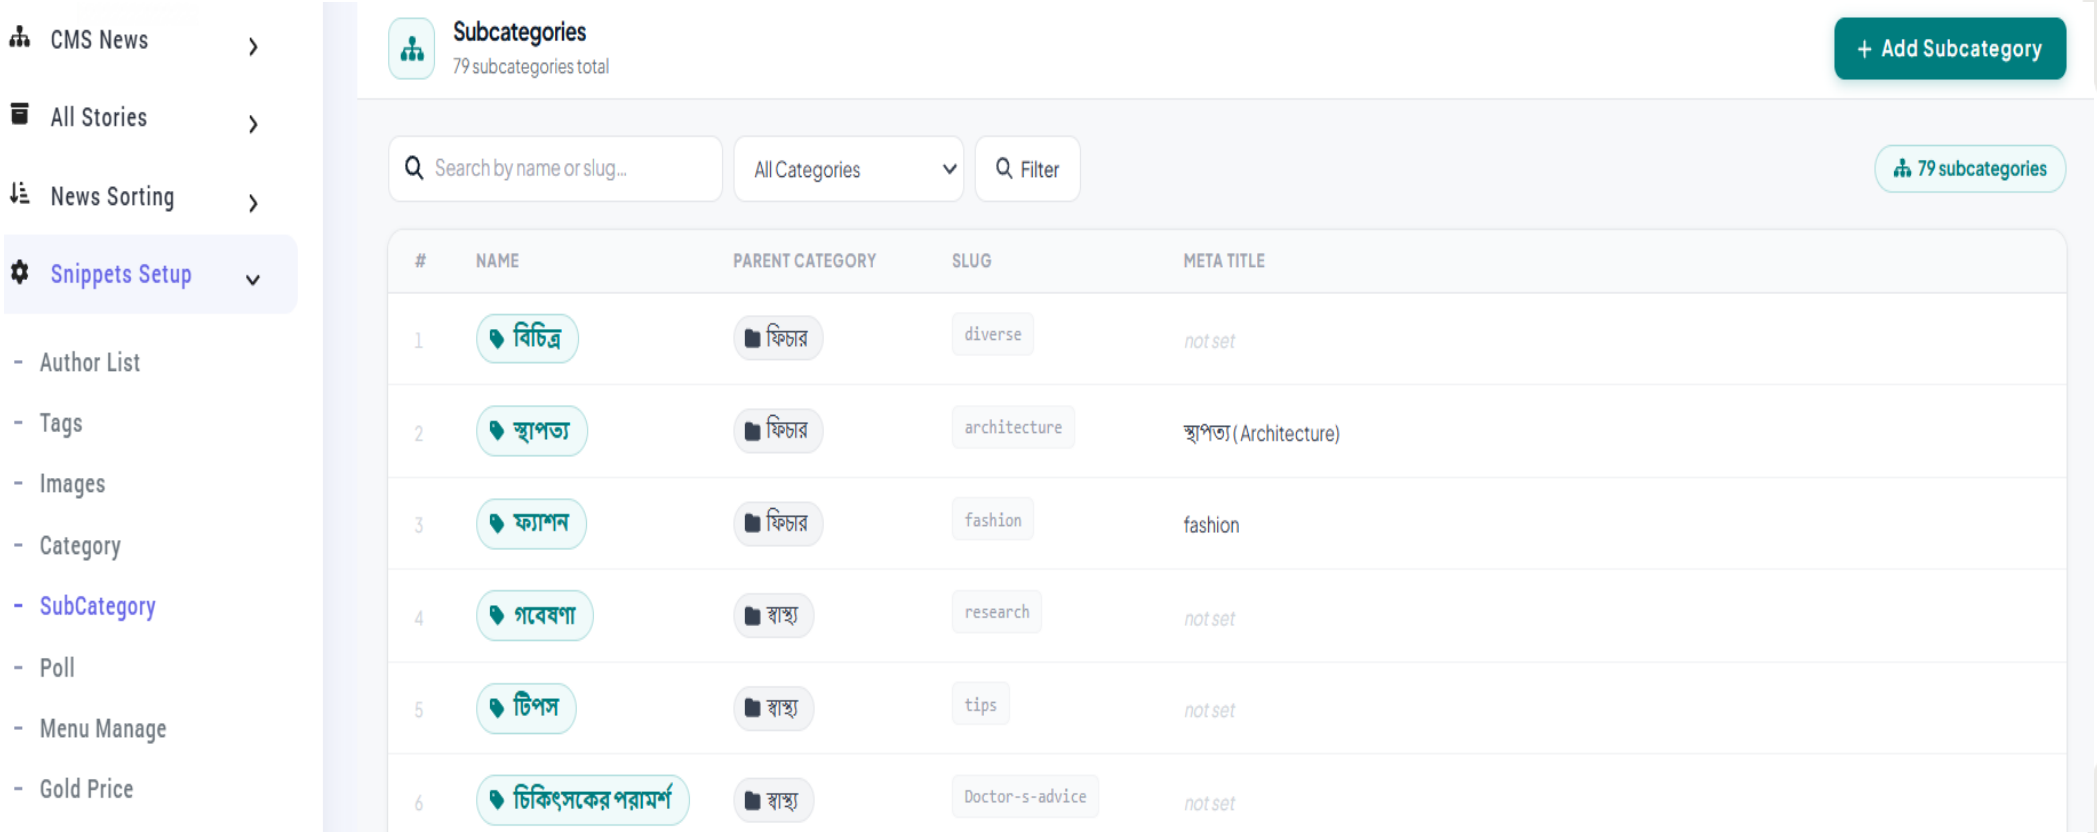

- In the **SEO & Meta** section, update the **Meta Title**, **Meta Description**, and **Meta Keywords** to optimize the category page for search engines.
- Click **Save Changes** to apply updates, or **Cancel** to discard them.

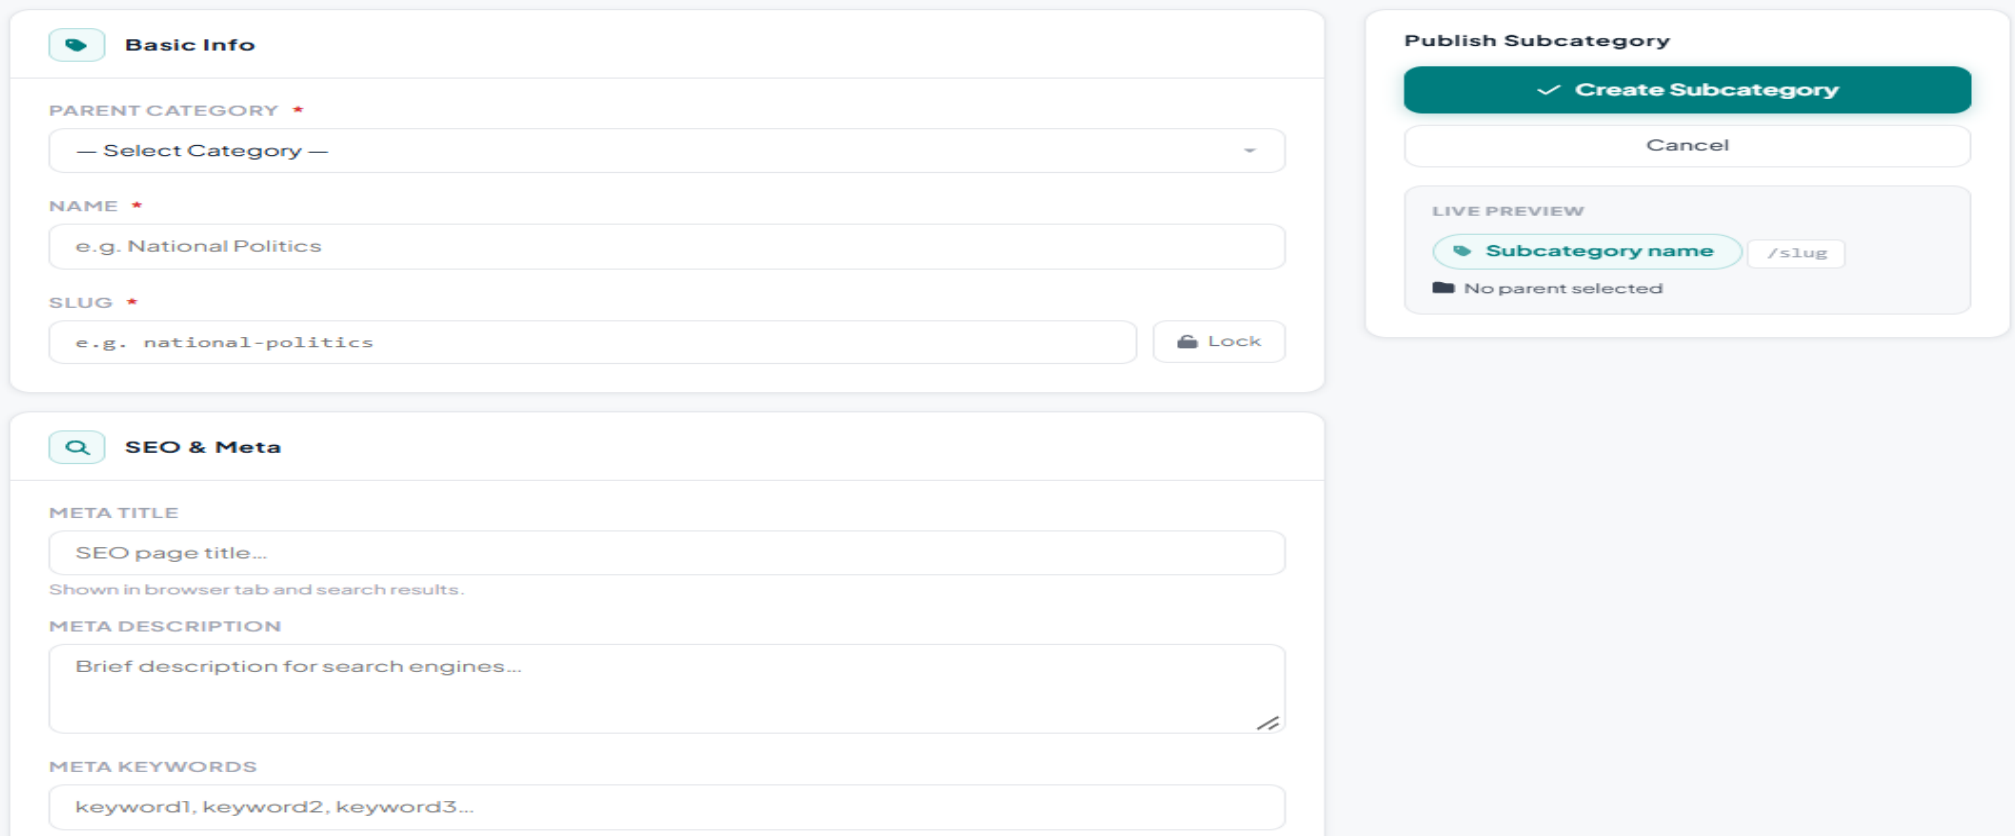

SUB-CATEGORIES

- The Subcategories page **lists** all subcategories under their parent categories. The table shows each subcategory's **Name**, **Parent Category**, **Slug**, and **Meta Title** status. Use the **Search** field to find subcategories by name or slug, and filter by parent category using the **All Categories** dropdown. Click **+ Add Subcategory** to create a new one.

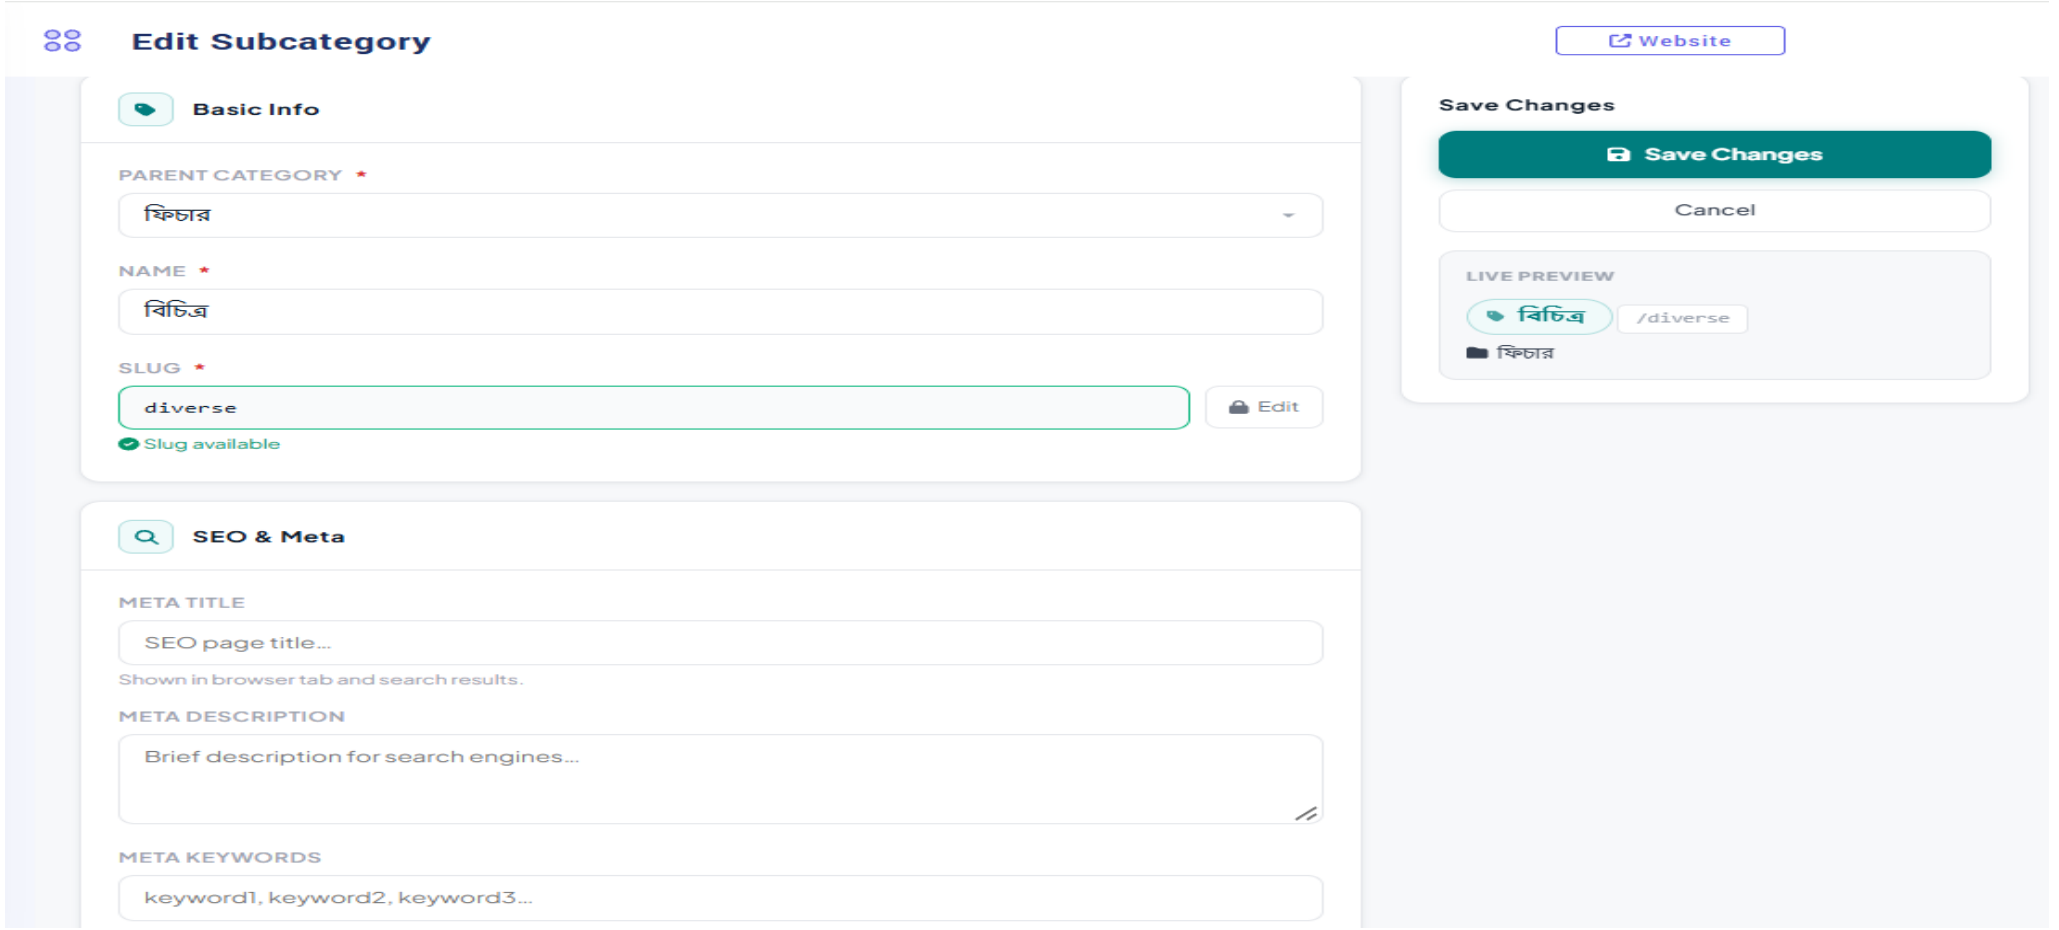

CREATE SUBCATEGORY

- In the creation form, select a **Parent Category** (required), then enter the subcategory **Name** and **Slug**. The slug auto-generates from the name; click the **Lock** icon to edit it manually. The **Live Preview** panel shows how the subcategory label will appear.
- In the **SEO & Meta** section, add a **Meta Title**, **Meta Description**, and **Meta Keywords** to optimize the subcategory page for search engines. Click **Create Subcategory** to save, or **Cancel** to discard.

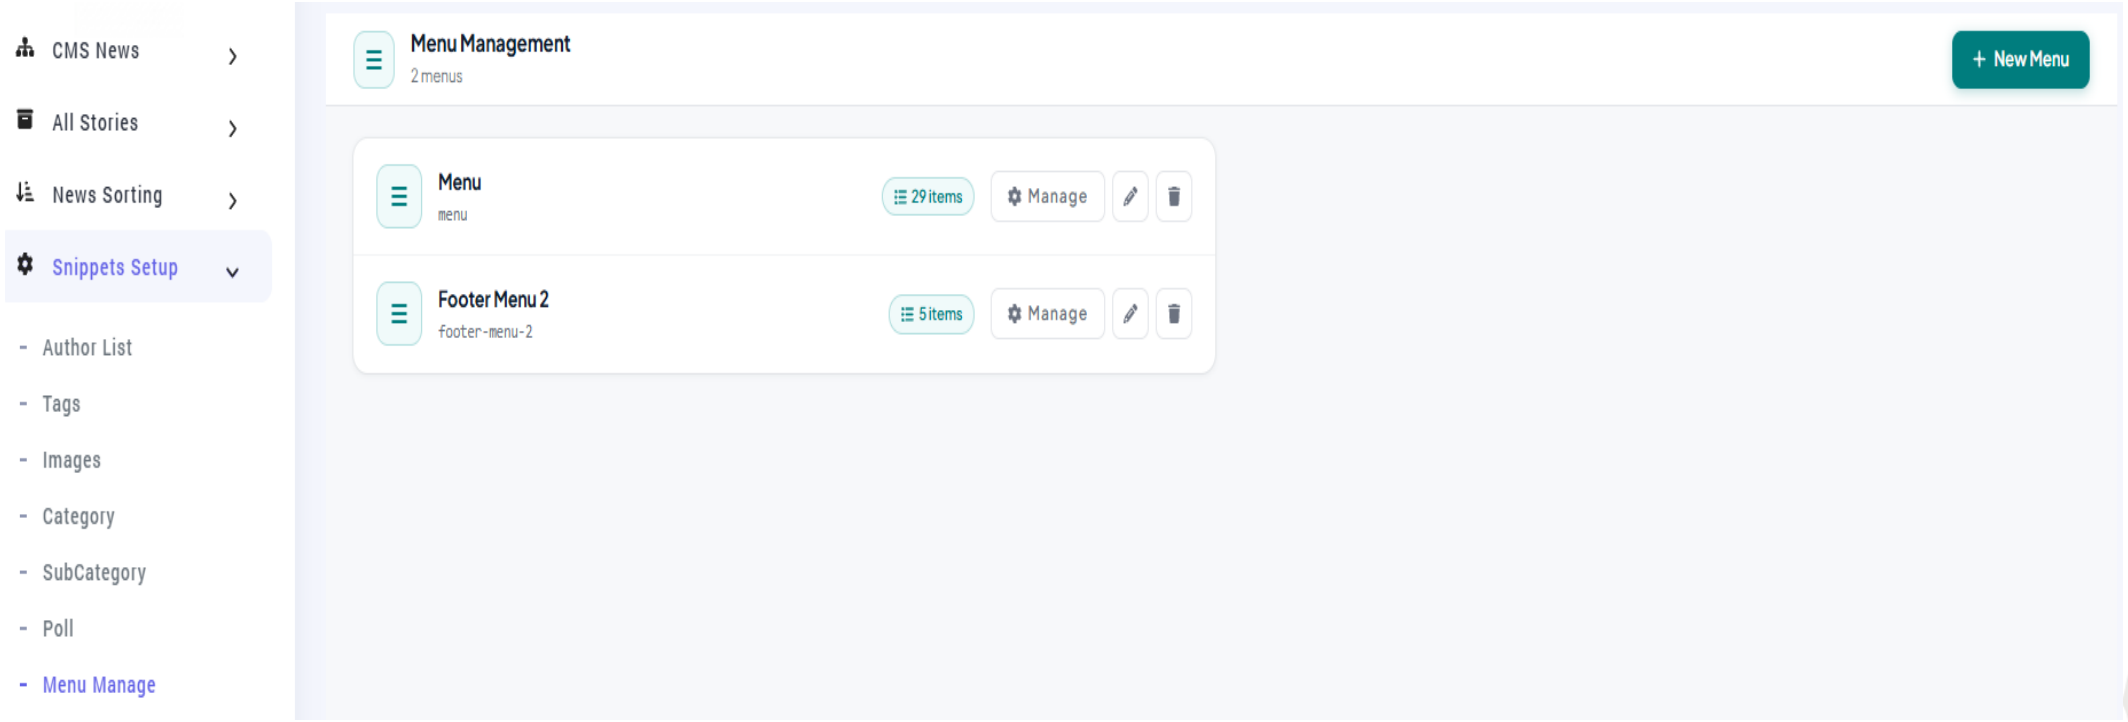

EDIT SUBCATEGORY

- Click the edit option on any subcategory row to open the edit form with all fields pre-filled. Update the **Parent Category**, **Name**, or **Slug** as needed. The slug can be manually edited and the system will confirm availability. Adjust the **SEO & Meta** fields if required. The **Live Preview** updates in real time. Click **Save Changes** to apply updates, or **Cancel** to discard them.

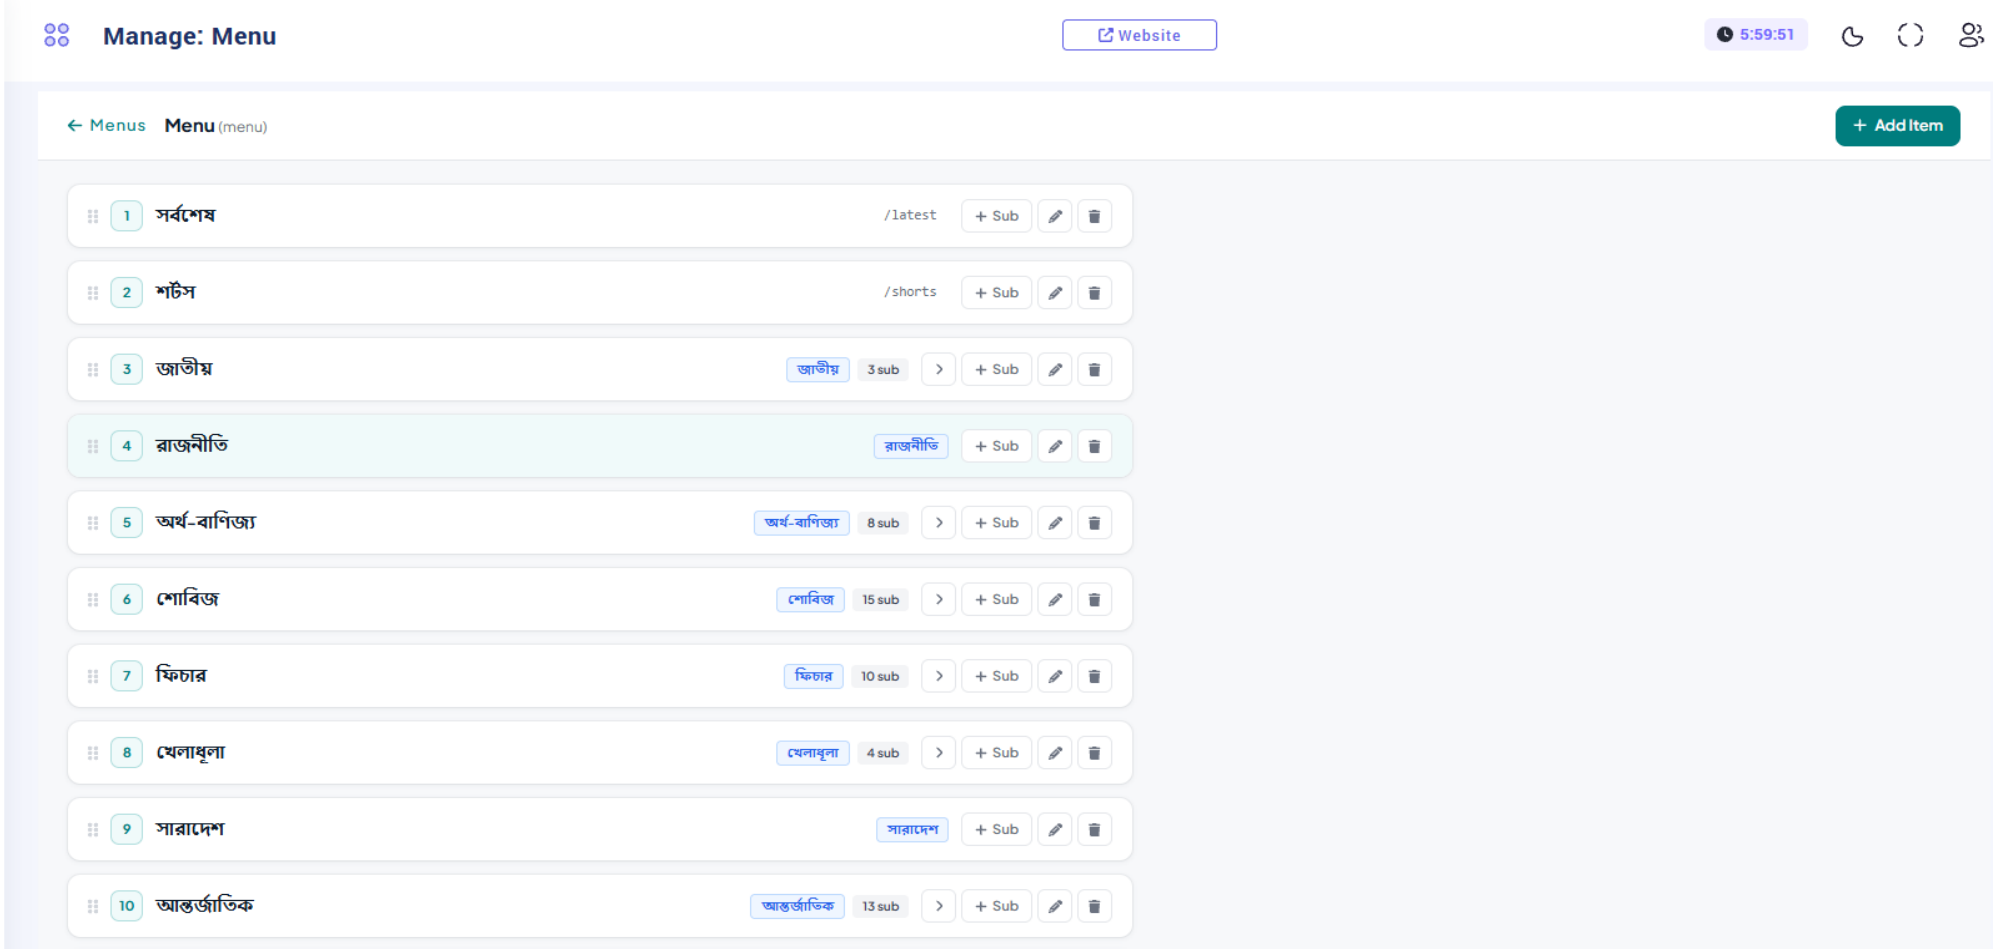

MENU MANAGEMENT

- This section controls the navigation menus displayed on the public website.
- **Menu List**
- The main page lists all navigation menus (for example, "Menu" and "Footer Menu 2"). Each menu shows its item count and action buttons to **Manage**, **Edit**, or **Delete**. Click **+ New Menu** to create a new menu group by entering a **Title** and **Slug**.

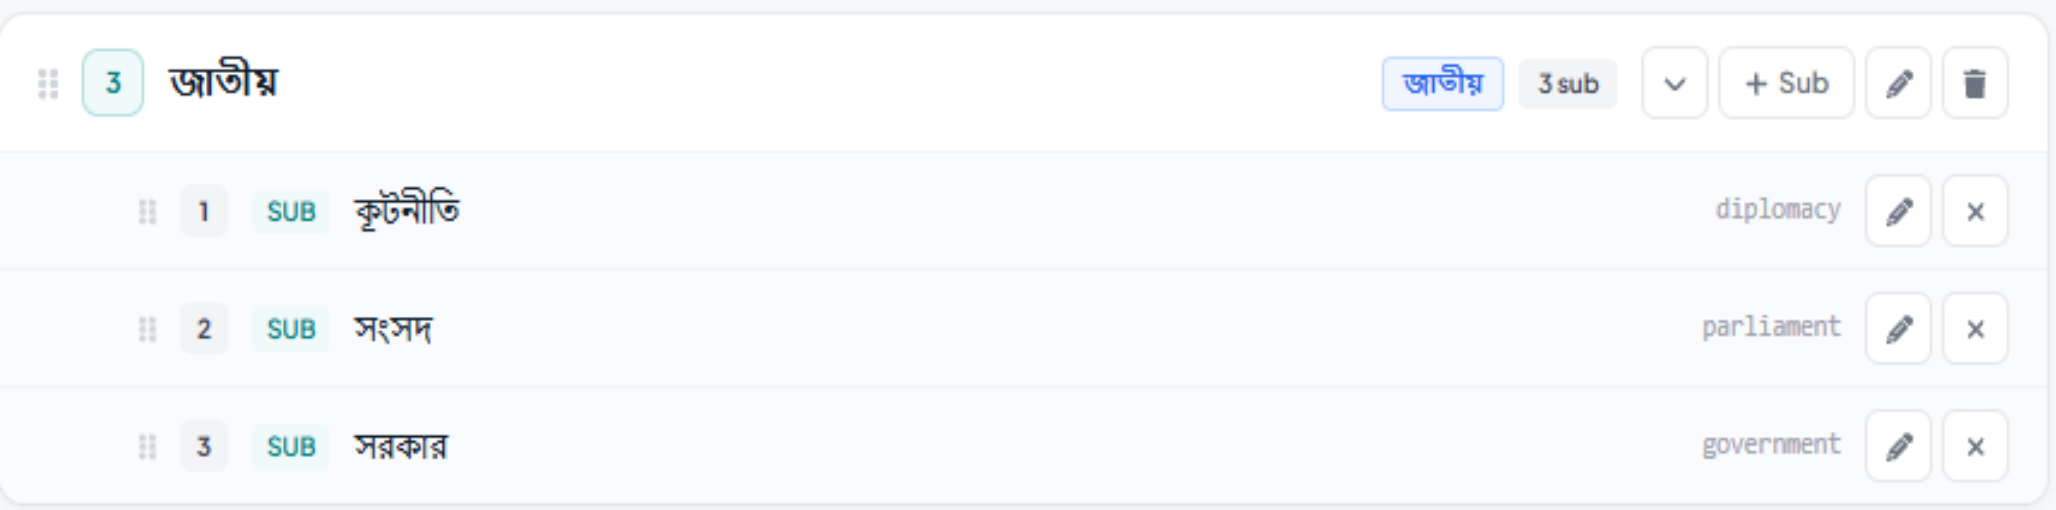

MANAGE MENU

- Click **Manage** to open the menu builder. This page displays all top-level menu items in a vertical list. Drag items using the handle icons to reorder them. Each item shows its sequence number, display name, URL path, and available sub-items count.

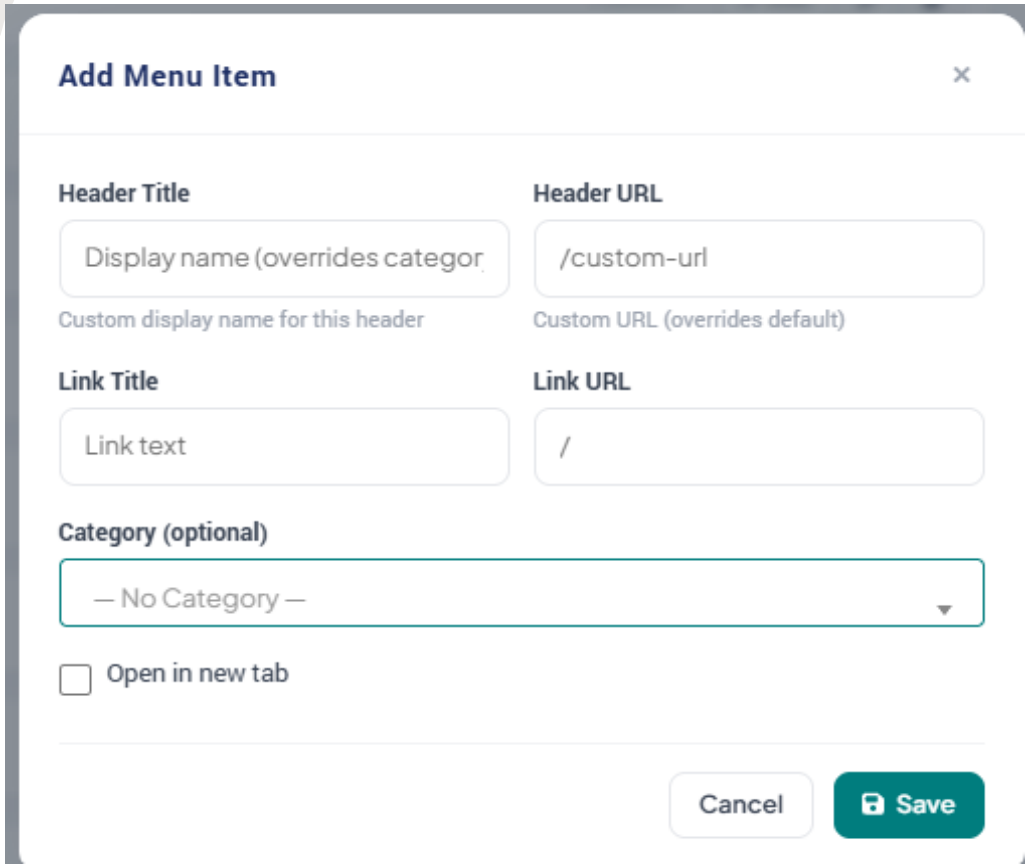

MENU ITEM ACTIONS

- **+ Sub**: Add a dropdown or submenu item under that menu.
- **Edit**: Modify the menu item details.
- **Delete**: Remove the item from the menu.
- **Expand arrow**: Click to view and manage existing sub-items under that menu.

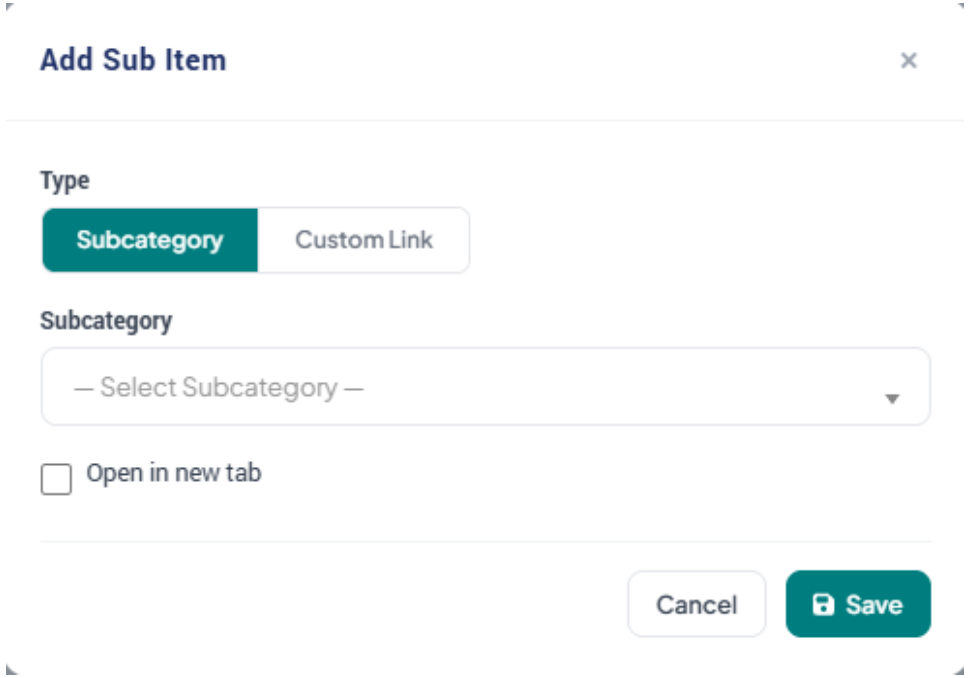

ADD MENU ITEM

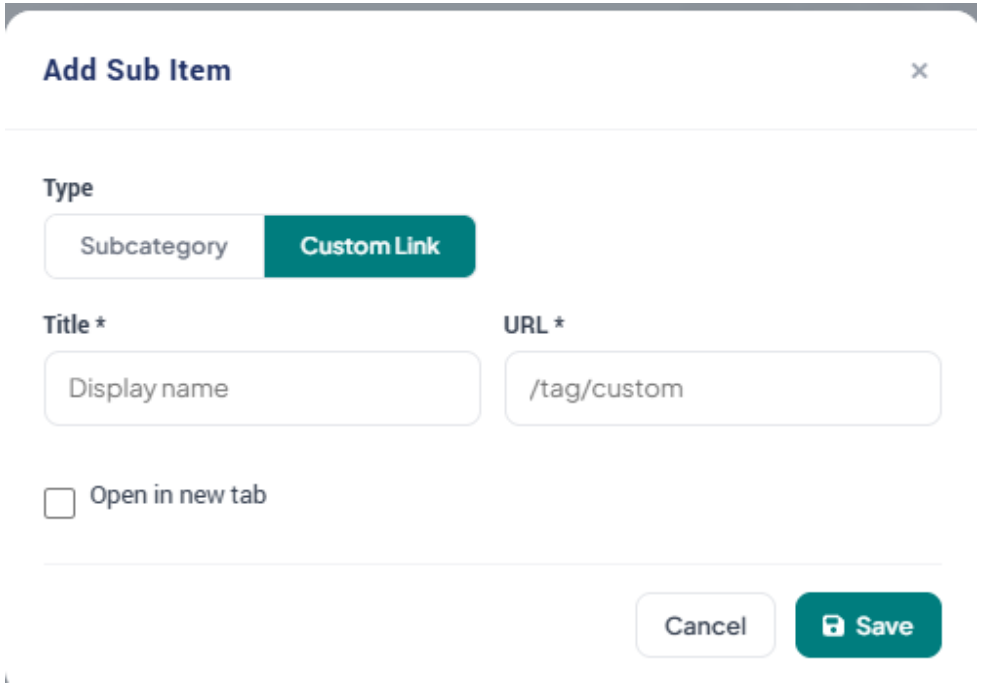

- Click **+ Add Item** to create a top-level menu entry. The form includes:
- **Header Title**: Custom display name for the menu (overrides the category name if set).
- **Header URL**: Custom URL path (for example, `/latest`, `/shorts`).
- **Link Title / Link URL**: Additional link text and destination if needed.
- **Category**: Optionally link directly to an existing category.
- **Open in new tab**: Check to open the link in a new browser tab.

SUB MENU ITEMS

- When a menu item has sub-items, expanding it shows a nested list. In the example, the **জাতীয়** (National) menu contains three sub-items: **কূটনীতি** (Diplomacy), **সংসদ** (Parliament), and **সরকার** (Government).
- Add Sub Item
- Click **+ Sub** on any menu item to add a dropdown entry. Choose the **Type**:
- **Subcategory**: Select an existing subcategory from the dropdown to link automatically.
- **Custom Link**: Manually enter a **Title** and **URL** (for example, `/tag/custom`).
- Check **Open in new tab** if needed, then click **Save** to add the sub-item.

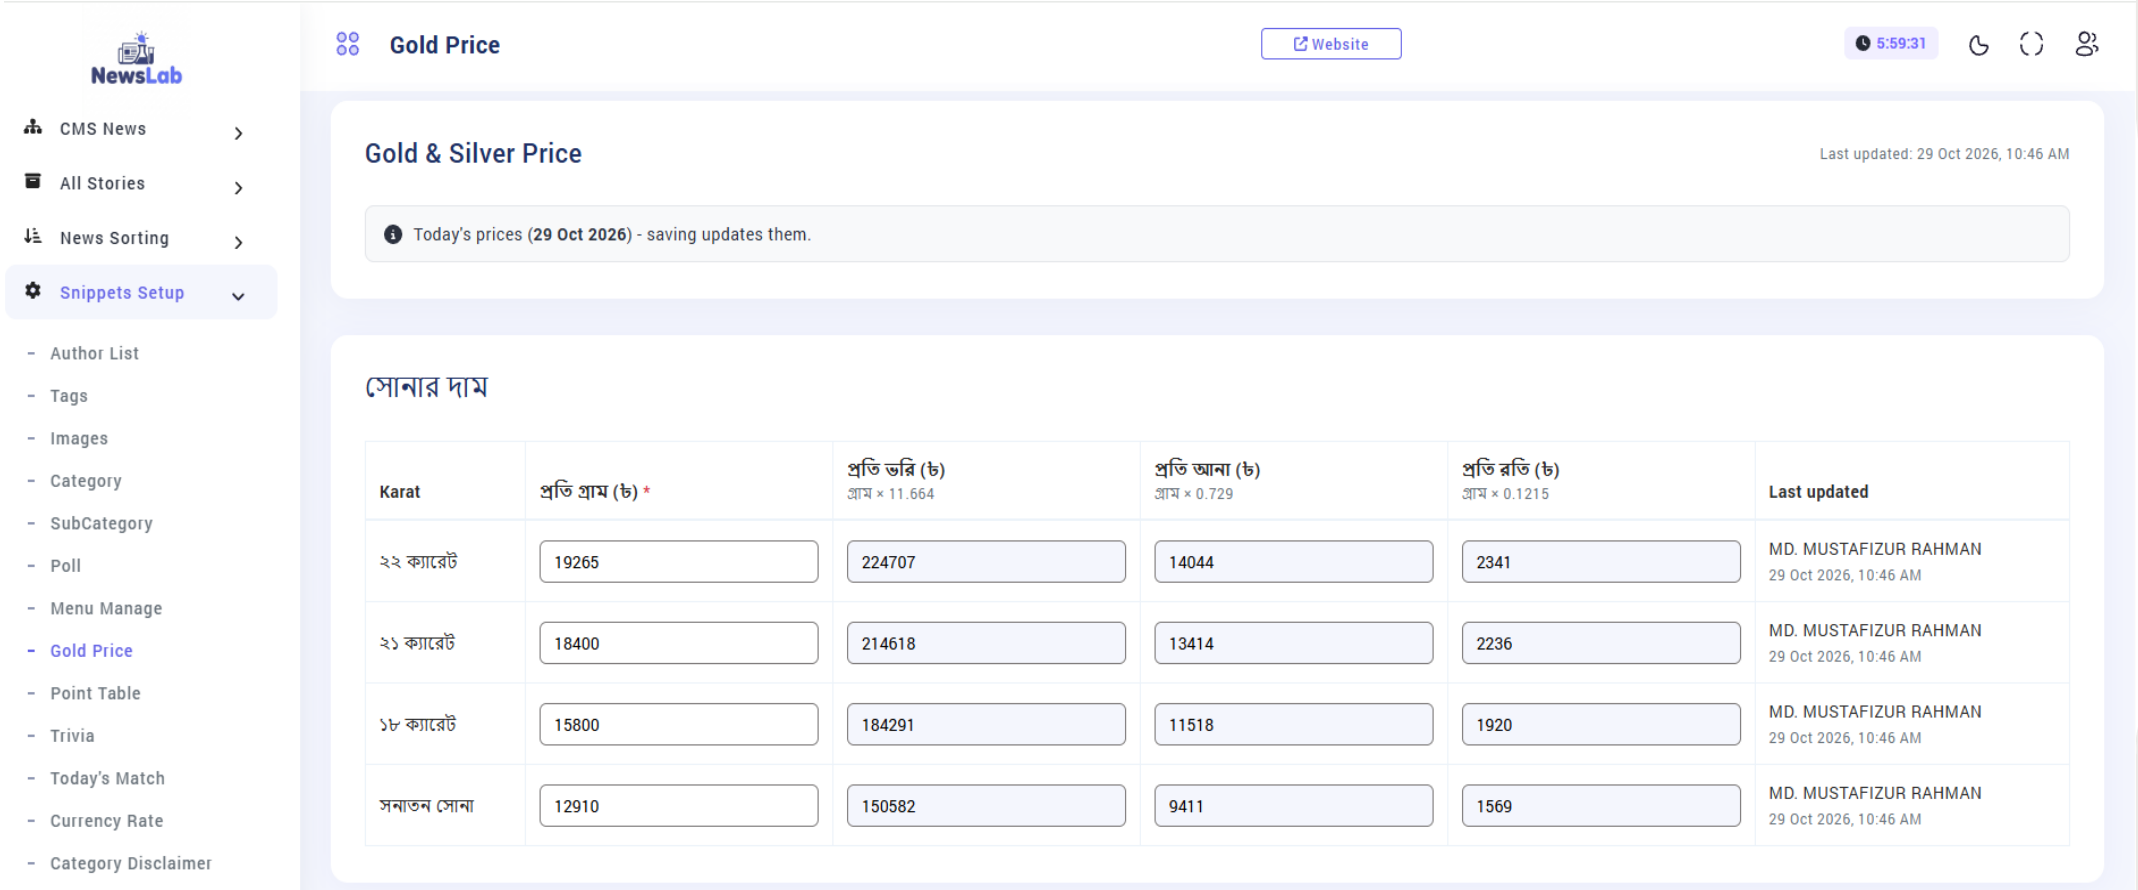

GOLD PRICE MANAGEMENT

- This page allows administrators to manage and update daily precious metal prices displayed on the website. It is divided into two sections: **Gold & Silver Price** (সোনার দাম) and **Copper Price** (কপার দাম).
- **Gold & Silver Price**
- The first table manages gold and silver rates by karat. Each row represents a different purity level (for example, 22 karat, 21 karat, 18 karat, and traditional/sanaton gold). The columns include:
- **Karat**: The gold purity classification.
- **Price per gram (৳)**: The base price per gram in BDT.
- **Price per bhari (৳)**: The price per bhari (a traditional South Asian unit), automatically calculated using the formula shown in the header (gram × 11.664).
- **Price per ana (৳)**: The price per ana, calculated as (gram × 0.729).
- **Price per rati (৳)**: The price per rati, calculated as (gram × 0.1215).
- **Last updated**: Shows the user who last modified the row and the timestamp.
- **Copper Price**
- The second table follows a similar structure for copper rates across different categories or purity levels. Each row has editable fields for the gram price and the calculated derivative prices.

- How to Update

- Click into any price input field to edit the value. The system uses the gram price as the base and automatically calculates the other columns based on the displayed formulas. After making changes, scroll to the bottom and click **Update** to save the new prices. Click **Cancel** to discard changes. A notice at the top confirms that saving will update today's prices, and the **Last updated** timestamp refreshes accordingly.

POINT TABLE

- This section manages sports tournament standings and point tables displayed on the website.
- **Tournament List**
- The main page lists all created tournaments. Each row shows the tournament name, number of teams, activation status, last updated timestamp, and an edit button. Use the search bar to find tournaments by name. Click **+ Add Tournament** to create a new point table.
- Toggle the **Status** switch to **Active** to display the tournament on the website, or set it to **Inactive** to hide it.
- **Add Point Table / Create Tournament**
- Click **+ Add Tournament** to set up a new tournament standings table.
- **Tournament Name**: Enter the tournament title (required), for example "Asia Cup 2026".
- **Active**: Toggle on to make the point table visible on the public website.
- **Teams Section**
- Add teams to the point table using the inline form:
- **Team**: Enter the team name (required).
- **Play**: Number of matches played.
- **Won**: Matches won.

- **Loss**: Matches lost.
- **Draw**: Drawn matches.
- **No Result**: Matches with no result.
- **Net Run Rate**: The team's net run rate.
- **Point**: Total points earned.
- Click **+ Add more** to add additional team rows. Use the arrow buttons to reorder teams, or the delete button to remove a row.
- **Important Notes**
- You can type in Bangla or English. All values are saved exactly as entered.
- Only the **Team Name** is required. Completely empty rows are ignored.
- The website displays teams in the exact order you set in this form.
- Click **Save** to publish the point table, or **Cancel** to discard changes.

+ Add more

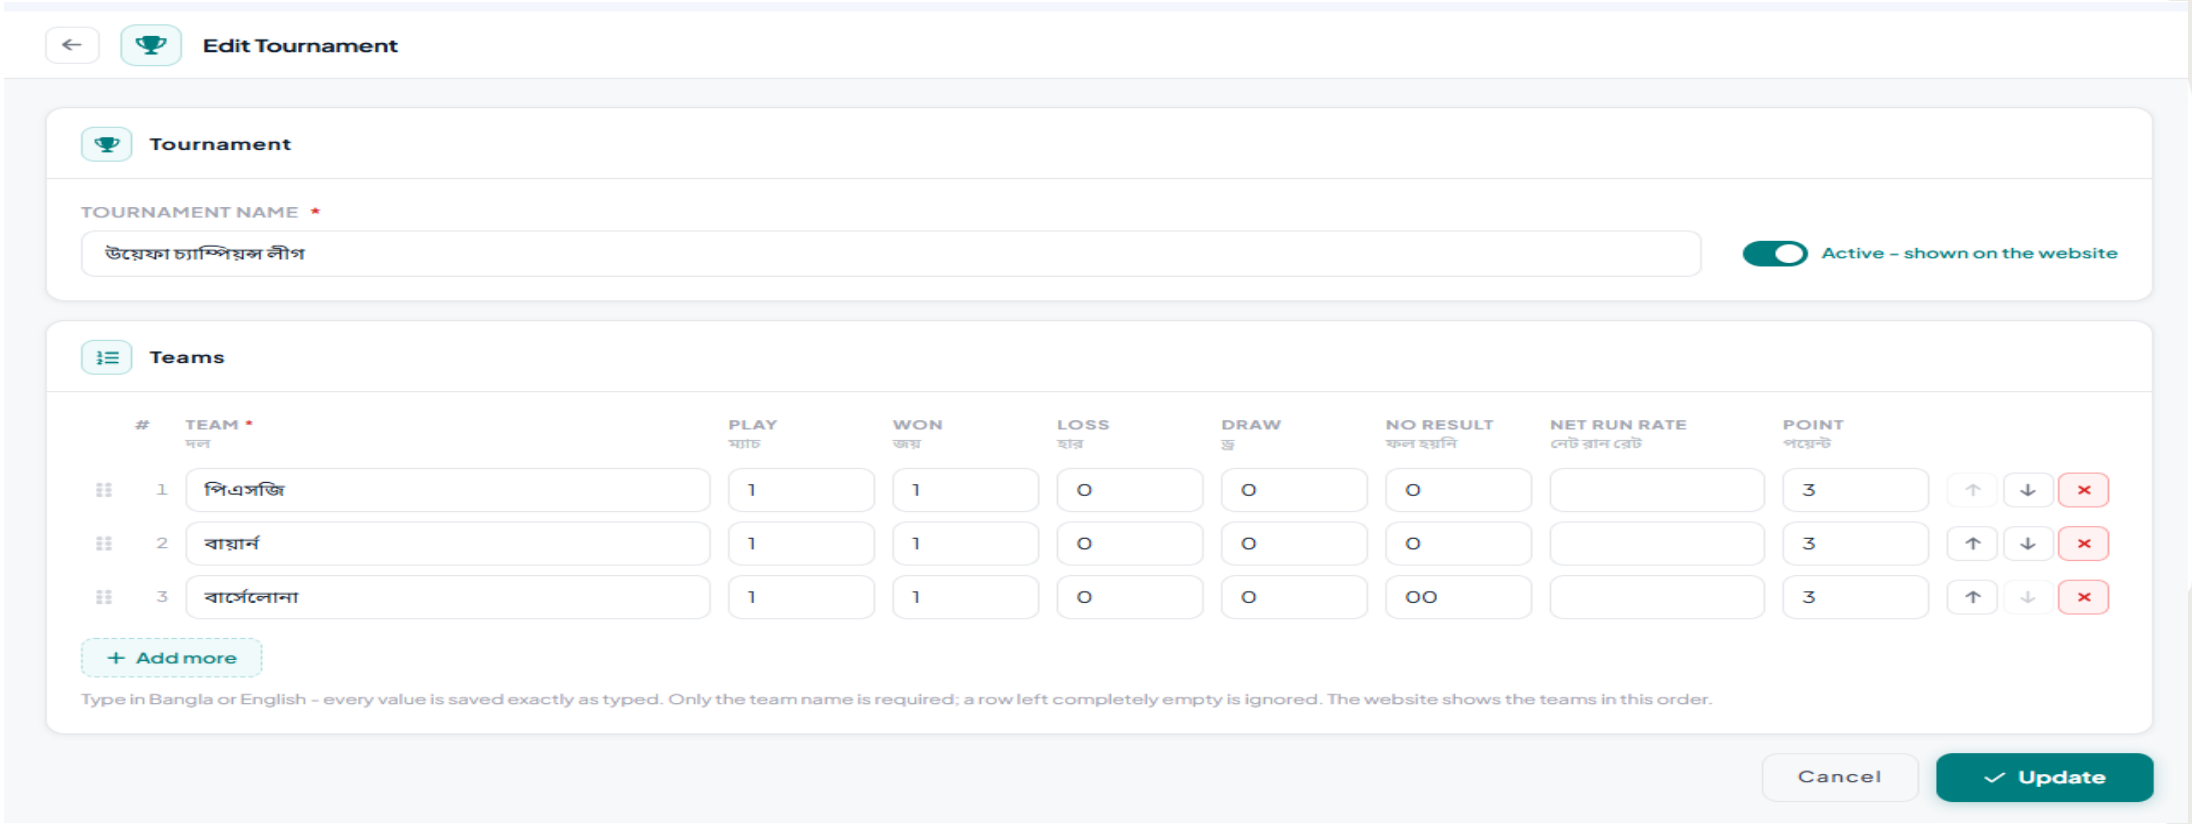

Type in Bangla or English - every value is saved exactly as typed. Only the team name is required; a row left completely empty is ignored. The website shows the teams in this order.

Cancel

Save

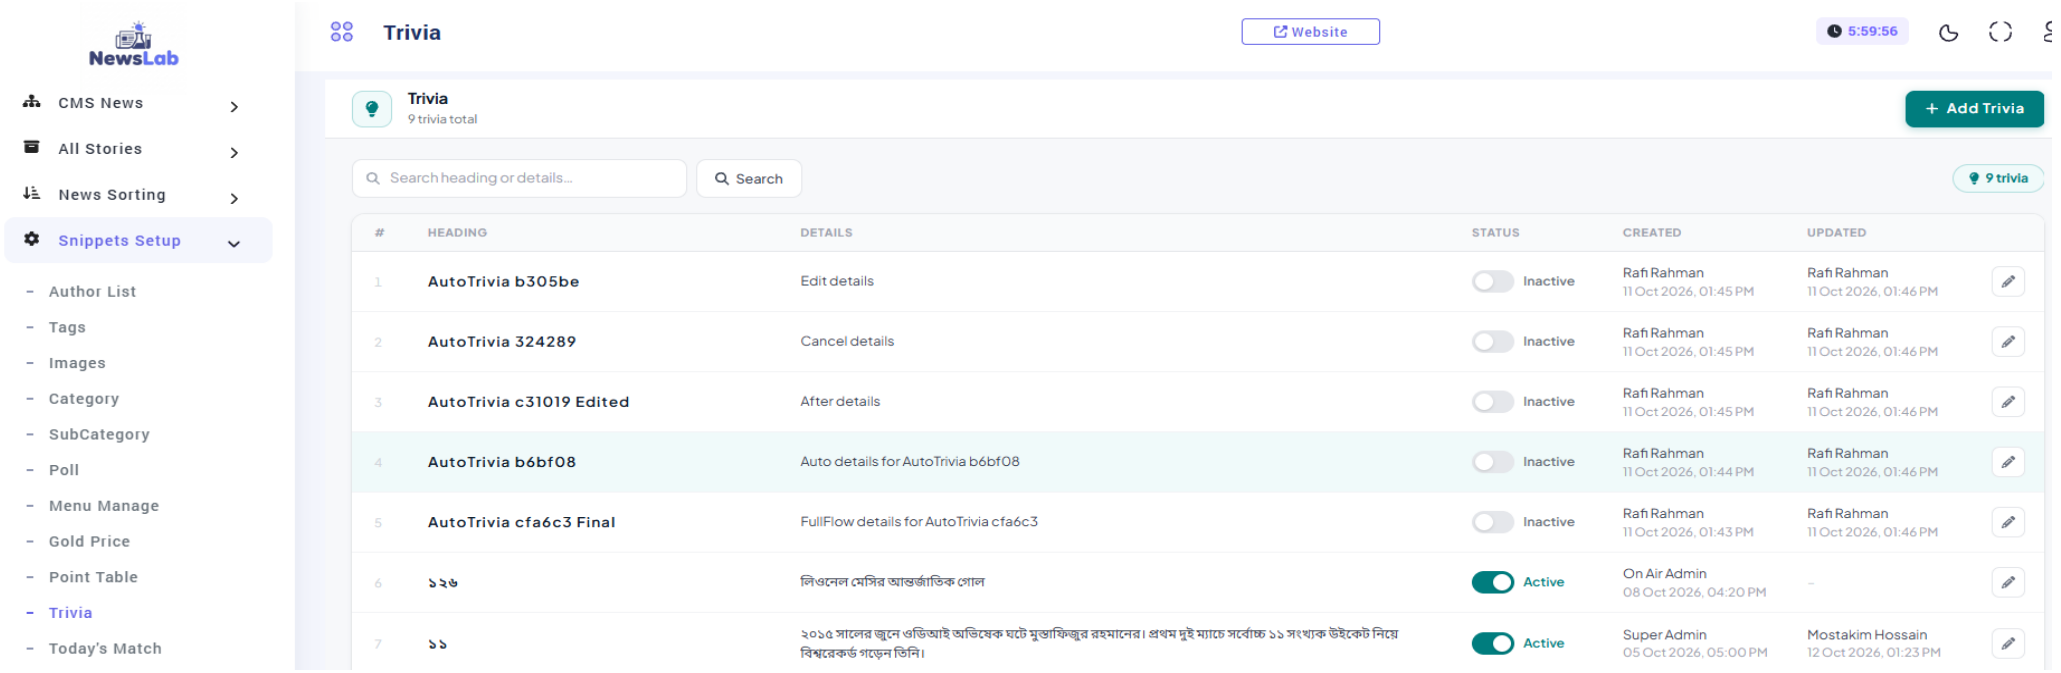

EDIT TOURNAMENT

- Click the edit icon on any tournament to open the **Edit Tournament** form. The page loads the existing tournament name and all team data pre-filled. Update the **Tournament Name** if needed, toggle **Active** to show or hide it on the website, and modify team statistics directly in the table. Use the arrows to reorder teams, the red **X** to remove a row, or **+ Add more** to insert new teams. Only the **Team Name** is required; empty rows are ignored. Click **Update** to save changes, or **Cancel** to discard them.

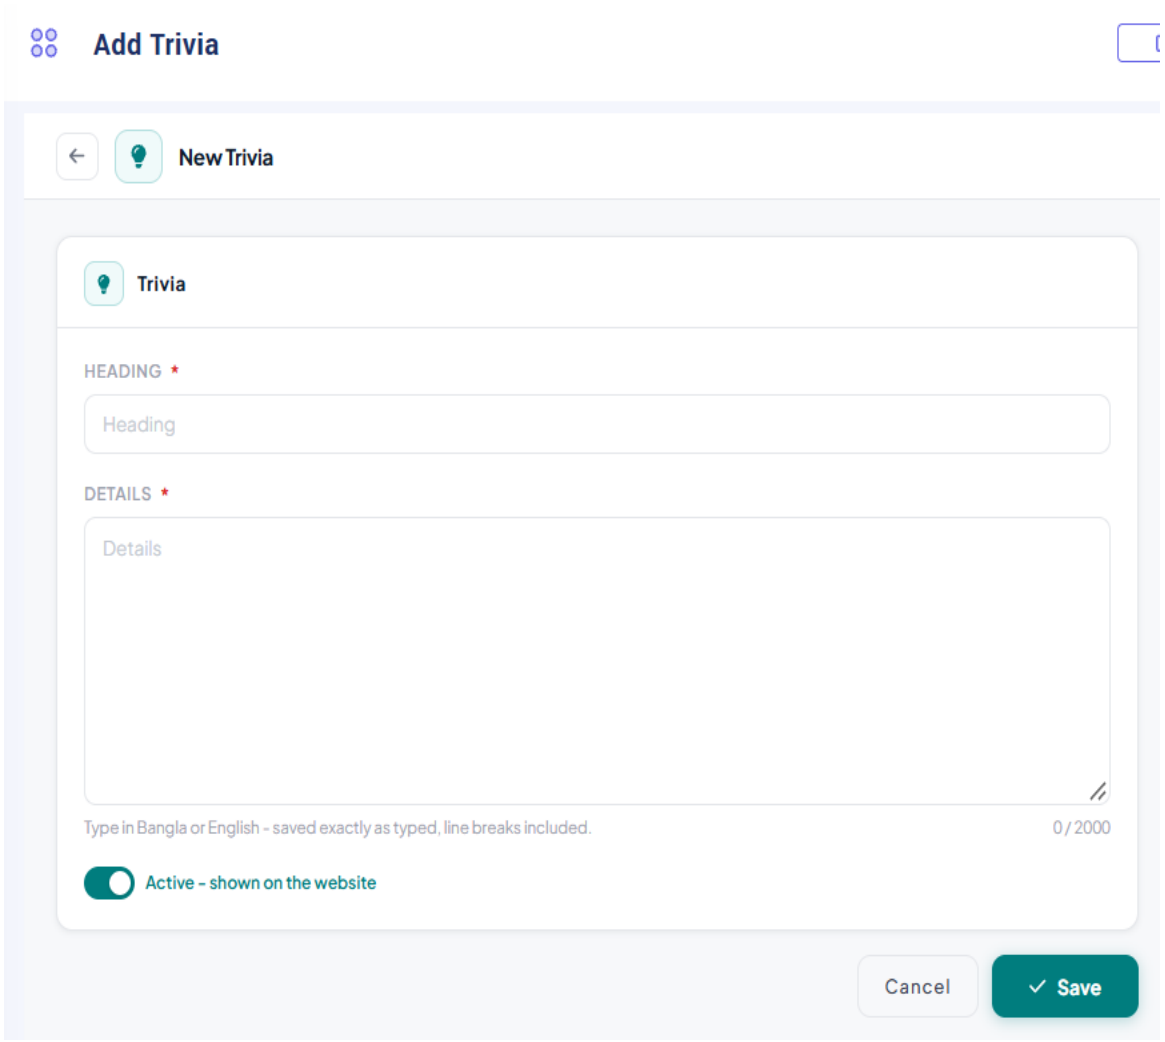

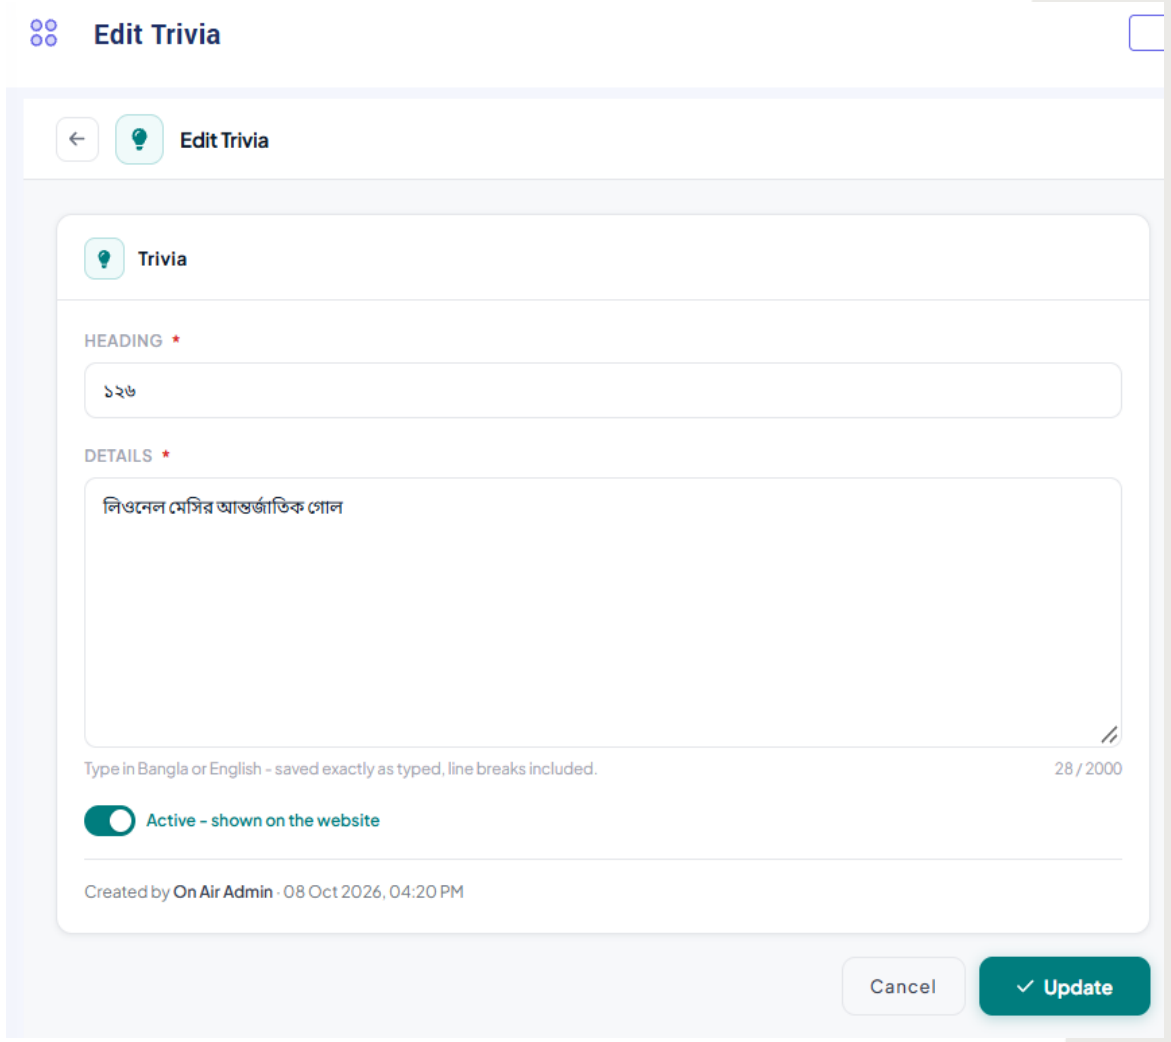

TRIVIA

- Manage bite-sized fact boxes or sidebar snippets displayed across the website. The list shows all trivia items with their heading, detail preview, active/inactive status, creator, and last updater. Toggle the **Status** switch to show or hide an item on the site.
- Click **+ Add Trivia** to create a new item. Enter a **Heading** and **Details** (maximum 2,000 characters). Content can be typed in Bangla or English and is saved exactly as entered, including line breaks. Toggle **Active** to make it visible immediately, then click **Save**.
- Click the **Edit** icon on any row to modify the heading, details, or active status. The edit form shows the original creator and creation date. Click **Update** to apply changes or **Cancel** to discard them.

ADD AND EDIT TRIVIA

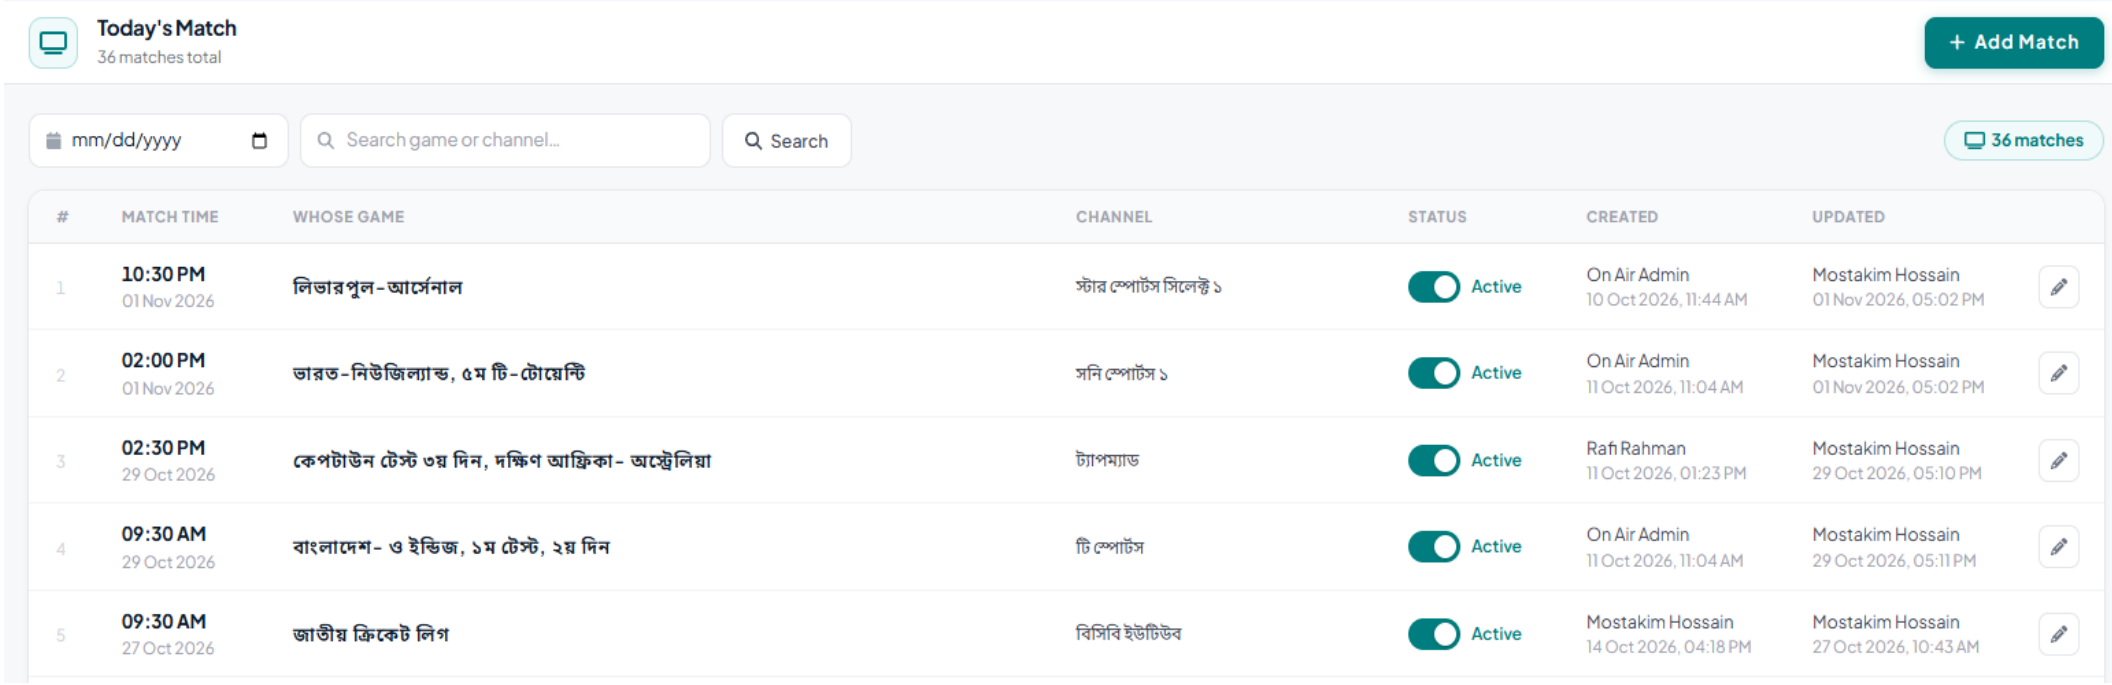

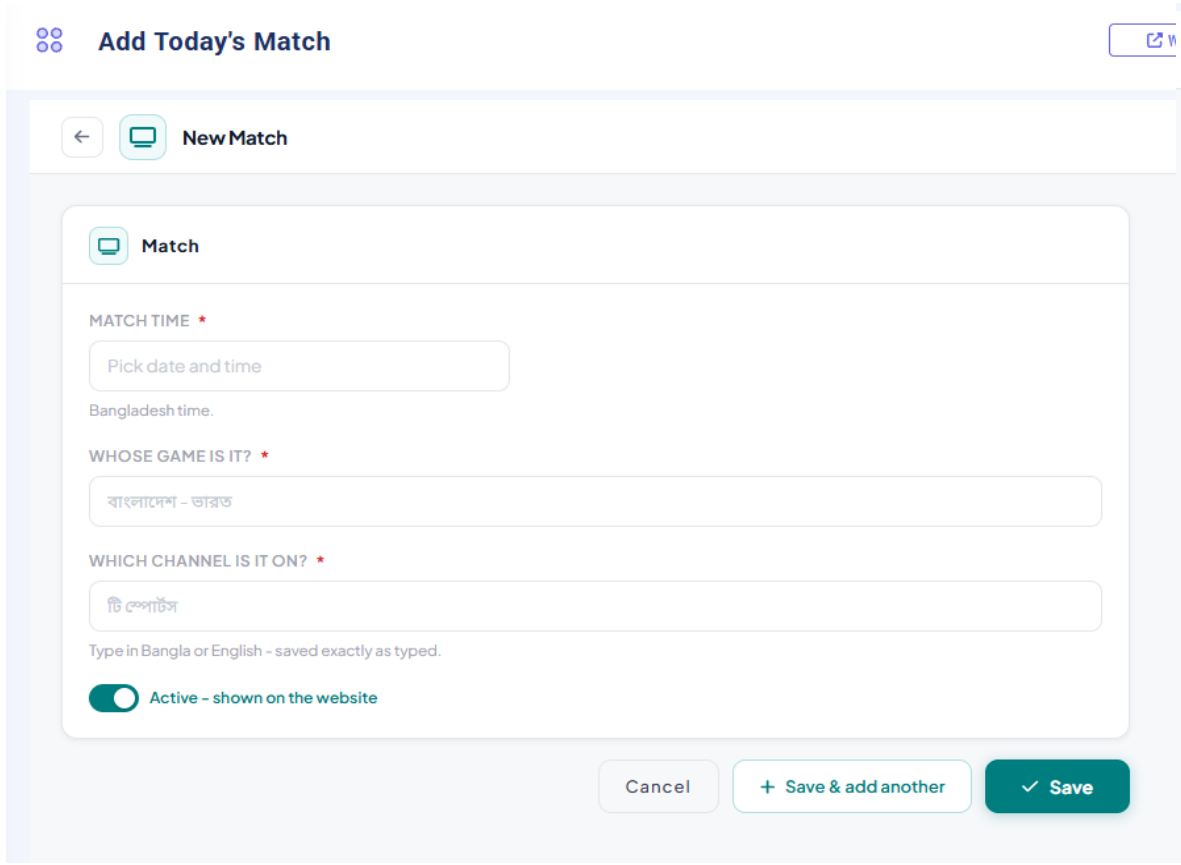

TODAY'S MATCH

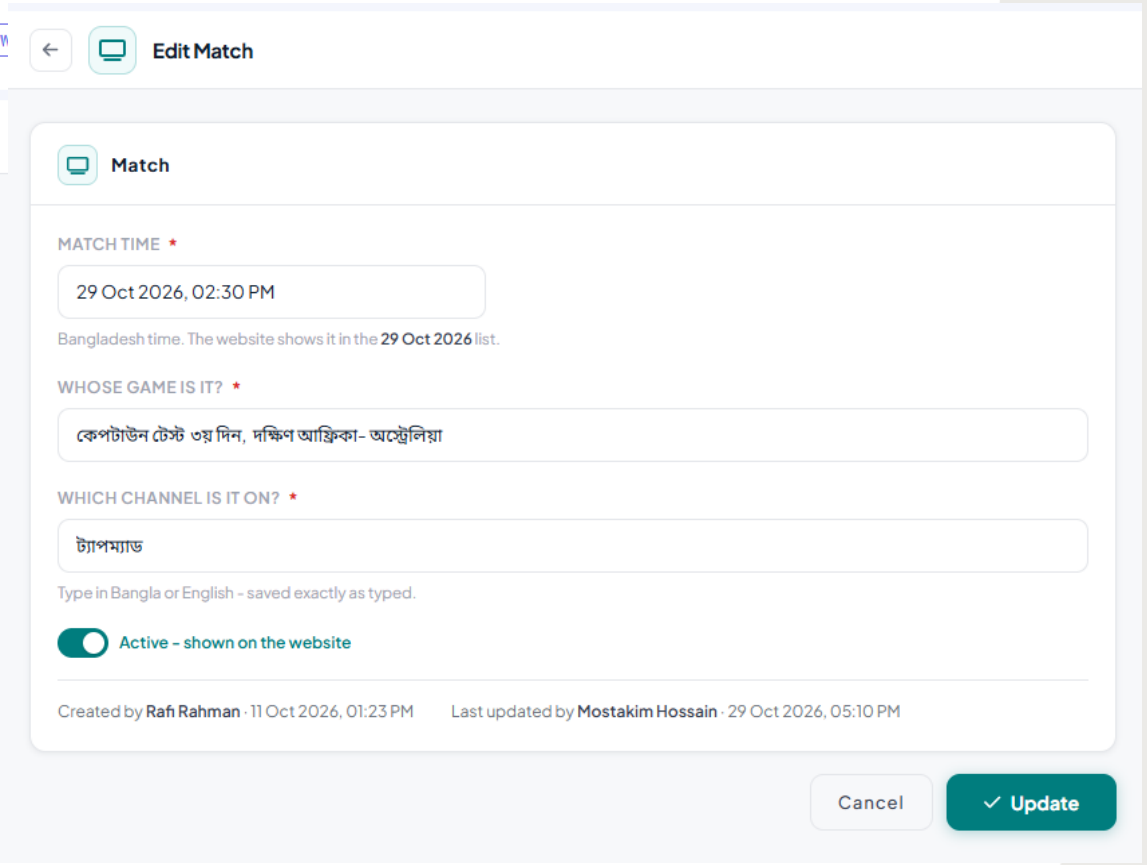

- Manage upcoming sports match schedules displayed on the website. The list page shows all matches with their **Match Time**, **Teams/Game**, **Channel**, **Status** (Active/Inactive), creator, and last updater. Use the **date picker** to filter by specific dates, or the **search bar** to find matches by game or channel name. Toggle the **Status** switch to **show or hide a match on the site**.
- Add Match
- Click **+ Add Match** to schedule a new match. Fill in:
- **Match Time**: Select the date and time in Bangladesh time (required).
- **Whose Game Is It?**: Enter the competing teams or event name (required).
- **Which Channel Is It On?**: Enter the broadcasting TV channel or platform (required).
- Toggle **Active** to make it visible immediately. Click **Save** to add the match, **Save & add another** to quickly add more matches, or **Cancel** to discard.
- Edit Match
- Click the **Edit** icon on any match row to update its details. The form opens with all fields pre-filled, showing the original creator and last updater with timestamps. Modify the match time, teams, or channel as needed, adjust the active status, then click **Update** to save changes or **Cancel** to discard them.

ADD/EDIT MATCH

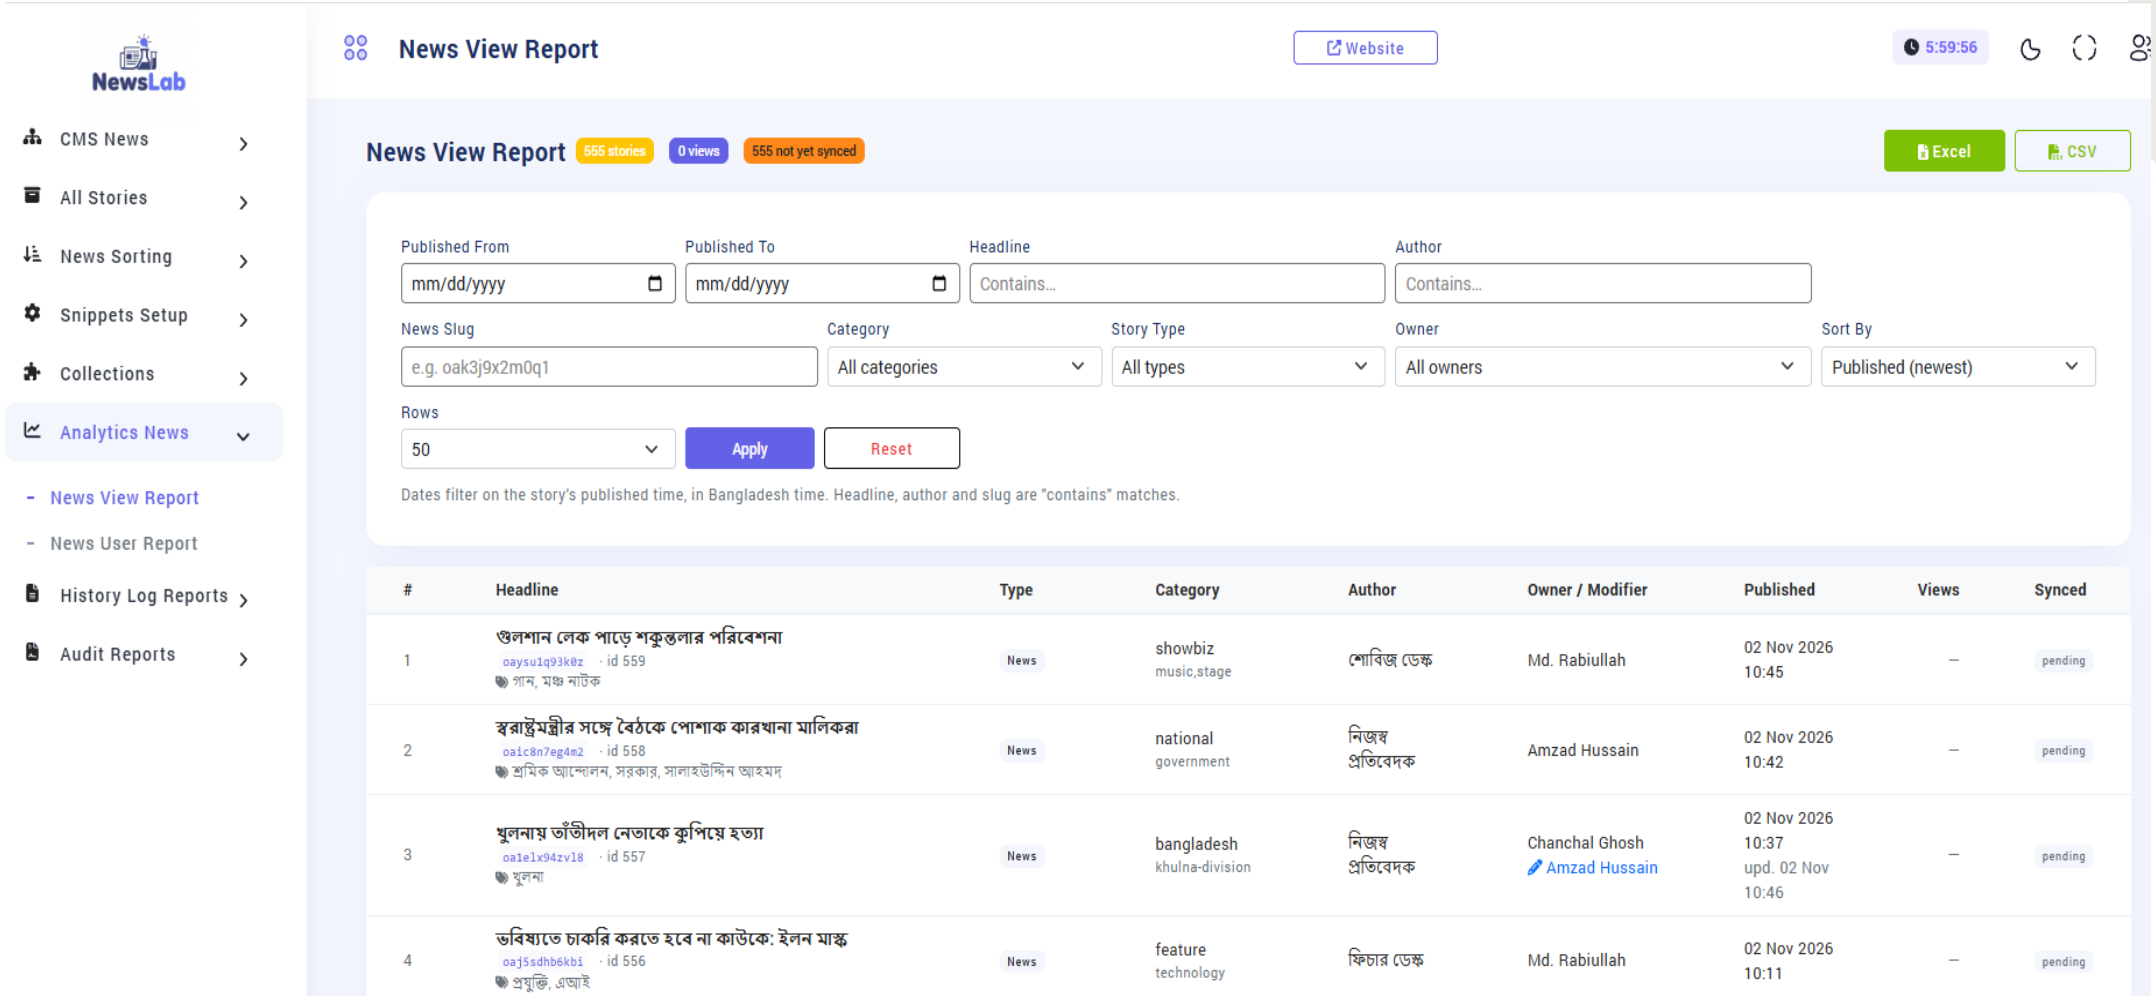

NEWS VIEW REPORT

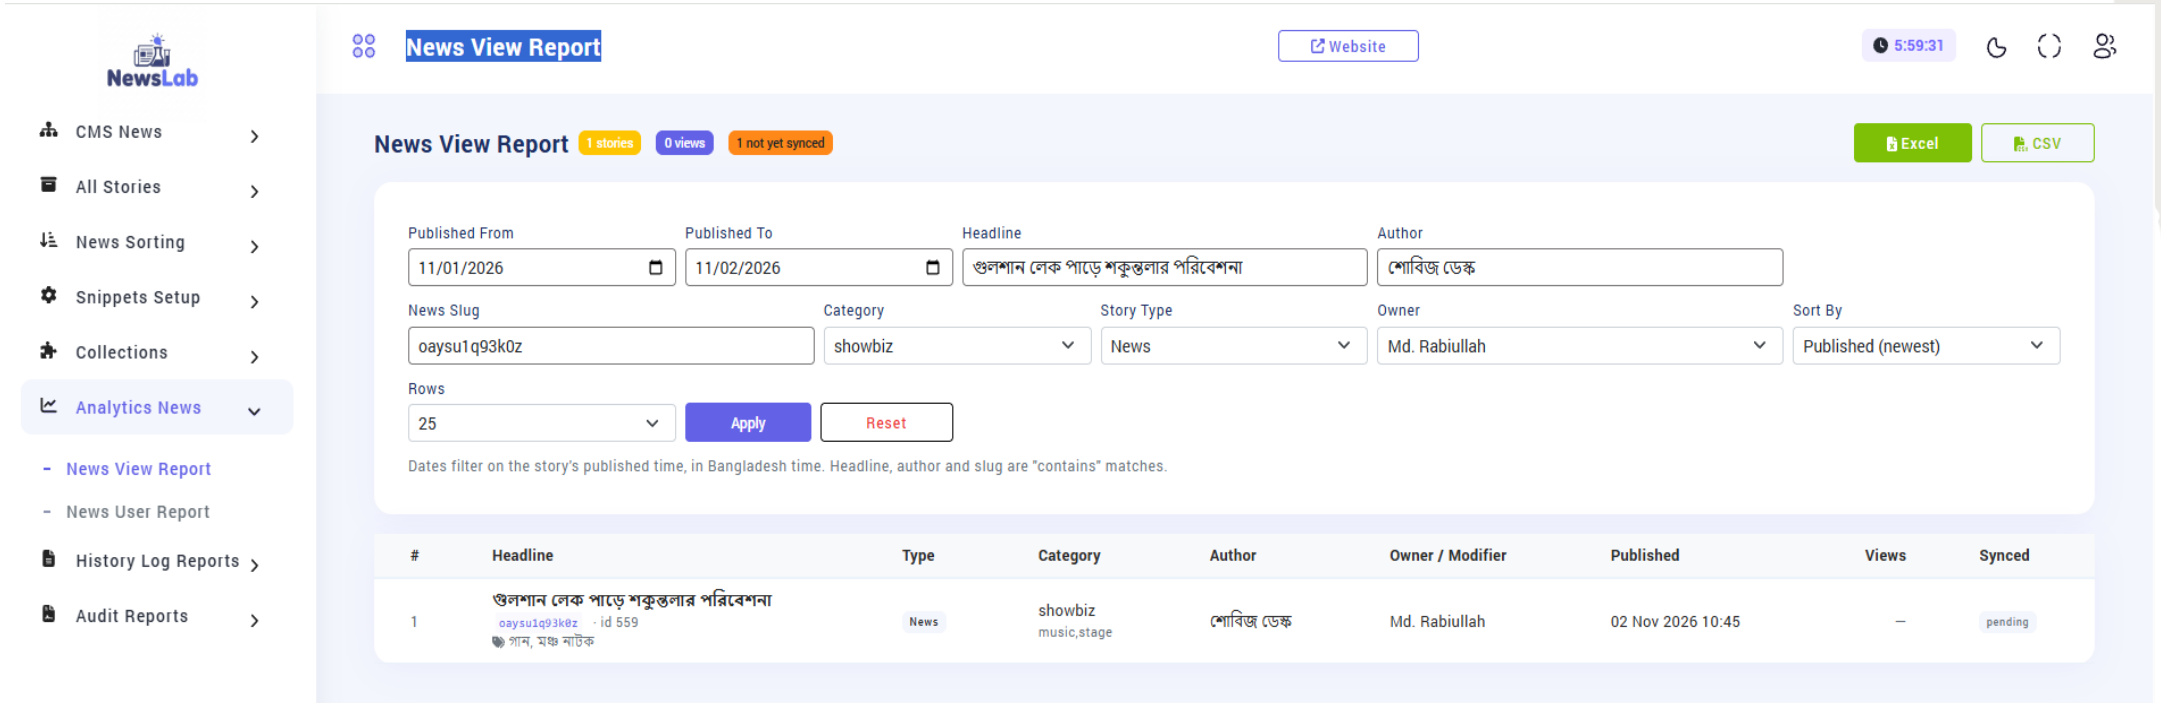

- This analytics page provides a detailed report of published news stories and their view counts. The top summary badges show the total number of stories in the current report, total views, and how many stories have not yet been synced with the analytics system.
- Filters & Search
- Use the filter panel to narrow down the report results:
- **Published From / Published To**: Select a date range to filter stories by their publication date in Bangladesh time.
- **Headline**: Search for stories containing specific words in the headline.
- **Author**: Filter by stories containing a specific author name.
- **News Slug**: Search using the story's URL slug or ID.
- **Category**: Filter by the assigned story category.
- **Story Type**: Filter by content type (for example, News, Video story, Photo story).
- **Owner**: Filter by the story owner or modifier.
- **Rows**: Choose how many results to display per page (for example, 25 or 50).
- Click **Apply** to execute the filtered search, or **Reset** to clear all filters and return to the full list.

- Report Table
- The results table displays each story with the following columns:
- **Headline**: The story title, with the story slug and ID shown underneath.
- **Type**: The format of the content (for example, News).
- **Category**: The assigned category and subcategory.
- **Author**: The story's author.
- **Owner / Modifier**: The user who owns or last modified the story.
- **Published**: The exact publication date and time.
- **Views**: The total number of views the story has received.
- **Synced**: The synchronization status with the analytics system (for example, "pending").
- Export
- Click the **Excel** or **CSV** buttons at the top right to download the current report results in your preferred format.
- Filtered Results
- After applying filters, the summary badges and table update to show only the matching stories. In the example, filtering by date range, headline keyword, news slug, category (showbiz), story type (News), and owner (Md. Rabiullah) narrows the result down to a single matching story.

NEWS VIEW REPORT LIST

SEARCH RESULT

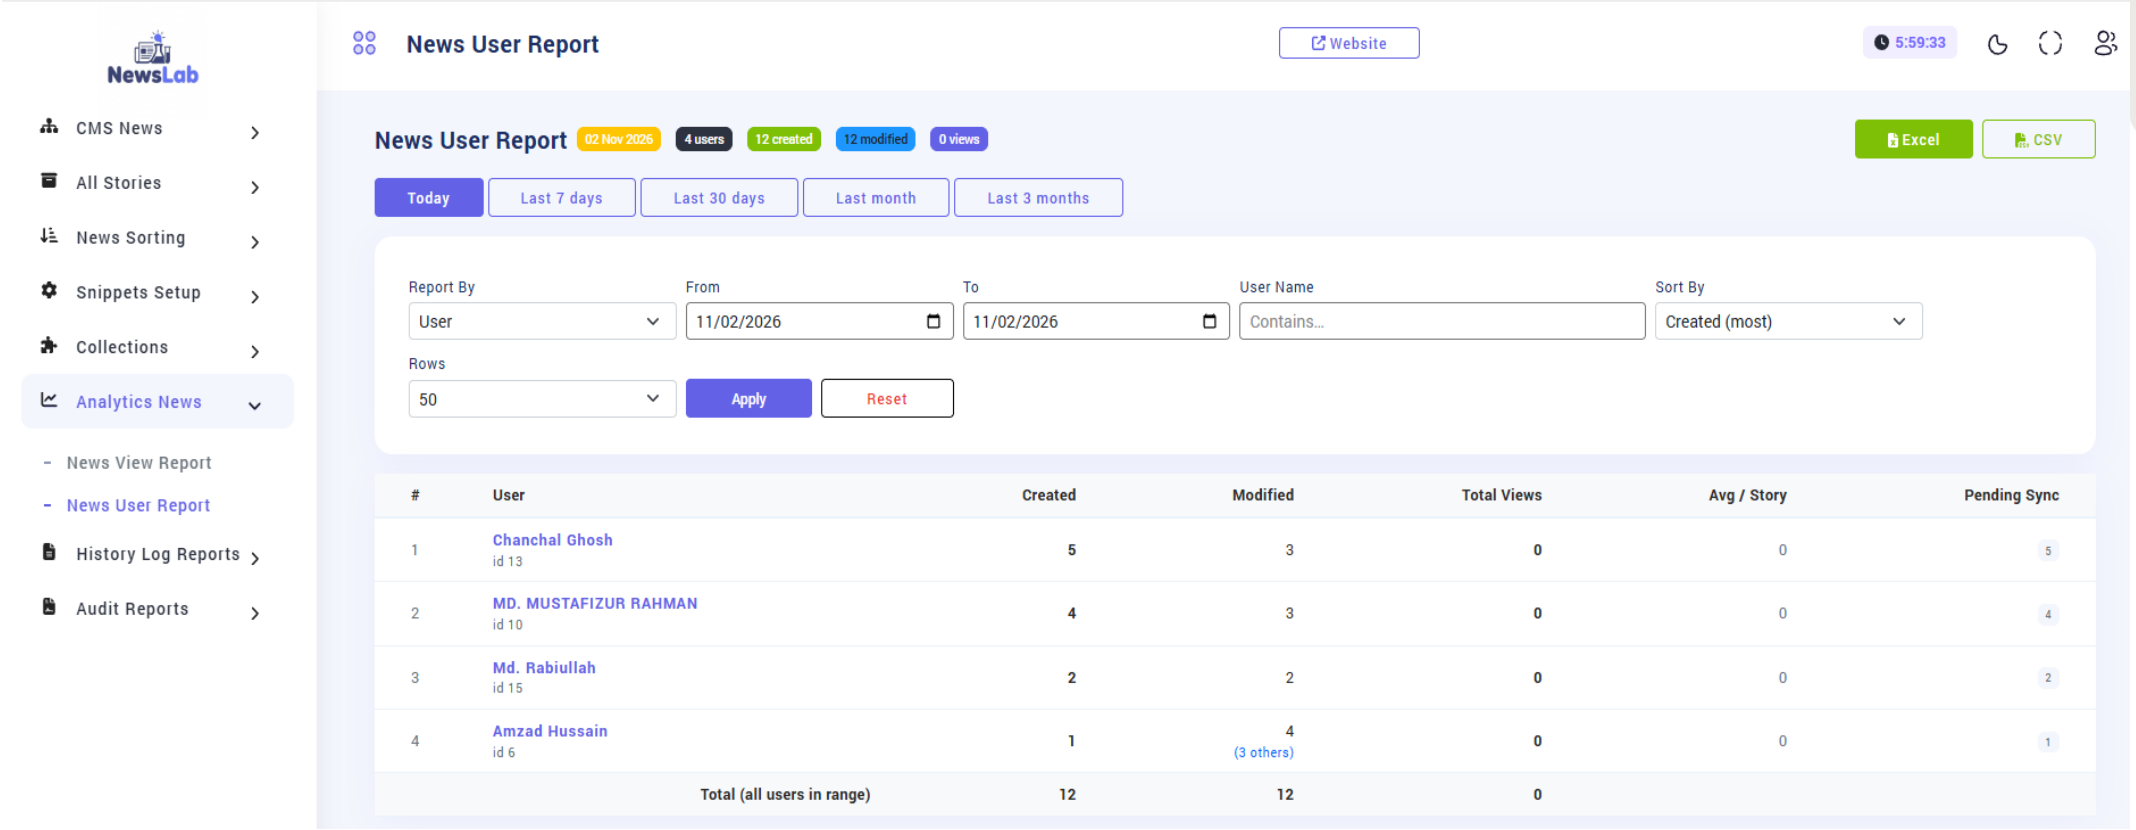

NEWS USER REPORT

- This analytics page tracks and compares content creation and modification activity across all CMS users over a selected time period.
- Quick Date Filters
- At the top, one-click buttons let you instantly switch between preset reporting periods:
- **Today**: Shows only today's activity.
- **Last 7 days**: Shows the previous week of data.
- **Last 30 days**: Shows the last 30 days of activity.
- **Last month**: Shows the previous calendar month.
- **Last 3 months**: Shows the last quarter of data.
- Clicking any of these automatically updates the date range fields and refreshes the report.
- Summary Badges
- Below the quick filters, colored badges display key metrics for the selected period:
- **Date range**: The current reporting period (for example, "02 Nov 2026" or "04 Oct 2026 – 02 Nov 2026").
- **Users**: Total number of active users in the selected range.
- **Created**: Total stories created across all users.

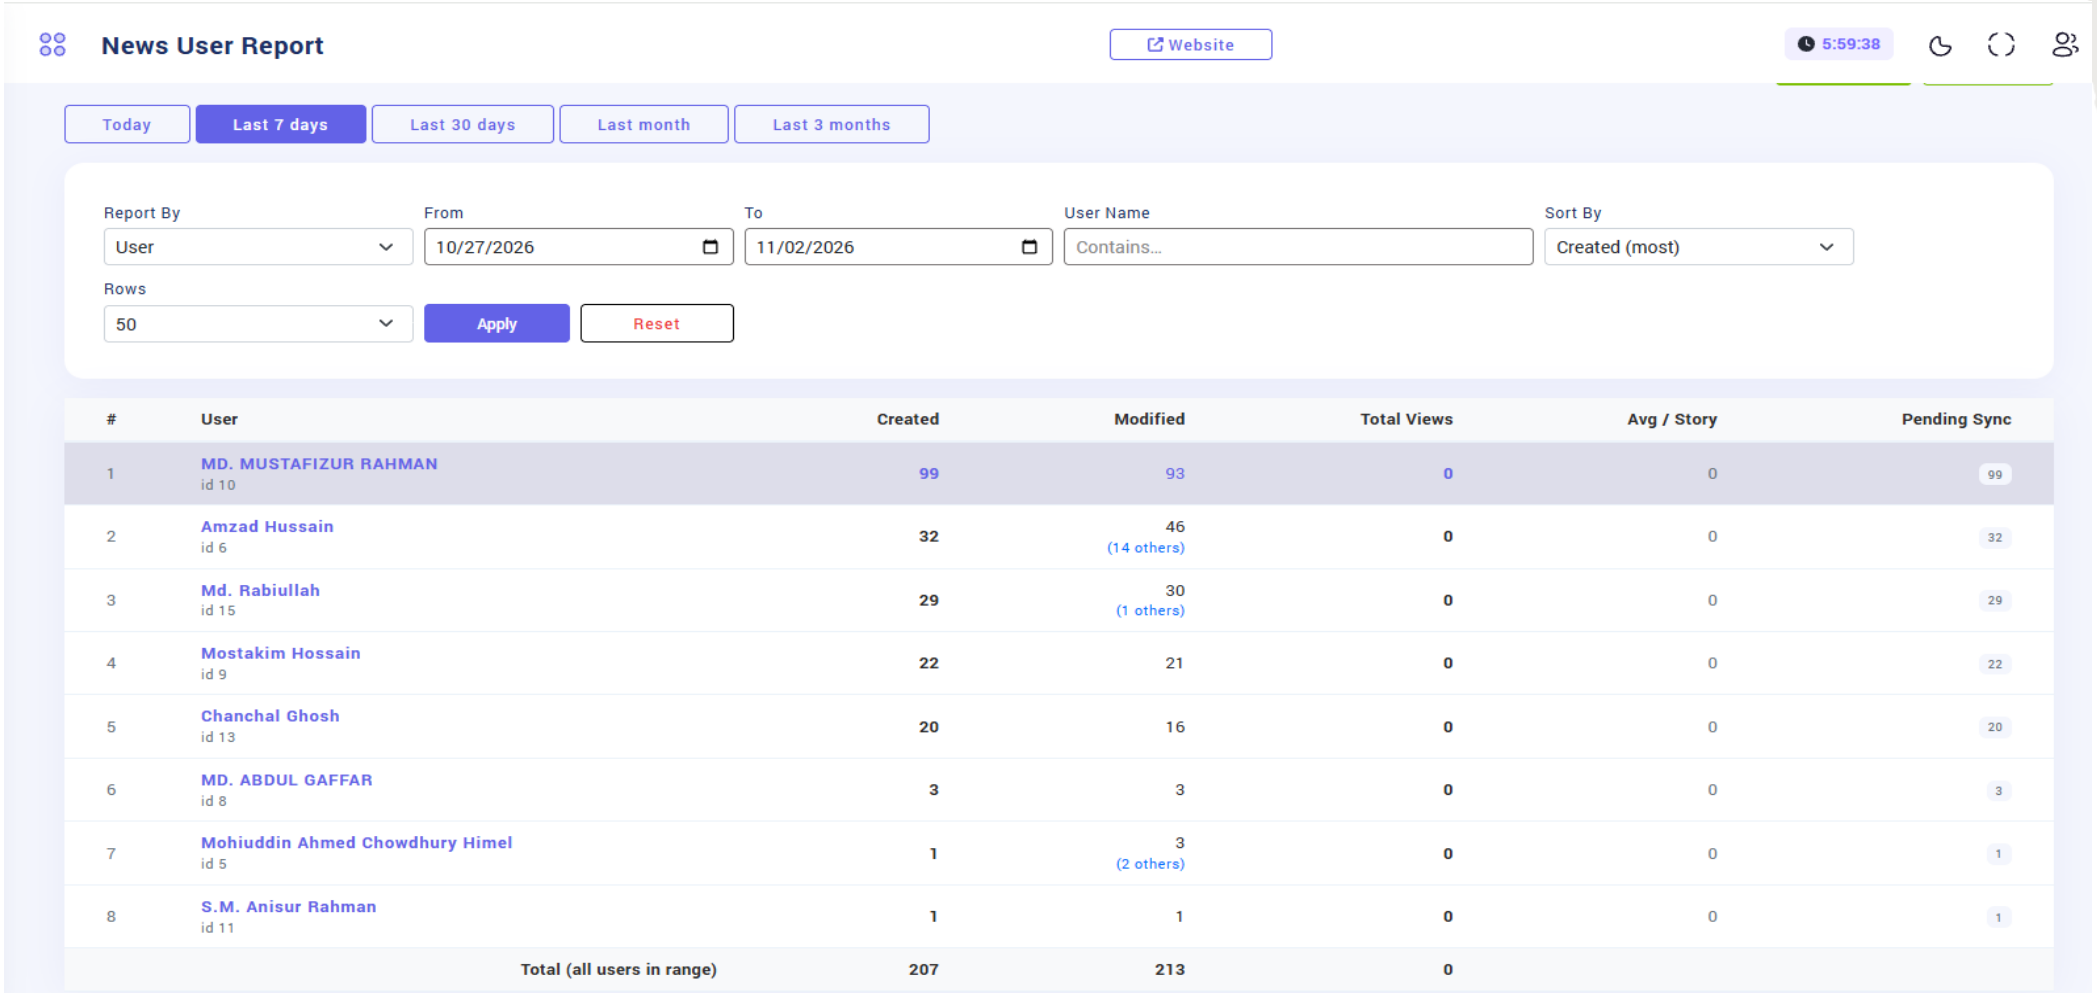

- **Modified**: Total stories modified across all users.
- **Views**: Total views accumulated in the period.
- Filter Panel
- For more precise reporting, use the filter fields:
- **Report By**: Select the grouping dimension (for example, "User").
- **From / To**: Pick a custom date range using the date pickers.
- **User Name**: Search for a specific user by typing their name.
- **Sort By**: Choose how to order results (for example, "Created (most)" to rank by highest contributors first).
- **Rows**: Set how many users to display per page (for example, 25 or 50).
- Click **Apply** to generate the filtered report, or **Reset** to clear custom filters.
- Report Table
- The results table ranks users by their activity and performance:
- **User**: The user's name and ID. Click the name to view detailed user activity.
- **Created**: Number of stories the user created in the selected period.
- **Modified**: Number of stories the user edited or updated. Some cells show "(X others)" indicating additional modifications on stories originally created by other users.
- **Total Views**: Combined page views for all stories by that user.

- **Avg / Story**: Average views per story for that user.
- **Pending Sync**: Number of stories awaiting analytics synchronization.
- A **Total** row at the bottom sums up all columns across every user in the selected range.
- Export
- Click the **Excel** or **CSV** buttons at the top right to download the current report data in your preferred spreadsheet format.
- Usage Example
- In the screenshots, selecting **Today** shows 4 users with 12 created and 12 modified stories. Switching to **Last 7 days** expands to 8 users with 207 created and 213 modified stories. Selecting **Last 30 days** shows 10 users with 556 created and 556 modified stories. Choosing **Last month** (October 2026) displays 10 users with 500 created and 499 modified stories. Finally, **Last 3 months** shows the broadest range with 10 users, 556 created, and 556 modified stories.

ACTIVITY LOG

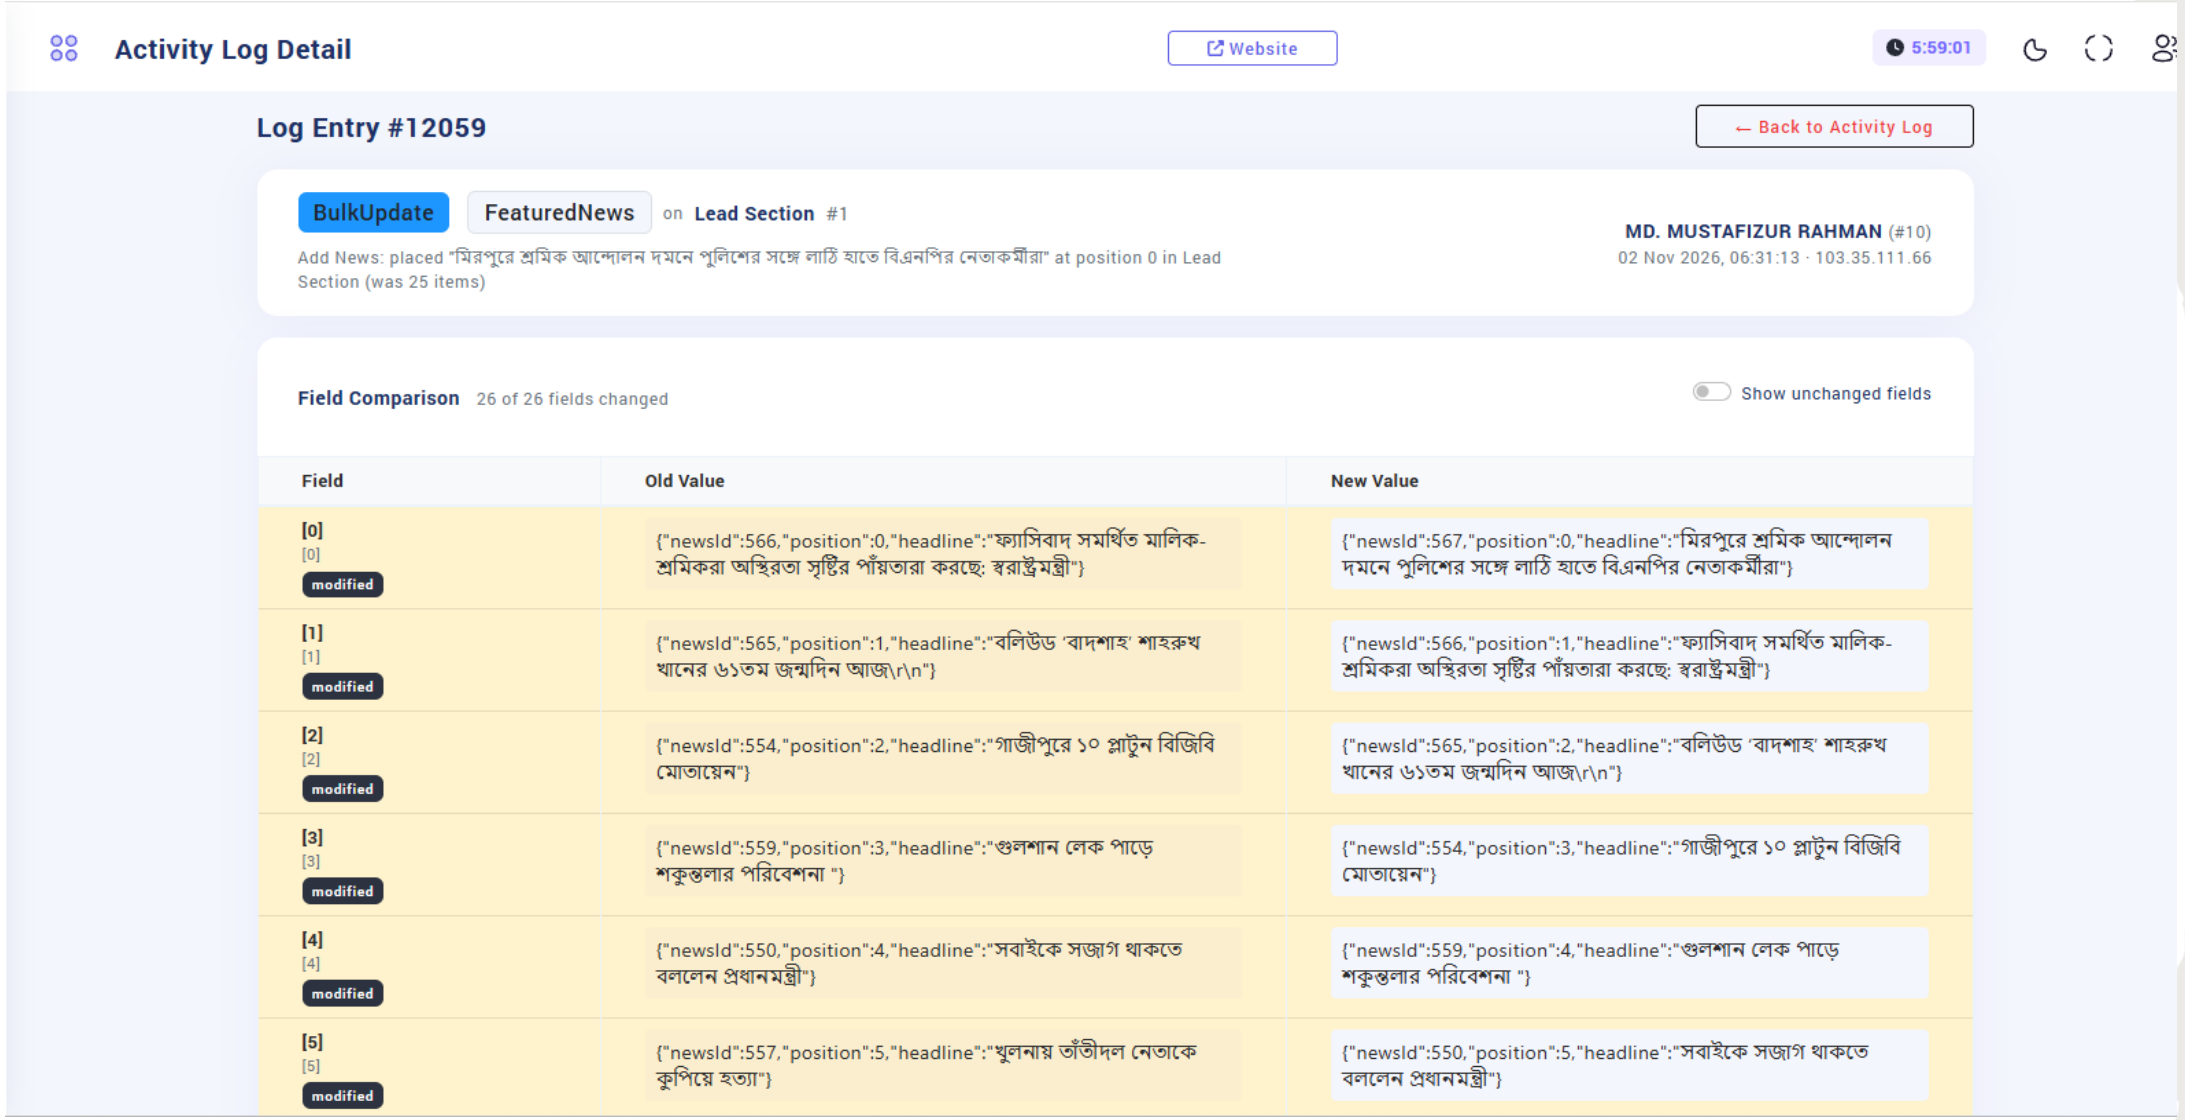

- This page tracks every create, update, and delete action performed across the CMS. The top summary bar shows **Total Actions**, **Created**, **Updated**, **Deleted**, **Unique Users**, and **Modules** affected within the selected time range.
- Quick Range & Filters
- Use the quick range buttons (**Today**, **Yesterday**, **7 days**, **30 days**, **90 days**) to instantly filter the log by time period. For more precise control, use the advanced filters:
- **From / To**: Select a custom date and time range.
- **Module**: Filter by the CMS module where the action occurred (for example, FeaturedNews, News, Category).
- **Action**: Filter by action type (for example, BulkUpdate, Create, Update, Delete).
- **User**: Filter by the specific user who performed the action.
- **Record or headline contains**: Search by record name or news headline.
- **Record ID**: Find actions on a specific record by its ID.
- **Sort**: Order results by newest first or other criteria.
- **Per page**: Control how many log entries display at once.
- Click **Apply Filters** to execute the search, or **Reset** to clear all filters. Click **Export CSV** to download the current filtered results.

- Log List Table
- Each row represents one tracked action with the following details:
- **When**: Exact date and time of the action.
- **User**: The user who performed the action, including their ID.
- **Module**: The section of the CMS where the change happened.
- **Action**: The type of action (for example, BulkUpdate).
- **Record**: The specific item that was changed, with a brief description.
- **Changed**: Number of fields that were modified (for example, "26 fields").
- **IP**: The IP address from which the action was performed.
- **View**: Click to open the full detail page for that specific log entry.
- Activity Log Detail
- Clicking **View** opens the detailed audit page for a single action (for example, "Log Entry #12059"). The header shows the action type, module, target record, user, timestamp, and a description of what was done.
- Field Comparison
- The main section displays a table comparing **OldValue** and **NewValue** for every field that changed. Each modified item is listed with an index number (for example, [0], [1]) and marked with a **modified** badge. This makes it easy to see exactly what data was replaced.

- Show Unchanged Fields
- Toggle **Show unchanged fields** to expand the comparison and display fields that were part of the record but did not change during the edit. This is useful for reviewing the complete state of the data.
- Raw Stored Values
- Click **Raw stored values** to expand a code view showing the full **OldValues** and **NewValues** in their raw structured format (similar to JSON). This displays the exact stored data objects with all properties such as `newsId`, `position`, and `headline`, allowing for deep technical inspection of the changes.

AUDIT REPORTS / ALL REPORTS

- This section provides a comprehensive audit trail of all actions performed across the CMS. The top summary bar shows **Total Actions**, **Successful** actions, **Failed** actions, **Validation Failed** counts, **Unique Users**, and **Unique Entities** affected within the selected period.
- Quick Range & Filters
- Use the quick range buttons (**Today**, **Yesterday**, **7 days**, **30 days**, **90 days**) to instantly filter the audit log by time period. For advanced filtering, use:
- **From / To**: Custom date and time range.
- **Entity Type**: Filter by the type of content (for example, news, category, tag).
- **Entity ID**: Search for a specific record by its ID.
- **Action**: Filter by action type (for example, create, update, lock_released, featured_position_changed).
- **Status**: Filter by success or failure status.
- **User**: Filter by the user who performed the action.
- **Title contains**: Search by article or record title.
- **Changed Field**: Search for specific fields that were modified (for example, "Title").
- **IP Address**: Filter by the IP address where the action originated.
- **Correlation ID**: Search by a specific request UUID to track related actions.
- **Per page**: Control how many entries display at once.
- Click **Apply Filters** to execute the search, **Reset** to clear filters, or toggle **Only failures** to show unsuccessful actions only. Click **Export CSV** to download the filtered results.

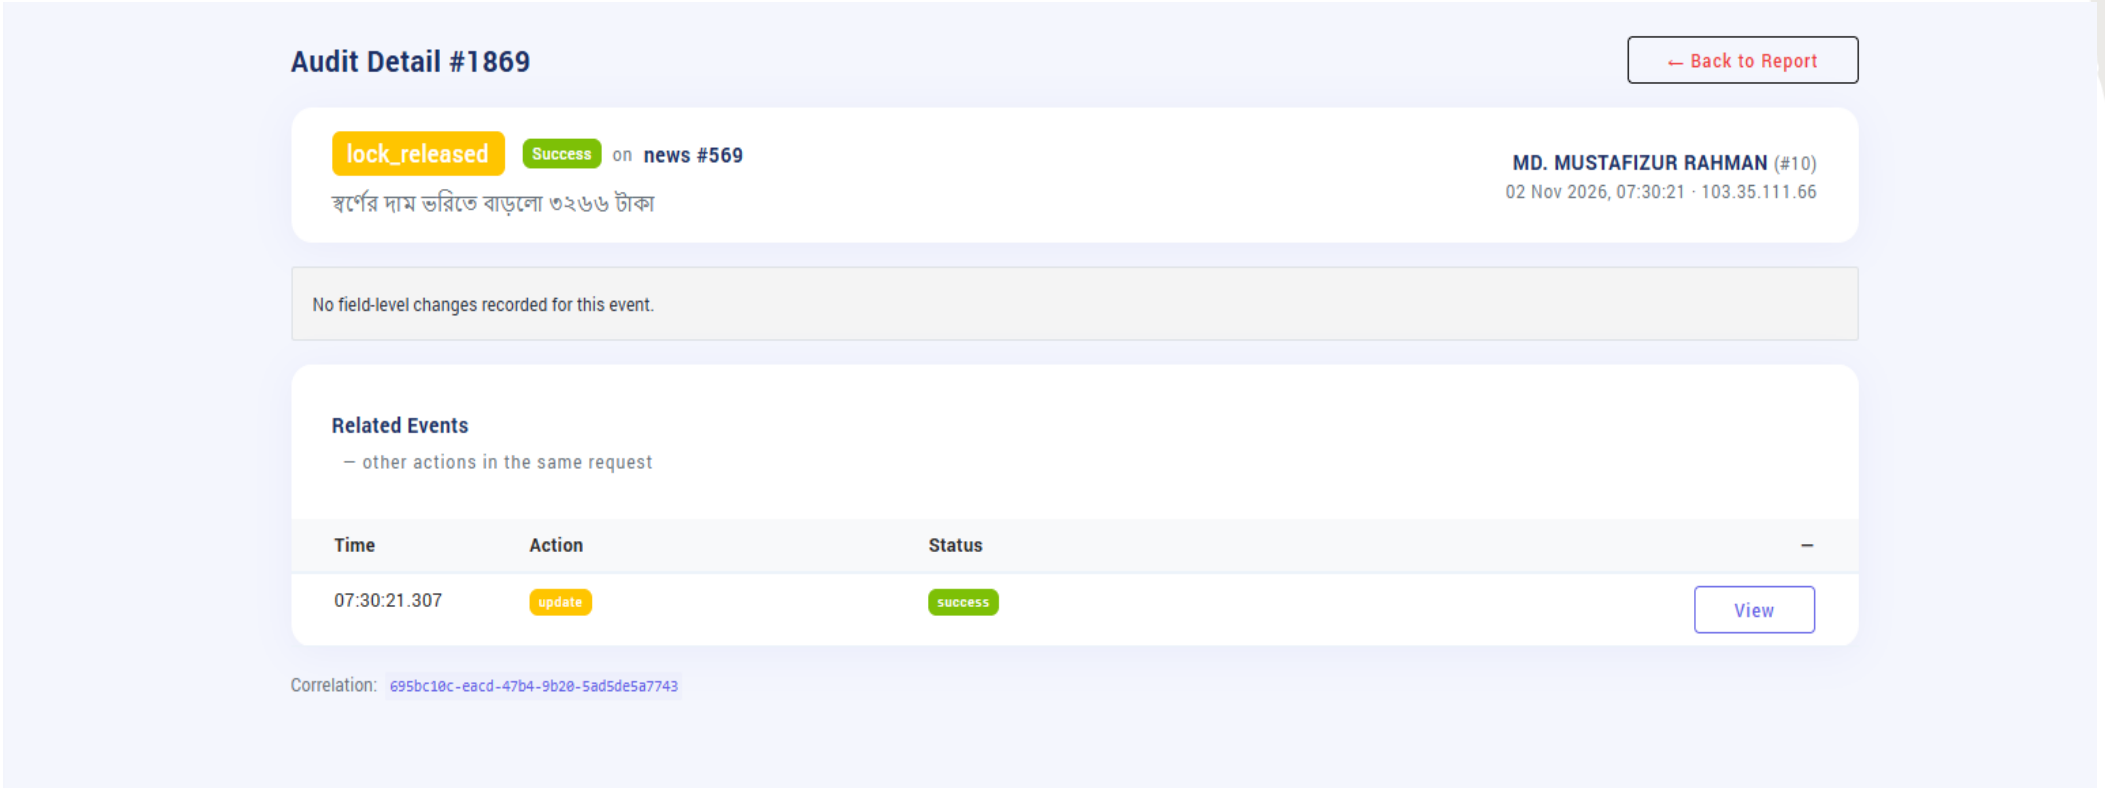

- Audit List Table
- Each row represents one tracked action with the following details:
- **When**: Exact date and time of the action.
- **User**: The user who performed the action.
- **Action**: The type of action (for example, `lock_released`, `update`, `featured_position_changed`), displayed as a colored badge.
- **Entity**: The content type and ID affected (for example, `news #569`).
- **Title**: The headline or name of the affected record.
- **Status**: Whether the action succeeded or failed.
- **Changed**: Number of fields modified (for example, "5 fields").
- **Duration**: How long the action took to process.
- **IP**: The IP address from which the action was performed.
- **View**: Opens the detailed audit page for that specific action.
- **Timeline**: Opens the full chronological timeline for the affected entity.
- Audit Detail Page
- Clicking **View** opens the full audit detail for a single action (for example, "Audit Detail #1869"). The header shows:
- The action type and status (for example, `lock_released`, `Success`).
- The affected entity (for example, `news #569`) and its title.
- The user who performed the action, timestamp, and IP address.

- Field Changes
- For actions that modified data, a **Field Changes** table compares **Old Value** and **New Value** for every changed field. In the example, an `update` action shows changes to `Last Published At`, `Locked`, `Locked At`, `Locked By`, and `Pinned in categories`. Switch between **Plain Text**, **Rich Preview**, and **Raw** view modes at the top right of the changes table.
- **Related Events**
- The detail page also shows **Related Events**, listing other actions that occurred in the same request. Each related event displays its time, action type, status, and a link to view its own detail page. The **Correlation ID** at the bottom links all actions from the same request together.
- Full Timeline
- Clicking **Timeline** on any audit row opens the **Full Timeline** for that specific entity (for example, `news #569`). This view shows every event ever recorded for that item in chronological order, grouped by date. Each event displays:
- The action type badge (for example, `create`, `update`, `featured_position_changed`, `lock_released`).
- The user who performed it and their IP address.
- The exact timestamp.
- All fields that were changed, shown as inline tags.
- **View Diff** and **All from request** buttons for deeper inspection.
- The timeline summary bar at the top shows **Total Events**, **Successful**, **Failed**, and **Unique Users** for that entity's history. Click **Back to Report** to return to the main audit list.
